## COASTSIDE COUNTY WATER DISTRICT 766 MAIN STREET

## HALF MOON BAY, CA 94019

#### SPECIAL MEETING OF THE BOARD OF DIRECTORS

Tuesday, April 13, 2010 - 6:00 p.m.

#### AGENDA

#### 1) CLOSED SESSION

- A. Conference with Labor Negotiators Pursuant to California Government Code §54957.6) Agency Designated Representatives: General Manager, IEDA Employee Organization: Teamsters Union, Local 856
- B. Conference with Legal Counsel Pursuant to California Government Code Section §54956.9(b) Anticipated Litigation - Significant Exposure to Litigation: One Case

## 2) RECONVENE TO OPEN SESSION

Public report of closed session action.

#### 766 MAIN STREET

#### HALF MOON BAY, CA 94019

#### MEETING OF THE BOARD OF DIRECTORS

#### Tuesday, April 13, 2010- 7:00 p.m.

#### AGENDA

The Coastside County Water District (CCWD) does not discriminate against persons with disabilities. Upon request, the agenda and agenda packet materials can be provided in a format to accommodate special needs. If you require a copy of the agenda or related materials in an alternative format to accommodate a disability, or if you wish to attend this public meeting and will require special assistance or other special equipment, please call the District at (650) 726-4405 in advance and we will make every reasonable attempt to provide such an accommodation.

All public records relating to an open session item on this agenda, which are not exempt from disclosure pursuant to the California Public Records Act, that are distributed to a majority of the legislative body will be available for public inspection at the CCWD District Office, located at 766 Main Street, Half Moon Bay, CA at the same time that the public records are distributed or made available to the legislative body.

This agenda and accompanying materials can be viewed on Coastside County Water District's website located at: <u>www.coastsidewater.org</u>.

The Board of the Coastside County Water District reserves the right to take action on any item included on this agenda.

1) ROLL CALL

## 2) PLEDGE OF ALLEGIANCE

## 3) **PUBLIC ANNOUNCEMENTS**

Any person may address the Board of Directors at the commencement of the meeting on any matter within the jurisdiction of the Board that is not on the agenda for this meeting. Any person may address the Board on an agendized item when that item is called. The Chair requests that each person addressing the Board limits their presentation to three (3) minutes and complete and submit a Speaker Slip.

## 4) CONSENT CALENDAR

The following matters before the Board of Directors are recommended for action as stated by the General Manager.

All matters listed hereunder constitute a Consent Calendar, are considered as routine by the Board of Directors, and will be acted upon by a single vote of the Board. There will be no separate discussion of these items unless a member of the Board so requests, in which event the matter shall be removed from the Consent Calendar and considered as a separate item.

- A. Requesting the Board to review disbursements for the month Ending March 31, 2010 – Claims: \$669,121.07; Payroll: \$73,210.89; for a total of \$742,331.96 (attachment)

## COASTSIDE COUNTY WATER DISTRICT 766 MAIN STREET HALF MOON BAY, CA 94019

## MINUTES OF THE BOARD OF DIRECTORS MEETING

## Tuesday, March 9, 2010

1) ROLL CALL: President Chris Mickelsen called the meeting to order at 7:00 p.m. Present at roll call: Vice-President Bob Feldman, and Directors Ken Coverdell, Jim Larimer and Jerry Donovan.

Also present were: David Dickson, General Manager; Patrick Miyaki, Legal Counsel; Joe Guistino, Superintendent of Operations; Cathleen Brennan, Public Outreach/Program Development /Water Resources Analyst; JoAnne Whelen, Administrative Assistant/Recording Secretary; and Gina Brazil, Office Manager.

## 2) PLEDGE OF ALLEGIANCE

3) **PUBLIC ANNOUNCEMENTS:** There were no public announcements.

## 4) CONSENT CALENDAR

- A. Requesting the Board to review disbursements for the month Ending February 28, 2010 – Claims: 436,607.21; Payroll: \$71,161.69 for a total of \$507,768.90
- **B.** Acceptance of Financial Reports
- C. Minutes of the February 9, 2010 Board of Directors Meeting
- D. Installed Water Connection Capacity and Water Meters Report
- E. Total CCWD Production Report
- F. CCWD Monthly Sales by Category Report
- G. February 2010 Leak Report
- H. Rainfall Reports
- I. San Francisco Public Utilities Commission Hydrological Conditions Report for February 2010
- J. El Granada Tank #1 Pump and Motor Upgrade

Director Donovan reported that he had reviewed the monthly financial claims and found all to be in order.

The Board briefly discussed a few proposed minor revisions and additions they would like staff to incorporate into the Approved Capital Improvement Projects Report.

ON MOTION BY Director Coverdell and seconded by Vice-President Feldman, the Board voted as follows, by roll call vote, to accept the Consent Calendar in its entirety:

Director Coverdell	Aye
Vice-President Feldman	Aye
Director Larimer	Aye
Director Donovan	Aye
President Mickelsen	Aye

## 5) MEETINGS ATTENDED / DIRECTOR COMMENTS

Director Coverdell reported on the District's latest Finance Committee meeting. Director Larimer commented on his attendance at recent Sewer Authority Mid-Coastside meetings, and Director Feldman provided a brief report on the District's Water Resources Committee meeting, which consisted of a meeting of the Pilarcitos Restoration Workgroup members.

## 6) **GENERAL BUSINESS**

## A. <u>Resolution 2010-02 – Congratulating the Association of California Water</u> <u>Agencies (ACWA) on its Centennial Anniversary</u>

Mr. Dickson introduced this item and briefly summarized some of the services, opportunities, and benefits the District has been provided through its membership to ACWA since 1955, noting that the Board may wish to adopt the Resolution congratulating ACWA on its 100<sup>th</sup> anniversary.

ON MOTION BY Director Donovan and seconded by Vice-President Feldman, the Board voted as follows, by roll call vote, to adopt Resolution 2010-02 Congratulating the Association of California Water Agencies on its Centennial Anniversary:

Director Coverdell	Aye
Vice-President Feldman	Aye
Director Larimer	Aye
Director Donovan	Aye
President Mickelsen	Aye

#### B. <u>Water Reclamation Update</u>

Mr. Dickson reviewed the current status of the Principles of Agreement between the District and the Sewer Authority Mid-Coastside (SAM), indicating that he expected the revised Principles to be brought back to the SAM Board for consideration at their March 22, 2010 meeting. He also updated the Board on SAM's funding application and explained that he believed the best approach to obtain Federal funds for the coastside recycling project is for CCWD and SAM to work together through the Bay Area Recycled Water Coalition (BARWC) process and that he would continue to work with SAM staff toward this goal.

Director Larimer indicated that he had attended the recent SAM Board meetings and shared his views of the limited progress that is being made in the development of the potential recycled water project. A brief discussion among the Board members ensued.

## 7) GENERAL MANAGER'S REPORT INCLUDING MONTHLY INFORMATIONAL REPORTS

Mr. Dickson reviewed the highlights of the General Manager's report, including details of the recent annual meeting with the San Francisco Public Utilities Commission's Wholesale Customers and a review of staff's proposed schedule for presentation and consideration of the Fiscal Year 2010-2011 budget.

- A. <u>Monthly Water Resources Report</u>
- B. <u>Water Shortage and Drought Contingency Plan Update</u>
- C. <u>Operations Report</u>

Ms. Brennan informed the Board of the upcoming Water Efficient Landscape Classes. Mr. Guistino addressed a few brief comments from the Board regarding the Operations Report.

## 8) DIRECTOR AGENDA ITEMS - REQUESTS FOR FUTURE BOARD MEETINGS

There were no Director comments.

## 9) ADJOURNMENT

The meeting was adjourned at 7:58 p.m. The next regular meeting of the Coastside County Water District's Board of Directors is scheduled for Tuesday, April 13, 2010.

Respectfully submitted

David R. Dickson, General Manager Secretary of the Board

Chris R. Mickelsen, President Board of Directors

## **Current System Storage**

			Tab Current As of Apr	Storage			
Reservoir	Curren	t Storage	Maximu	m Storage	Available	e Capacity	Percent of Maximum Storag
ĺ	Acre-Feet	Millions of Gallons	Acre-Feet	Millions of Gallons	Acre-Feet	Millions of Gallons	
Tuolumne System							
Hetch Hetchy <sup>1/</sup>	263,080		340,830		77,750		77.2%
Cherry <sup>2/</sup>	244,712		268,810		24,098		91.0%
Lake Eleanor <sup>3/</sup>	19,961		23,541		3,580		84.8%
Water Bank	569,665		570,000		335		99.9%
Tuolumne Storage	1,097,418		1,203,181		105,763		91.2%
Local Bay Area Sto	rage						
Calaveras 4/	47,588	15,506	96,824	31,550	49,236	16,044	49.1%
San Antonio	49,204	16,033	50,496	16,454	1,292	421	97.4%
Crystal Springs	53,969	17,586	58,377	19,022	4,408	1,436	92.4%
San Andreas	17,202	5,605	18,996	6,190	1,794	585	90.6%
Pilarcitos	2,812	916	3,100	1,010	288	94	90.7%
Total Local Storage	170,775	55,646	227,793	74,226	57,018	18,580	75.0%
Total System	1,268,193		1,430,974		162,781		88.6%

Current Tuolumne System and Local Bay Area storage conditions are summarized in Table 1.

<sup>1/</sup> Maximum Hetch Hetchy Reservoir storage with drum gates de-activated. <sup>2/</sup> Maximum Cherry Reservoir storage with flash-boards out.

<sup>3/</sup> Maximum Lake Eleanor storage with all stop-logs out.

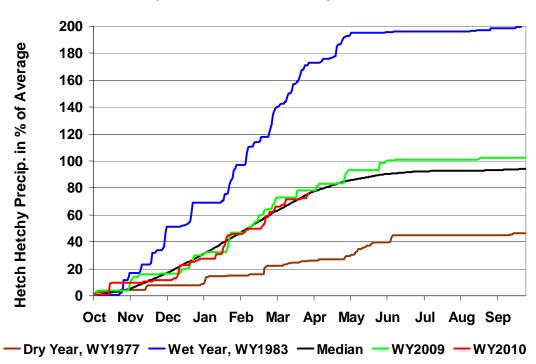

<sup>4/</sup> Available capacity does not take into account current DSOD storage restrictions.

## Hetch Hetchy System Precipitation Index <sup>5/</sup>

*Current Month:* The March six-station precipitation index is 4.45 inches, or 81.7% of the average index for the month. The precipitation gauge at Hetch Hetchy received 4.61 inches of precipitation in March. Precipitation accumulation was spread over 4 small events throughout the month.

*Cumulative Precipitation to Date:* The accumulated six-station precipitation index for water year 2010 is 30.08 inches, which is 84.6% of the average annual water year total, or 102.3% of the season-to-date precipitation. The water year cumulative precipitation for the Hetch Hetchy gauge is shown in Figure 1 in red, and is on the median line.

<sup>&</sup>lt;sup>5</sup>The precipitation index is computed using six Sierra precipitation stations and is an indicator of the wetness of the basin for the water year to date. The index is computed as the average of the six stations and is expressed in inches and in percent.

Precipitation at Hetch Hetchy: Water Year 2010

**Figure 1:** Water year 2010 cumulative precipitation received at Hetch Hetchy Reservoir through the end-of-month March. Precipitation curves for wet, dry, median, and WY 2009 years for the station at Hetch Hetchy are included for comparison purposes.

## **Tuolumne Basin Unimpaired Inflow**

Unimpaired inflow to SFPUC reservoirs and the Tuolumne River at La Grange as of March 31<sup>st</sup> is summarized below in Table 2. The March inflows to the SFPUC reservoirs were close to normal, while Tuolumne at La Grange and Water Available to the City were below normal.

			Tab Unimpair Acre-	ed Inflow				
		Marcl	h 2010		October	1, 2009 th	rough Marc	h 31, 2010
	Observed Flow	Median <sup>6</sup>	Average <sup>6</sup>	Percent o Average	()hserved	Median <sup>6</sup>	Average <sup>6</sup>	Percent of Average
Inflow to Hetch Hetchy Reservoir	43,123	38,023	41,388	104.2%	125,736	114,363	131,004	96.0%
Inflow to Cherry Reservoi and Lake Eleanor								
	38,337	36,974	41,474	92.4%	123,892	109,583	135,854	91.2%
Tuolumne River at La Grange	160,634	161,637	191,542	83.9%	459,249	508,939	611,219	75.1%
Water Available to the City	20,755	30,065	69,031	30.1%	71,298	143,062	231,718	30.8%

<sup>6</sup> Hydrologic Record: 1919 – 2005.

## **Hetch Hetchy System Operations**

Due to the January and February SJPL shutdown and near-normal monthly inflow, Hetch Hetchy storage is relatively high for this time of year. Draft from Hetch Hetchy Reservoir in March totaled about 52,312 acre-feet of water. In addition to draft made to support minimum streamflow releases and SJPL deliveries, power draft was made in order to reduce the projected spring runoff spill and increase available storage capacity. Due to the accumulated precipitation, minimum streamflow releases at O'Shaughnessy Dam are following schedule "A".

During March, about 45,493 acre-feet of power draft was made from Cherry Reservoir to support the City's Municipal load, District Class 1, other loads or accounts, and sales. Pumping from Eleanor to Cherry during March was done to control future spill at Lake Eleanor. Over 13,537 acre-feet of water was transferred from Eleanor to Cherry in February.

## **Local System Operations**

The Sunol Valley Treatment Plant was off-line the majority of days in March to allow for maintenance, the average rate for the month was less than 2 MGD. The Harry Tracy Water Treatment Plant rate averaged 38 MGD.

## Local System Water Demand

March water demand averaged 179 MGD, a 7% increase over the February demand of 167 MGD.

## **Local Precipitation**

March precipitation across the East Bay and Peninsula watersheds was 104% of average for the month. Precipitation totals are presented in Table 3.

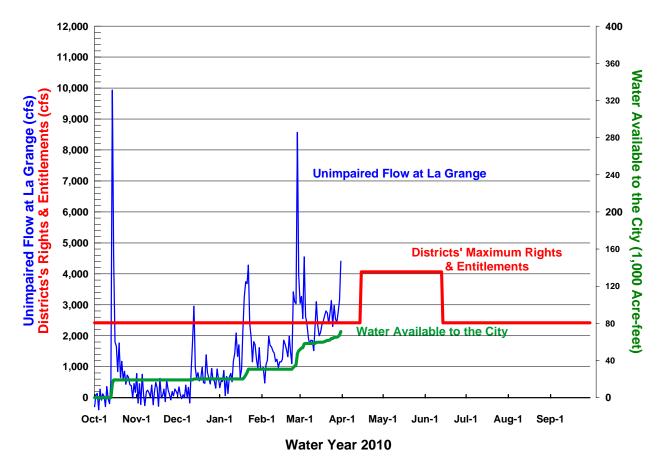

Precip	itation Totals At T	Table 3 Three Local Area Rese	rvoirs For March 201(	)
Reservoir	Month Total (inches)	Percentage of Normal for the Month	Year To Date <sup>7</sup> (inches)	Percentage of Normal for the Year-to-Date <sup>7</sup>
Pilarcitos	5.95	109 %	31.27	89 %
Lower Crystal Springs	3.55	92 %	21.67	90 %
Calaveras	3.58	110 %	19.52	102 %

<sup>7</sup> Since July 1, 2009

## **Snowmelt and Water Supply**

Manual snow survey measurements were made during the last week of March and the first few days of April. The April 1<sup>st</sup> snowpack is typically the annual peak snowpack accumulation for the season, and these data are the benchmark measurement for predicting water supply. The measurements within the Tuolumne River watershed indicate that the snowpack is 107% of average April 1<sup>st</sup> conditions. The April 1<sup>st</sup> snow survey results show the persistence of the low-elevation snowpack conditions as above normal and 100% snow coverage down to 6,000 feet. There does continue to be a disproportionally greater-than-normal snowpack at the lower-elevation snow courses than at high-elevation snow courses. These factors are considered in the water supply forecasting model.

The most significant months of precipitation for the water year have already occurred and have resulted in above-normal conditions, or 102% of precipitation accumulation to date. Historically, precipitation accumulation for April accounts for about 9% of the annual accumulation. Significant events have occurred in April but are rare in the historic record. The first few days of April have brought significant precipitation accumulation and over 2 feet of new snowfall in the high country. The precipitation gauge at Hetch Hetchy has recorded 2.25 inches so far in April. Storms will abate for the remainder of the work week, but there is a chance an unsettled pattern may resume next weekend. The seasonal climate forecast is for below-normal temperatures and an equal chance of above or below average precipitation for the month of April. Given the current snowpack conditions, water year 2010 is on track to be slightly above normal hydrologic conditions for snowmelt runoff.

Unimpaired Flow at La Grange & Water Available to the City

**Figure 2:** Calculated unimpaired flow at La Grange and the allocation of flows between the Districts and the City. Water available to the City for the period from October 1<sup>st</sup>, 2009 through March 31st, 2010 was 71,298 acre-feet.

## April-July Natural Flow at LaGrange

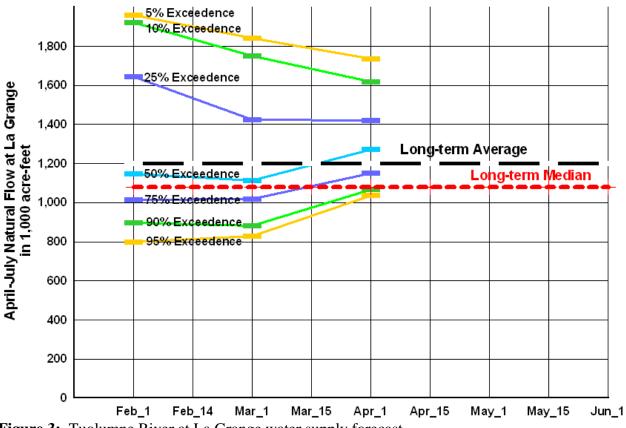

Figure 3: Tuolumne River at La Grange water supply forecast

Using the measured snow course and precipitation data, the volumetric forecast procedure was executed. The La Grange forecast indicates that the median amount of runoff that may occur this year is about 118% of the long-term median. The median forecast of April-to-July runoff is about 1,273 TAF, compared to the long-term median runoff for the April-to-July period of 1,080 TAF. For natural flow at La Grange, there is an 80 percent chance that the April-to-July natural runoff will be between 1,069 TAF and 1,619 TAF.

### STAFF REPORT

То:	Coastside County Water District Board of Directors
From:	Dave Dickson, General Manager
Agenda:	April 13, 2010
Date:	April 7, 2010
Subject:	Acceptance of 311 Church Street Non-Complex Pipeline Extension Project

### **Recommendation:**

Accept the water system improvements for the Non Complex Pipeline Extension Project at 311 Church Street as complete.

## **Background:**

A non-complex pipeline extension project for Miramontes Street was completed in February 2010.

The District accepts the project utility system according to the conditions listed below:

- $\sqrt{}$  That the Project Utility System was constructed in accordance with the district regulations.
- $\checkmark$  All costs for the construction of the Project has been borne by the applicant. No outstanding fees are due at this time.

**Fiscal Impact:** None.

Recorded at Request of and Return To:

Coastside County Water District 766 Main Street Half Moon Bay, CA 94019

### **NOTICE OF COMPLETION**

### NOTICE IS HEREBY GIVEN:

1. The undersigned is an owner of an interest or estate in the hereafter described real

property, the nature of which is: easement.

2. The full name and address of the undersigned is: COASTSIDE COUNTY WATER DISTRICT 766 MAIN STREET HALF MOON BAY, CALIFORNIA 94019

3. On the 16th day of February, 2010 there was completed upon the hereinafter described

real property a work of improvement as a whole named 311 Church Street Non-Complex Pipeline

Extension Project, consisting of approximately four hundred and fifty feet of six inch water pipeline and

appurtenances.

4. The name of the original contractor for the work of improvement as a whole was:

Andreini Bros., Inc., 151 Main Street, Half Moon Bay, CA 94019.

5. The real property herein referred to is situated in the County of San Mateo, State of

California, and described as follows:

Four hundred and fifty feet of six inch water pipeline beginning at Mill Street and extended North to 311 Church Street in Half Moon Bay, California (APN 056-161-220).

I certify (or declare) under penalty of perjury that the foregoing is true and correct.

### COASTSIDE COUNTY WATER DISTRICT

David R. Dickson, General Manager

## **STAFF REPORT**

То:	Coastside County Water District Board of Directors
From:	David Dickson, General Manager
Agenda:	April 13, 2010
Report Date:	April 8, 2010
Subject:	Priority Connection Purchase Agreement for Low-Income Senior Housing

## **Recommendation:**

Approve the attached letter agreement with Senior Coastsiders, Inc. and Coastside Adult Day Health Center regarding purchase of priority connections for low-income senior housing.

## **Background:**

Senior Coastsiders, Inc. and Coastside Adult Day Health Center are working with Lesley Senior Communities, Inc. to develop low-income senior housing, as well as facilities for their activities, on a parcel at 925 Main Street in Half Moon Bay. They have submitted an application to purchase priority connections (9.5 5/8" equivalents) for the affordable housing component of the project, supported by a letter from the City saying that the project is a priority use for water supply purposes according to City policy. The City did not submit information, however, demonstrating compliance with the District's requirement that the property "is zoned for and designated as entitled to priority water service under the applicable local coastal plan."

Staff has discussed this issue with the City and with the applicants, and we have concluded that we will need additional time to resolve the discrepancy and to ensure that the District complies with Coastal Development Permit conditions related to priority connections. The attached agreement acknowledges the application and gives the District until January 1, 2011 to execute the purchase agreement and deliver the connections. If the District cannot satisfy itself as to the project's eligibility for priority connections, the applicants will receive a refund of the Transmission and Storage Fees paid (\$66,215).

## Fiscal Impact:

None.

April 7, 2010

Senior Coastsiders, Inc. Attn: Cara Schmaljohn 535 Kelly Avenue Half Moon Bay, CA 94019 Coastside Adult Day Health Center Attn: Janie Bono-James 645 Correas Half Moon Bay, CA 94019

### Re: Purchase of Priority Water Service Connections

Dear Ms. Schmaljohn and Ms. Bono-James:

The Coastside County Water District ("District"), on April 1, 2010, received the Priority Water Service Connection Purchase Agreement ("Application") submitted by Senior Coastsiders, Inc., and Coastside Adult Day Health Center (collectively, "Applicants") for the purchase of priority water service connections for use on certain property in the City of Half Moon Bay for a low income senior housing project.

The Application is substantially complete. However, there is a discrepancy in the requirements of Section 4 of the Application and the February 11, 2010 letter submitted by the City of Half Moon Bay ("City"). Section 4 requires that the Applicants submit a letter from the City "advising the District that the use to which Purchaser proposes to put the water connection is designated as a priority use, and that the Property is zoned for and designated as entitled to priority water service under the applicable local coastal plan." The February 11, 2010 letter from the City states that the City Planning Commission has approved the proposed development, "finding that housing which is restricted to low and very low income occupants is a priority use for water supply purposes, in accordance with Policy 5.519 (PDP 90-099; Lesley Gardens)." However, the February 11, 2010 letter from the City does <u>not</u> state that the property where the priority connections will be installed "is zoned for and designated as entitled to priority water service under the applicable local coastal plan" as required by Section 4 of the Application.

The District intends to coordinate with the City regarding this discrepancy between the requirements in the Application and the City's February 11, 2010 letter. Until this discrepancy is resolved to the satisfaction of the District, the District will not execute the Application and sell the priority water service connections to the Applicants. However, because the Applicants otherwise submitted a complete Application, including the full purchase price for the priority water service connections requested, the District will agree to sell to Applicants priority water service connections pursuant to the following terms and conditions:

- <u>Number of Priority Water Service Connections</u>: One 3/4-inch connection and one 2-inch connection (the equivalent of 9.5 5/8-inch priority connections).
- <u>Property to be Served</u>: Assessor's Parcel Number 056-210-340.
- Use of Water Service Connections: Low income senior housing project.

Senior Coastsiders, Inc. Coastside Adult Day Health Center April 7, 2010 Page 2

- <u>Transmission and Storage Fees</u>: \$10,455 for the one 3/4-inch connection, and \$55,760 for the one 2-inch connection. The District acknowledges receipt of \$66,215 for payment of these transmission and storage fees, the full amount due based on the transmission and storage fee in effect as of the date of this letter.
- <u>Other Fees and Charges</u>: Applicants must pay all other fees and charges applicable at the time the priority water service connections are installed at the rates in place when the connections are installed.
- <u>Term</u>: These terms and conditions for the sale and purchase of priority connections will remain in effect until (1) January 1, 2011; or (2) 30 days after the District provides written notice to Applicants that the discrepancy in the District's requirements and the City's February 11, 2010 letter have been resolved to the satisfaction of the District, whichever occurs first ("Expiration Date"). If the discrepancy between the requirements in the Application and the City's February 11, 2010 letter has not been resolved by January 1, 2011, the Applicants may extend the January 1, 2011 date in the Expiration Date to July 1, 2011 by providing the District with written notice prior to the Expiration Date.
- <u>Refund of Transmission and Storage Fees</u>: If the sale and purchase of the priority water service connections is not completed by the Expiration Date, the District will refund to Applicants the full \$66,215, without any interest, within 30 days from the Expiration Date. In addition, Applicants may withdraw the Application at any time by providing written notice to the District. If the Applicants withdraw the Applicants withdraw the Applicants withdraw the District will refund the Applicants withdraw the District will refund the Applicants the full \$66,215, without any interest, within 30 days from the date the District receives the notice of withdrawal.
- <u>Application</u>: All the terms and conditions of the Priority Water Service Connection Purchase Agreement signed by Applicants and submitted to the District apply to the sale and purchase of these priority water service connections.

If the sale and purchase of the priority water service connections is not completed by the Expiration Date, then any future sale and purchase of water service connections to Applicants will be in accordance with the District regulations, including rates and charges, in effect at the time of purchase.

Please acknowledge Applicants' acceptance of the contents of this letter, including all terms and conditions for the sale and purchase of priority water service connections, by signing the enclosed copy of this letter in the space below and returning it to the District by 5:00 p.m. on April 15, 2010. If the District does not receive the copy of this letter with

Senior Coastsiders, Inc. Coastside Adult Day Health Center April 7, 2010 Page 3

Applicants' original signatures by 5:00 p.m. on April 15, 2010, the agreements set forth in this letter will not be effective.

Please do not hesitate to contact me if you have any questions or want to discuss this letter.

Sincerely,

David Dickson General Manager

\* \* \* \* \* \*

Applicants hereby agree to the content of this letter, including the terms and conditions for the sale and purchase of priority water service connections.

Senior Coastsiders, Inc.

Staff Report						
То:	Coastside County Water District Board of Directors, via David Dickson, General Manager					
From:	Cathleen Brennan, Water Resources Analyst					
Agenda:	April 13, 2010					
Subject:	Coastside County Water District Indoor Water Use Efficiency Ordinance					

## **Recommendation:**

Consider the proposed Indoor Water Use Efficiency Ordinance and set a public hearing on the ordinance for May 11, 2010, at 7pm. No action on the proposed ordinance is required at this time.

## □ Background

Increasing water costs and limited water supply will pose water supply challenges over the next decade for Coastside County Water District (District).

The San Francisco Public Utilities Commission's (SFPUC) decision to limit the available water supply to member agencies of the Bay Area Water Supply and Conservation Agency (BAWSCA) to 184 MGD until at least 2018 will result in an interim water supply allocation for the District. In addition to limitations on available imported water supply, Senate Bill 7x-7 has called for a 20% per capita reduction statewide in water use by the year 2020.

An Environmental surcharge fee will be imposed on the District by SFPUC, if the District's individual interim supply limitation is exceeded and the 184 MGD supply limitation is exceeded. The cost of the SFPUC's water system improvements is projected to result in increased wholesale rates through 2015.

These challenges require the District to evaluate the implementation of additional voluntary water efficiency programs and to take the next step into mandating water efficiency programs. The proposed indoor water use efficiency ordinance is a mandatory water efficiency measure that is expected to reduce per capita indoor water consumption for new and expanded water services in the District's service area. Other examples of mandatory water efficiency measures that the District imposes on customers are metering the usage of all customers and tiered residential water rates.

## **Description**

Development of the indoor water use efficiency ordinance was a cooperative effort by BAWSCA member agencies to meet the challenge of reducing water demand and living within current water supply limitations. The ordinance was designed to achieve a 20% water savings for indoor water use and to be consistent with California Green Building Standards Code, California Senate Bill 7x-7 and the Environmental Protection Agency's WaterSense Program.

The District's proposed ordinance (attached) applies to any project requiring new or expanded water service for new construction, remodels and existing construction. It targets residential and commercial plumbing fixtures and appliances. It also has specific metering requirements to encourage water efficiency.

Fixture	Residential	Non-Residential		
Toilets	≤ 1.28 gpf, and ≥ 350 grams	≤ 1.28 gpf, and ≥ 350 grams		
Urinals	≤ 0.5 gpf	≤ 0.5 gpf		
Showers	≤ 2.0 gpm at 80 psi	≤ 2.0 gpm at 80 psi		
Bathroom faucets	≤ 1.5 gpm at 60 psi	≤ 0.5 gpm at 60 psi		
Kitchen/Utility faucets	≤ 2.2 gpm at 60 psi	≤ 2.2 gpm at 60 psi		
Clothes washers	≤ 6.0 Water Factor	≤ 6.0 Water Factor		
Dishwashers	≤ 6.5 gal/cycle, or Energy Star Qualified	Energy Star Qualified		
Cooling towers	≥ 5 cycles of concentration or ≥ 2.5 LSI	≥ 5 cycles of oncentration or ≥ 2.5 LSI		
Food steamers		Boiler less, or Self-contained		
Ice machines		≤ 25 gal/100 lbs ice, or Air-cooled		
Pre-rinse spray valves		≤ 1.15 gpm at 60 psi		
Automatic vehicle wash facilities		≥ 50% of water recycled on site		
Commercial refrigeration		Closed loop, or Air-cooled		

A checklist (copy attached) with the requirements was developed to complement the ordinance and assist the applicant with compliance. The checklist will be used by District staff along with the other submittals to determine compliance.

## Enforcement

Failure to comply with the requirements of the ordinance will result in:

- **□** Resubmittal of application materials
- □ Notice of Correction to the Applicant or Property Owner for non-compliance
- Notice of Violation to the Applicant or Property Owner for non-compliance 60 days after the service of a Notice of Correction

- Installation of a flow restrictor on the non-compliant service after 60 days of noncompliance
- Suspension of water service at the non-compliant property after 60 days of noncompliance on a dedicated irrigation service
- Referral to the District Attorney, City Attorney or County Counsel of the jurisdiction where the violation occurred

## Effective Date

January 1, 2011 is the proposed effective date for this ordinance. The reason for delaying the effective date is that implementing this ordinance requires the amendment of the District's <u>Rate and Fee Schedule</u>, <u>General Regulations Regarding Water Service</u> and <u>Regulations</u> <u>Regarding Water Service Extensions and Water System Improvements; Engineering and Construction Standards; Approved Materials</u>. This effective date allows for proper staff review, public notice, and Board approval.

## **Economic Impact**

Applicants for new and expanded water service would be required to review the additional regulations and complete additional application materials to comply with the standards. In some cases, the compliant fixtures might cost more than non-compliant fixtures.

## □ Fiscal Impact

Additional staff time will be required to review applications for new and expanded water service. In instances where inspections are required, additional staff time will be required to verify compliance at the site.

## □ Summary

With the Board's approval, a public hearing will be set for May 11, 2010 at 7:00pm for the proposed Indoor Water Use Efficiency Ordinance. The proposed ordinance will be published in the Half Moon Bay Review before the public hearing.

ORDINANCE NO. 2010-\_\_\_\_

### AN ORDINANCE OF COASTSIDE COUNTY WATER DISTRICT

### ESTABLISHING WATER CONSERVATION REGULATIONS

THIS ORDINANCE is adopted in light of the following facts and circumstances, which are hereby found and declared by the Board of Directors.

WHEREAS, a reliable minimum supply of potable water is essential to the public health, safety and welfare of the people and economy of the County of San Mateo and the City of Half Moon Bay California.

WHEREAS, the San Francisco Bay Area is a semi-arid region and is dependent upon local surface water, ground water, and imported water supplies. Factors, such as drought, a growing population, climate change, and environmental and regulatory concerns affect our region's water reliability and make the region highly susceptible to water supply challenges.

WHEREAS, careful water management requires active water conservation measures, not only in times of drought but at all times, in order to ensure a reliable minimum supply of water to meet current and future water supply needs.

WHEREAS, Article X, Section 2 of the California Constitution and Section 100 of the California Water Code declare that the general welfare requires water resources be put to beneficial use, waste or unreasonable use or unreasonable method of use of water be prevented, and conservation of water be fully exercised with a view to the reasonable and beneficial use thereof.

WHEREAS, the San Francisco Public Utilities Commission has imposed an interim water supply limitation on its wholesale customers, including local water suppliers, until at least 2018.

WHEREAS, current supply and demand projections for the Bay Area Water Supply and Conservation Agency member agencies indicate that, in the absence of increased water conservation, water demands will exceed available water supplies in 2015 and implementation of water conserving ordinances is one mechanism by which agencies can reduce future water demands and remain within existing supplies.

WHEREAS, the Board of Directors finds and determines that this Ordinance is consistent with the provisions requiring high efficiency water conserving fixtures and reductions in indoor water use in the 2007 California Plumbing Code and the California Green Building Standards Code, respectively, as such provisions will be implemented in the coming years. Implementation of this Ordinance is necessary to expedite the use of high efficiency water conserving fixtures and assist BAWSCA member agencies in achieving water savings.

WHEREAS, the State Legislature has identified the provision of a more reliable water supply and the protection, restoration and enhancement of the Delta ecosystem as a high priority for the State. Pursuant to this, in November 2009, the State Legislature passed Senate Bill 7 (7<sup>th</sup> Extraordinary Session) requiring certain urban water suppliers to reduce per capita urban water use by 20% by the year 2020. Accordingly, the Board of Directors finds that the implementation of this Ordinance is consistent with the policies and goals established by the State Legislature in enacting Senate Bill 7 (7<sup>th</sup> Extraordinary Session).

WHEREAS, the State Legislature has identified urban water conservation as a costeffective approach to addressing water supply needs and determined that there are many water conservation practices that produce significant energy and water resource savings that should be encouraged as a matter of state policy. Pursuant to this finding, the State Legislature passed Senate Bill 407 (Chapter 587, Stats. 2009), requiring all residential and commercial property owners to replace existing plumbing fixtures with water-conserving fixtures by 2017 and 2019, respectively, and to upgrade existing plumbing fixtures upon any remodel initiated after January, 1 2014. Senate Bill 407 further authorizes a city, county, or retail water supplier to enact local ordinances that promote compliant use of water efficient plumbing fixtures or which will result in a greater amount of water savings than those provided for in Senate Bill 407. Accordingly, the Board of Directors finds and determines that this Ordinance is consistent with the mandates of Senate Bill 407 and will result in water savings as provided for in Senate Bill 407.

WHEREAS, the District has the power to perform all acts necessary to carry out fully the provisions of the County Water District Law (Water Code Section 31001), may establish rules and regulations for the distribution and use of water supplies (Water Code Section 31024), may adopt and enforce a comprehensive water conservation program to reduce potable water consumption and conserve supplies (Water Code Section 375), and may require as a condition of new service, that reasonable water-saving devices and water reclamation devices be installed to reduce water use (Water Code Section 1009 and 31035).

WHEREAS, the District has followed the procedures for notice, public participation and adoption set forth in Section 375 of the California Water Code.

WHEREAS, the Board of Directors finds and determines that the more restrictive building standards for water conserving fixtures provided for in this Ordinance are reasonably necessary because of local climatic, geological or topographical conditions.

WHEREAS, the Board of Directors finds and determines that this Ordinance is not subject to the California Environmental Quality Act (Public Resources Code Section 21000 et seq.) ("CEQA") pursuant to Section 15307 (the activity assures the maintenance, restoration, enhancement, or protection of a natural resource) and Section 15378(b)(2) (the activity is not a project as it involves general policy and procedure making) of the State CEQA Guidelines, California Code of Regulations, Title 14, Chapter 3, since it makes and implements policies and procedures for ensuring that water resources are conserved by reducing water consumption through the use of water efficient indoor plumbing fixtures.

WHEREAS, the adoption and enforcement of this Ordinance is necessary to manage the Coastside County Water District's potable water supply in the short and long-term and to avoid or minimize the effects of drought and shortage within the Coastside County Water District's service area. This Ordinance is essential to ensure a reliable and sustainable minimum supply of water for the public health, safety and welfare.

NOW, THEREFORE, THE BOARD OF DIRECTORS DOES ORDAIN AS FOLLOWS:

### I. Title

THIS ORDINANCE shall be known as the **Coastside County Water District Indoor Water Use Efficiency Ordinance**.

### II. Coordination with the Plumbing Code

The District acknowledges that it is not legally empowered to adopt or enforce the code of rules and regulations printed in one volume and published by the International Association of Plumbing and Mechanical Officials, under the title "California Plumbing Code, 2007 Edition," and the appendices printed therein, and all supplements subsequently issued thereto, hereinafter collectively called the "Plumbing Code," prescribing regulations for the installation of all plumbing fixtures. However, the District intends to implement the measures provided for in this Ordinance in connection with an application for new or expanded water service.

### III. Applicability

- A. The provisions of this Ordinance shall apply to the following projects requiring new or expanded water service:
  - 1. All new construction;
  - 2. Any remodel;
  - 3. Existing construction or existing development.
- B. The provisions of this Ordinance shall not apply to:
  - 1. Existing buildings not seeking new or expanded water service;
  - 2. Registered local, state or federal historical sites;
  - 3. Remodels where, in the discretion of the District's Superintendent, the unique configuration of the building, its drainage system or portions of the public sewer, or both, are incompatible with efficiency standards listed in the Indoor Water Use Efficiency Table and require a greater quantity of water to flush the system in a manner that is consistent with public health.

## IV. Definitions

- A. "certified professional" means a licensed contractor, licensed architect or licensed professional engineer.
- B. "dedicated irrigation meter" means a meter installed to provide water for irrigation purposes only.
- C. "District" means Coastside County Water District.
- D. "Energy Star Qualified" means that a given fixture meets the United States Environmental Protection Agency standard for an energy efficient product.
- E. "gal/cycle" means gallons per cycle.
- F. "gal/100 lbs ice" means gallons per hundred pounds of ice.

- G. "gpf" means gallons per flush.
- H. "gpm" means gallons per minute.
- I. "water factor" means the number of gallons per cycle per cubic foot that a clothes washer uses.
- J. "individual meter" means a metered service connection serving one dwelling unit, one commercial unit or one landscaped area by an individual account with the District.
- K. "local agency" means a city or county, including a charter city or charter county, or water district that is responsible for adopting and implementing the Ordinance. The local agency is also responsible for the enforcement of this Ordinance, including but not limited to, in the case of a city or county, approval of a permit and plan check or design review of a project; and in the case of a district, approval of a new or expanded water service application.
- L. "LSI" means Langlier Saturation Index providing an indication of the degree of saturation of water with respect to calcium carbonate related to cooling tower efficiency.
- M. "local water purveyor" means any entity, including a public agency, city, county, or private water company that provides retail water service.
- N. "master meter" means an individual metered service connection serving multiple residential or multiple commercial units by an individual account with the District.
- O. "mixed use" means a parcel or building used for both commercial and residential purposes.
- P. "new or expanded water service" means a new connection or an increase in existing capacity for an existing connection.
- Q. "permit" means the document issued by local agencies in connection with new construction, remodels or renovations and which authorizes the lawful initiation of construction, improvements or repairs to a building or structure.
- R. "project applicant" means the individual or entity submitting an Indoor Water Use Efficiency Checklist as required under Section VII, and requesting a permit, plan check, design review, or new or expanded water service application from the local agency. A Project applicant may be the property owner or his or her designee.
- S. "RMF" means residential multi-family.
- T. "sq. ft." means square feet.
- U. "toilet" means toilet tank, toilet valve, and toilet bowl.
- V. "urinal" means urinal porcelain and urinal valve.

### V. Minimum Indoor Fixture Requirements

All projects requiring new and expanded water service will have, at a minimum, fixtures that comply with the efficiency standards listed below (the "Indoor Water Use Efficiency Table"):

Fixture	Residential	Non-Residential					
Toilets	≤ 1.28 gpf, and ≥ 350 grams	≤ 1.28 gpf, and ≥ 350 grams					
Urinals	≤ 0.5 gpf	≤ 0.5 gpf					
Showers	≤ 2.0 gpm at 80 psi	≤ 2.0 gpm at 80 psi					
Bathroom faucets	≤ 1.5 gpm at 60 psi	≤ 0.5 gpm at 60 psi					
Kitchen/Utility faucets	≤ 2.2 gpm at 60 psi	≤ 2.2 gpm at 60 psi					
Clothes washers	≤ 6.0 Water Factor	≤ 6.0 Water Factor					
Dishwashers	≤ 6.5 gal/cycle or Energy Star Qualified	Energy Star Qualified					
Cooling towers	<ul> <li>≥ 5 cycles of concentration</li> <li>or</li> <li>≥ 2.5 LSI</li> </ul>	<ul> <li>≥ 5 cycles of concentration</li> <li>or</li> <li>≥ 2.5 LSI</li> </ul>					
Food steamers	-	Boiler less, or Self-contained					
Ice machines		≤ 25 gal/100 lbs ice or Air-cooled					
Pre-rinse spray valves	-	≤ 1.15 gpm at 60 psi					
Automatic vehicle wash facilities		≥ 50% of water recycled on site					
Commercial refrigeration	-	Closed loop or Air-cooled					
All fixtures and appliances must be manufactured to meet specifications. Flow							

## INDOOR WATER USE EFFICIENCY TABLE

All fixtures and appliances must be manufactured to meet specifications. Flow restrictors and other after market modifications will not be accepted as compliant.

### VI. Metering

All projects requiring new and expanded water service shall comply with the following metering requirements:

A. If the project includes landscaped area greater than or equal to 5,000 square feet, the applicant shall install a separate dedicated irrigation meter.

- B. If the project is a mixed use development, the applicant shall install an individual meter for each separate use, including a dedicated irrigation meter to serve the landscape.
- C. If the project involves a RMF (Residential Multi-Family) development, the applicant shall install an individual meter for each dwelling unit. In addition, the applicant shall install an individual meter for the common area and a dedicated irrigation meter shall be installed to serve the landscape.
- D. If the project involves a commercial multi-unit development, the applicant shall install an individual meter for each unit and the applicant shall install a dedicated irrigation meter to serve the landscape.
- E. Master meter service connections may be installed only for multiple residential units or multiple commercial units that satisfy all of the following conditions:
  - 1. all of the units are within one building, and;
  - 2. the building is three or more stories in height, and;
  - 3. the parcel and the building are owned by one legal entity, and;
  - 4. the parcel is served by a dedicated irrigation meter.

### VII. Compliance with Ordinance

- A. The District shall:
  - 1. Provide the project applicant with the Ordinance and the Indoor Water Use Efficiency Checklist requirements when it provides the applicant with the procedures for new or expanded water service applications;
  - 2. Review the Indoor Water Use Efficiency Checklist submitted by the project applicant;
  - 3. Approve or deny the project applicant's Indoor Water Use Efficiency Checklist submittal;
  - 4. Only upon approval of the Indoor Water Use Efficiency Checklist, approve a new or expanded water service application for the project applicant;
  - 5. In its discretion, inspect the installation of the water efficient fixtures and appliances to verify that they have been installed and are performing at the required use levels; and
  - 6. Submit a copy of the complete Indoor Water Use Efficiency Checklist to the land use authority.
- B. The project applicant shall:

- 1. Meet the minimum water use efficiency standards for indoor fixtures and appliances provided for in the Indoor Water Use Efficiency Table and Checklist.
- 2. Comply with the District's regulations regarding water service, water service extensions, water system improvements, engineering and construction standards and approved materials.
- 3. Comply with the District's fee and rate schedule.
- 4. Prior to construction, submit all portions of the Indoor Water Use Efficiency Checklist to the District for verification.
- 5. Allow District staff access to inspect property for compliance with District regulations.

### VIII. Components of the Indoor Water Use Efficiency Checklist

The Indoor Water Use Efficiency Checklist shall require, at a minimum:

- A. Project Information;
- B. Quantity and unit water use factors of all indoor fixtures and appliances relative to the standards listed in the Indoor Water Use Efficiency Table and Checklist;
- C. Construction drawings showing type, location and layout of plumbing fixtures, appliances and meters.
- D. Contain the following statement to be completed by the project applicant: "I certify that the subject project meets the specified requirements of the Indoor Water Use Efficiency Ordinance"; and
- E. Bear the signature of the project applicant, or that of a certified professional.

## IX. Penalties and Enforcement

Failure to comply with the requirements of this ordinance or a violation of this ordinance is determined to be waste or unreasonable use or unreasonable method of use of water.

A. Notice of Correction and Notice of Violation.

It is unlawful for any person, firm, partnership, association, or corporation subject to the requirements of this Ordinance to fail to comply with the water use efficiency requirements or to alter or replace the fixtures and appliances required by this Ordinance with other noncompliant fixtures or appliances after the completion of construction or remodel. Whenever the District Superintendent determines that a violation of this Ordinance has occurred, the District Superintendent may serve a notice of correction on the owner(s) of the property on which the violation is situated. The applicant or owner(s) of record shall have sixty (60) days to take corrective action. A notice of violation shall be issued after sixty (60) days, from the date of the notice of correction, if the violation has not been corrected.

B. Enforcement.

If an applicant or owner(s) of record for new or expanded water service fails to comply with the provisions of this Ordinance, the District may require the applicant or owner(s) of record to resubmit its water service application and revised Indoor Water Use Efficiency Checklist for approval and will withhold approval of the application until the applicant or owner(s) of record complies with the terms of this Ordinance.

- If the applicant or owner(s) of record with an installed water service fails to comply with this Ordinance, and fails to correct any violation within sixty (60) days of the notice of correction from the District, the District may require the installation of a flow restricting device(s) until compliance is achieved. The applicant or owner(s) of record will be charged for the installation and removal of the flow restricting device(s), so the District may recover the costs incurred from enforcement.
- 2. If the applicant or owner(s) of record with an installed water service fails to comply with this Ordinance, and fails to correct any violation after ninety (90) days of the notice of correction from the District, the District may suspend water service by locking or removing the water meter until compliance is achieved. The applicant or owner(s) of record will be charged for suspending and restoring water service.
- 3. If the applicant or owner(s) of record with an installed dedicated irrigation water service fails to comply with this Ordinance, and fails to correct any violation within sixty (60) days of the notice of correction from the District, the District may suspend water service by locking or removing the water meter until compliance is achieved. Irrigation is not a necessary water service for health and safety. The applicant or owner(s) of record will be charged for suspending and restoring water service.
- 4. In addition to any other remedy provided herein, the District may also refer enforcement of violations under this Ordinance to the City Attorney, County Counsel or District Attorney of the jurisdiction where the violation occurred.

### X. Public Education

The District shall provide information to all applicants regarding the installation of water efficient fixtures and appliances.

### XI. Severability

If any section, subsection, provision or part of this Ordinance, or its application to any person or circumstance, is held to be unconstitutional or otherwise invalid, the remainder

of this Ordinance, and the application of such provision to other person or circumstances, shall not be affected thereby and shall remain in full force and effect and, to that end, the provisions of this Ordinance are severable.

### XII. Effective Date

This Ordinance shall become effective on January 1, 2011.

PASSED AND ADOPTED at a regular meeting of the Board of Directors of the Coastside County Water District held on (INSERT DATE) by the following vote:

## **STAFF REPORT**

То:	Coastside County Water District Board of Directors
From:	David Dickson, General Manager
Agenda:	April 13, 2010
Report Date:	April 8, 2010
Subject:	Draft Fiscal Year 2010-2011 Budget and Draft Fiscal Year 2010/11 to 2019/20 Capital Improvement Program

## **Recommendation:**

No Board action required at this time.

## Background:

Staff presents for the Board's review the attached Draft Fiscal Year 2010-2011 Budget and Draft Fiscal Year 2010/11 to 2019/20 Capital Improvement Program (CIP). Highlights:

<u>Budget</u>

- Total operating expense increase of 1.2% over FY10 budget, 2.5% over projected year-end FY10 expenses.
- Non-operating revenue lower by 14% vs. FY10 budget, 46% vs. projected FY10 actual year-end revenue due to differences in connection sales, tax share.
- Recommended rate increase of 14% based on revenue required to fund CIP, maintain reserves based on multi-year financing model.
- Contribution to CIP and reserves (net revenue) of \$627,000.

## CIP

- \$21,433 total CIP (FY11 dollars)
- Increase of \$3 million over previous CIP due to increase in Denniston plant upgrade cost, investment in water supply development/reliability.

We have reviewed the CIP with the Facilities Committee on March 24 and the budget and CIP with the Finance Committee on April 7 and have incorporated their comments. Based on the Finance Committee's recommendation, staff will schedule a public budget workshop with the full Board for a detailed presentation and comprehensive discussion of the proposed budget and CIP.

## Fiscal Impact:

None.

### Budget Worksheet

# Fiscal Year 2010/2011

Line Item	<u>Amount</u>				
Acct. No.	4120		Description: Water Sales		
Actual Amount As Of:	31-Mar	2010	4,174,443		
PROJECTED ACTIVITY t	1,246,912				
Projected YEAR END TO	5,421,355				
PROPOSED Line Item Amount: \$6,180,345					

## Approved Line Item Amount:

PREVIOUS YEAR BUD	5,844,903	
% Change Actual Year End compared to Proposed Line item amount.		14.0%
% Change to Previous Year	5.7%	
Dollar difference between proposed budget & current budget		335,442
NARRATIVE:	See Worksheet 4120 A for calculations	

Water sales revenues are not expected to increase during the next fiscal year due to new customers coming on line. The projection is that there will be approximately 35 new connections Increased Consumer awareness in the thrid year of drought will keep consumption to levels seen in FY 09/10.

### Spread:

Jul	Aug	Sep	Oct	Nov	Dec	Totals
Jan	Feb	Mar	Apr	Мау	Jun

### FACTORS TO BE CONSIDERED

1 Superintendent projects a 40 MG purchase from Skylawn for next fiscal year

2 Anticipation of approximately 35 new connections next year.

**3** April - June - Predicted Base on following:

Actual Sales / Predicted Sales (Jul - Feb)

Residential = 0.91

Other = 1.242

Budgeted Values for Residential & Other Above multiplied by factor to get predicted water sales.

			Base		<u>10.0%</u>
			Charge	FY 08/09	FY 09/10
Res		%	5/8"	\$21.87	\$24.06

NARRATIVE:	

Water is taken from designated fire hydrants through portable meters for a variety of reasons. The most common use of this water is for new construction (dust control, earth compaction,etc.). Other uses of water through portable meters result in use for temporary irrigation, failed wells, temporary livestock watering, dust control for non construction purposes, festivals, etc.

PREVIOUS YEAR BUDGET:	60,650
% Change Actual Year End compared to Proposed Line item amount.	46.1%
% Change to Previous Year Budget	52.5%
Dollar difference between proposed budget & current budget	31,850

#### NARRATIVE:

Increase funding due to:

- 1. Rebates for toilets and washing machines is being increased in anticipation of losing grant funding, increased rebate amounts and an increase in participation per BAWSCA's WCIP.
- 2. School education is being increased in anticipation of new BAWSCA sponsored outreach to more grade levels.
- 3. Funding for residential surveys is a new item in anticipation of outsourcing this program to comply with CUWCC BMP.
- 4. Low flow device funding is being increased to provide low flow spray rinse valves to restaturants as part of BAWSCA's WCIP.
- 5. Funds included to install water meter at 766 Main Street to comply with BMP's.
- 6. Funds included for Pilarcitos IRWMP implementation.
- 7. Funds included to produce 2010 UWMP, which is due December 2009.

#### Legend:

**BAWSCA** - Bay Area Water Supply and Conservation Agency

**BMP** - Best Management Practices

CUWCC - California Urban Water Conservation Council

*IRWMP* - Integrated Regional Watershed Management Plan

UWMP - Urban Water Management Plan

WCIP - Water Conservation Implementation Plan

STAFF REI	PORT
То:	Coastside County Water District Board of Directors via David Dickson, General Manager
From:	Joe Guistino
Agenda:	April 13, 2010
Report Date:	April 8, 2010
Subject:	Pilarcitos Canyon Blending Station Valve

**<u>Recommendation</u>**: Authorize Staff to award contract to Pump Repair Services for the purchase of a 12 inch electronically operated globe style control valve for the cost of \$26,323.42.

#### Background:

Our preferred source of San Francisco Public Utility Corporation (SFPUC) supply is the Pilarcitos Reservoir since it flows by gravity to the Nunes Water Treatment Plant (WTP) and does not incur any significant energy charges. We currently must switch to the Crystal Springs supply exclusively once the demand for water exceeds 1600 gallons per minute (gpm), even though there may be significant usable water remaining in Pilarcitos Lake. This valve will allow us to blend waters from the Crystal Springs source with the Pilarcitos Reservoir source. We will adjust the control settings so that only one small unit will run at Crystal Springs PS with the rest of the water made up from Pilarcitos until the Pilarcitos supply is exhausted for the season.

This mode of operation will reduce our energy costs incurred from Crystal Springs from multiple pumps (500 and 350 HP) starting many times throughout the day to one small unit running constantly. Estimated savings would be around 50,000 KWh/month during the summer months, which would translate to about \$8,000 at present energy rates.

The valve will be installed as part of a larger blending station project which Kennedy Jenks has designed and which we will put out to bid in April.

We solicited for bids from HiDek, Pump Repair and Roberts and Brune for purchase of this valve with the following results:

Pump Repair	\$26,323.42
Roberts and Brune	\$26,710.53
HyDec Corp.	\$32,992.16

**Fiscal Impact:** There is \$100,000 remaining in this fiscal year for this project.

#### **STAFF REPORT**

To: Coastside County Water District Board of Directors

From: David Dickson, General Manager

Agenda: April 13, 2010

Report Date: April 7, 2010

Subject: General Manager's Report

#### **Recommendation:**

None. Information only.

#### **Background:**

For this month's report, I would like to highlight the following:

#### 1. SFPUC Rate Study

As required under the terms of the District's individual agency Water Sales Contract, SFPUC will perform a rate study to determine whether CCWD should receive a lower rate for untreated water. We have scheduled an initial meeting with SFPUC staff and their rate consultant for April 12 at the District office. Reed Schmidt of Bartle Wells, who will assist the District in guiding and reviewing the rate study, will attend.

#### 2. Water Reclamation Update

There's no progress to report with regard to developing a recycled water agreement between SAM and CCWD. We are waiting for SAM to respond to the principles of agreement the CCWD Board approved on February 9, 2010. The SAM Board may consider the principles at their meeting on April 26.

## Monthly Report

То:	David Dickson, General Manager
From:	Cathleen Brennan, Water Resources Analyst
Agenda:	April 13, 2010
Subject:	Water Shortage and Drought Contingency Planning

This report is provided as an update on the implementation of the Water Shortage and Drought Contingency Plan – Stage 1 (Advisory Stage). The Advisory Stage was implemented in June of 2007. In June of 2008, Governor Schwarzenegger declared a state - wide drought. On February 27, 2009, Governor Schwarzenegger proclaimed a state of emergency due to drought conditions and the resulting water shortage.

#### $\sqrt{}$ Local Precipitation Records by Water Year.

- Water year 2007 was critically dry at 67% of annual historic average.
- Water year 2008 was dry at 72% of the annual historic average.
- Water year 2009 was dry at 78% of annual historic average.
- Water year 2010 started on October 1, 2009. Local precipitation is at 80% of normal to date.

Precipitation for Half Moon Bay													
	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Total
Historic													
Average	1.3	3.4	3.7	5.5	4.8	3.9	1.6	0.6	0.2	0.0	0.1	0.3	25.4

Water Year 2007	0.2	3.2	4.2	0.7	5.3	0.8	1.6	0.4	0.1	0.3	0.0	0.2	17.0

## $\sqrt{}$ San Francisco Public Utilities Commission

- March was less than normal in terms of precipitation, but the first five days of April have added 10 inches of snow in the Hetch Hetchy watershed.
- There is ample water for the three upcountry SFPUC reservoirs and Don Pedro Reservoir is expected to be near full this year.
- Local SFPUC reservoirs are also in good shape, after the most recent storms.

For more information regarding precipitation and storage levels for the Hetch Hetchy System, please refer to the <u>San Francisco Public Utilities Commission Hydrological</u> <u>Conditions Report for March 2010</u>, in the Board packet.

## √ State Water Project

The Department of Water Resources announced that the northern Sierra snow water equivalent at 126 percent of normal to date, central Sierra at 92 percent, and southern Sierra at 105 percent. Lake Oroville, the principal water storage reservoir for the State Water Project, is recovering slowly after three consecutive dry years. It is at 47 percent of capacity, or 60 percent of normal to date.

After three consecutive years of drought and regulatory restrictions on pumping water from the Delta to protect fish species, there will be less than normal water deliveries to farms and communities throughout the state.

The Department of Water Resources is predicting that it will take a couple of consecutive wet years to bring storage levels and runoff back to normal. Mark Cowin, Director of the Department of Water Resources, emphasized the need for the implementation of long-term solutions to improve water supply reliability. The Department of Water Resources and the Association of California Water Agencies will continue to promote the Save Our Water campaign.

## **MONTHLY REPORT**

То:	David Dickson, General Manager
From:	Joe Guistino, Superintendent of Operations
Agenda:	April 13, 2010
Report Date:	April 6, 2010

#### **Monthly Highlights**

Unidirectional Flushing Program

The crews competed 3 full weeks of flushing in the El Granada area with only two water quality complaints.

#### Denniston Filter Underdrain Breakdown

ERS completed all repairs to the Denniston WTP under drain system. We expect the plant to be back on line by 12 April.

#### Nunes Short Term Improvement Project

KG Walters staged their temporary offices at Nunes WTP on 1 March. They have staked out the caustic and polymer storage areas and have started on the respective containment systems.

#### Source of Supply

Pilarcitos Reservoir and the Pilarcitos Wells were the major source of supply for the month of March.

#### Systems Improvement

<u>Beautification</u> Painted J boxes on the upper deck at Nunes Water Treatment Plant (WTP) Painted new check valves at Crystal Springs Pump Station (PS) The landscaping that was disturbed at El Granada Tank 1 and Miramar Tank for their respective projects was replaced.

#### Nunes WTP Filter Orifice Plates

The crews completed installation of the orifice plate in Filter 4 at Nunes WTP. The construction design by John Davis worked as planned with no problems or leaks. The plant was shut down for 5.5 hours to do the job. The other three filters will be complete by the end of May.

#### Nunes WTP Septic System

As reported last month, the Nunes WTP septic system was located and cleaned out. This month the Treatment Staff made improvements to the access hatch to facilitate easier cleanout and location in the future.

#### Unidirectional Flushing Program

The crews competed 3 full weeks of flushing in the El Granada area. The flushing operation went very well, with the crews establishing effective sedimentation control and dechlorination. We received 2 calls on discolored water that were immediately and satisfactorily resolved. The crews will finish up El Granada and Princeton in April. We will flush Half Moon Bay next winter.

#### New PLC at Crystal Springs

We have hired CalCon to replace the RUGID control system at Crystal Springs Pump Station (PS) with a PLC based system. The RUGID system was damaged in the January storms and could not be repaired. The new PLC will dovetail nicely with the SCADA system upgrades, which are presently in design.

### Update on Other Activities:

#### Denniston Filter Underdrain Breakdown

ERS completed all repairs to the Denniston WTP under drain system. The filters now backwash properly and the filters were found to need extensive backwashing to clean the material accumulated in the media. We expect the plant to be back on line by 12 April.

#### Denniston Creek Biological Survey

Jim Steele has continued to amass well, flow and dye study data that will aid us in establishing our licence agreement to Denniston Creek. We will meet for an update in April.

#### Safety/Training/Inspections/Meetings

Meetings Attended

4 March – Met with Jim Steele and Dave Dickson to discuss Denniston Creek strategy for water rights renewal with the California Water Resources Control Board (CWRCB).

8 March – Met with Crosno Construction and CSI to discuss completion of the Miramar Tank Project.

8 March - Short Term Improvement (STI) progress meeting.

10 March - Met with Dave Meir to discuss water supply needs for the new Senior

Center and Adult Daycare Center presently in design.

10 March – Attended the Safety Committee meeting.

22 March – Met with the California/Nevada Section AWWA Top Ops Committee in

Oakley, CA to plan the Top Ops Competition on 30 March.

24 March - Facility Committee meeting.

29 March-1 April – Attended the Cal/Nev Section American Water Works Association (AWWA) Spring Conference in Hollywood, California

> -participated in the Research, Water Treatment, Water Quality and Laboratory Analyst committees in the Water Quality Division and the Top Ops committee in the Operators Division.
> -moderated the 19<sup>th</sup> annual Top Ops Competition
> -assisted in the moderation of the annual Meter Madness and Hot Tap competitions
> -attended presentations on unidirectional flushing, regulatory updates, corrosion control, tank maintenance and backflow programs.

#### Safety Equipment

-We have purchased individual lanyards to protect the crew when climbing ladders that lack adequate fall protection.

-We have purchased spill kits for the treatment plants to allow quick and efficient response to any chemical spill.

#### Safety Meeting and Training

This month's training was on insects and other environmental hazards. Duffy, Twitchell, Davis, Bruce, Patterson, Donovan and I were in attendance.

#### Training

Treatment/Distribution Operator Matt Damrosch and Maintenance Worker Ray Winch attended a leak detection and unmetered water class in Watsonville on 24 March.

#### Temporary Maintenance Worker

Bruce Merlo started as temporary maintenance worker on Monday, 29 March. His primary duties will be vegetation control, painting, meter reading and assist on emergency repairs.

### **Department of Public Health (DPH)**

Long Term 2 Enhanced Surface Water Treatment Rule

March finds the completion of the 2 years of giardia/cryptosporidium sampling of our source waters. We have submitted our reports to the DPH and now await their response.

### Projects

#### Tank Recoating Projects

Miramar Tank – The contractor has installed the PAX mixer and disinfected the interior of the tank. High VOC fumes are still of concern. We had the contractor install a ventilation system for 8 days but the fumes are still persistent. The painting inspectors have met with the paint manufacturer and contractor and has decided that another week of forced ventilation, this time across the floor, should remove any more fumes that could possibly bleed into the water. The tank is scheduled to be

filled to 4 feet on Wednesday, 14 April. We will soak the tank for 5 days to determine if any taste and odor has perpetrated into the water. If all is clear, we will fill the tank to the top and test for VOCs and bacteriology.

#### Denniston Treatment Improvements

Staff has reviewed the 30% design submittals for this project and has turned it over to the consultants for completion.

#### Nunes Filters 3&4 Media Replacement

Filter #4 was completed, disinfected and brought on line in March. It is working better than expected and brings this project to completion.

#### Cell Tower Sites

*Verizon* – Verizon has mitigated all ponding and erosion issues associated with the installation of their tower and ancillary equipment at the Nunes WTP tank farm.

*AT&T/Team Mobile* – We have spoken with the home owner adjacent to our property at El Granada Tank 1 and he will be pursuing a further alteration to the lot line adjustment. Once completed and adequately described, we will review it and, if in agreement, bring it before this board for review and approval.

#### Nunes Short Term Improvement Project

KG Walters staged their temporary offices at Nunes WTP on 1 March. They have staked out the caustic and polymer storage areas and have started on the respective containment systems.

#### Nunes Flocculator Drives

The 3 new flocculator drives have been bolted in place. The blades will be installed in April. The old drives have been removed from the deck and will either be recycled or scrapped.

#### Crystal Springs Check Valve Replacement Project

Pump Checks-The check valve for unit P3 was taken by Pump Repair to have rebuilt.

*Main Check-* The vault lid was removed and the new main check valve was installed on 17 March. We have reviewed the 90% submittal for the design of the new vault lid and found it to be well designed and thought out. The design will be complete in April. Maintenance Supervisor John Davis sustained a small laceration on his head during the installation process. He has seen a physician and there was no lost time accident.

#### **Pilarcitos Blending Station**

We had received the 100% design and specification documents for the blending station valve and they were submitted to available suppliers for competitive bidding.

We have reviewed the 90% submittal for the installation and construction specifications and submitted them back to the consultant for completion. We have also submitted a notice of exemption to San Mateo County Planning for this project.

#### Canada Cove Fire Valve

The contractor hired by Canada Cove has potholed and located all water lines that will be modified or tapped for this project. The project should be complete by mid May.
