HALF MOON BAY, CA 94019

SPECIAL MEETING OF THE BOARD OF DIRECTORS

Tuesday, June 28, 2011 - 7:00 p.m.

AGENDA

- 1) ROLL CALL
- 2) PUBLIC COMMENT

Members of the public may address the Board of Directors on the items on the agenda for this special meeting. The Chair requests that each person addressing the Board complete and submit a speaker slip, and limit their comments to three (3) minutes.

- 3) FISCAL YEAR 2011-2012 BUDGET, FISCAL YEAR 2011/12 TO 2020/21 CAPITAL IMPROVEMENT PROGRAM, JUNE 2011 WATER FINANCING PLAN UPDATE, RESOLUTION AMENDING THE RATE AND FEE SCHEDULE (attachment)
 - A. Staff Presentation
 - a. Fiscal Year 2011-2012 Budget
 - b. Fiscal Year 2011/12 to 2020/21 Capital Improvement Program
 - c. June 2011 Water Financing Plan Update
 - d. Proposed Amendment to Rate and Fee Schedule
 - B. **Public Hearing** to consider proposed Amendment of Rate and Fee Schedule to increase water rates up to 15% and consideration of Resolution 2011-13 A Resolution of the Board of Directors of the Coastside County Water District Amending the Rate and Fee Schedule to Increase Water Rates
 - C. Board Comments / Board Action
 - Adoption of Resolution 2011-13 A Resolution of the Board of Directors of the Coastside County Water District Amending the Rate and Fee Schedule to Increase Water Rates

- Acceptance of June 2011 Water Financing Plan Update prepared by Bartle Wells Associates.
- Approval of Fiscal Year 2010-2011 Operations and Maintenance Budget and Capital Improvement Program for Fiscal Years 2010-2011 through 2019-2020

4) ADJOURNMENT

<u>Accessible Public Meetings</u> - Upon request, the Coastside County Water District will provide written agenda materials in appropriate alternative formats, or disability-related modification or accommodation, including auxiliary aids or services, to enable individuals with disabilities to participate in public meetings. Please send a written request, including your name, mailing address, telephone number and brief description of the requested materials and preferred alternative format or auxiliary aid or service at least two (2) days before the meeting. Requests should be sent to: Coastside County Water District, Attn: Alternative Agenda Request, 766 Main Street, Half Moon Bay, CA 94019.

STAFF REPORT

To: Coastside County Water District Board of Directors

From: David Dickson, General Manager

Agenda: June 28, 2011

Report

Date: June 24, 2011

Subject: Public Hearing to Consider Proposed Amendment of Rate and

Fee Schedule to Increase Water Rates Up To 15%, Consideration of Resolution 2011-13 Amending the Rate and Fee Schedule, Acceptance of June 2011 Water Financing Plan Update, Approval of Fiscal Year 2011-2012 Budget and Fiscal Year 2011/12 to 2020/21

Capital Improvement Program

Recommendation:

1) Conduct a public hearing on a water rate increase of up to 15% on commodity charges and base charges.

- 2) Take actions as follows:
 - a) Adopt Resolution No. 2011-13 Amending the Rate and Fee Schedule (Exhibit A).
 - b) Accept the June 2011 Water Financing Plan Update prepared by Bartle Wells Associates
 - c) Approve the Fiscal Year 2011-2012 Operations and Maintenance Budget and the Fiscal Year 2011/12 to 2020/21 Capital Improvement Program.

Background:

Staff has reviewed the draft Operations and Maintenance Budget (Exhibit B) and Capital Improvement Program (CIP, Exhibit C) at several meetings with the District's Finance and Facilities Committee members. The draft budget and CIP have also been reviewed in detail with the full Board of Directors at a public budget work session conducted on June 7, 2011, and discussed at the regular monthly Board meetings held on March 8, April 12, May 10, and June 14, 2011.

Staff has also discussed with the Board the need for a rate increases to meet operation and maintenance revenue requirements and to finance the CIP projects. The June 2011 Water Financing Plan Update prepared by Bartle Wells Associates (Exhibit D) recommends a rate increase of 12% for

STAFF REPORT

Agenda: June 28, 2011

Subject: Amendment of Rate and Fee Schedule

Page Two_

Fiscal Year 2011-2012. The proposed rate increase is necessitated by a number of factors, primarily:

1. An increase of 26% in wholesale water rates from the San Francisco Public Utilities Commission.

2. Financing costs for the Denniston Creek Water Treatment Plant Improvements Project and other elements of the Capital Improvement Program.

The District has complied with the public notice requirements of Proposition 218. Two ads were placed in the May 18th and May 25th editions of the Half Moon Bay Review, and the notice was placed on the District's website. Additionally the Board mailed a copy of the notice of this public hearing and the proposed rate increase to all District customers on May 13, 2010 (Exhibit E).

Proposition 218 specifies that the District may not adopt the proposed rate increase if written protests are received from a majority of owners of affected parcels, or approximately 3,300 District customers. As of the date of this report, staff has received a petition signed by approximately 110 property owners and fifteen (15) letters regarding the proposed rate increase. Copies of the petition and letters are attached as Exhibit F.

EXHIBIT A

RESOLUTION 2011-13 AMENDING THE RATE AND FEE SCHEDULE

RESOLUTION NO. 2011-13

A RESOLUTION OF THE BOARD OF DIRECTORS OF THE COASTSIDE COUNTY WATER DISTRICT AMENDING THE RATE AND FEE SCHEDULE TO INCREASE WATER RATES

THIS RESOLUTION IS ADOPTED with reference to the following facts and circumstances which are found and declared by the Board of Directors:

- 1. The General Manager and Finance Committee, during consideration and preparation of the budget for Fiscal Year 2011-2012, determined that at current rates and projected levels of water sales and expenses, the District's annual expenses are expected to significantly exceed revenues. California Water Code Section 31007 authorizes the District to establish rates and charges to yield an amount sufficient to pay operating expenses, to provide for repairs and depreciation of works owned and operated by the District, to pay interest on bonded debt, and to provide a fund to pay principal on bonded debt.
- 2. The District's financial consultant, Bartle Wells Associates, prepared an August 2009 Water Financing Plan and a June 2011 Water Financing Plan Update (collectively, "Financing Plan") that analyzed the District's revenue requirements, provided a recommendation for increasing the water rates, and established a rationale for the increased charges. The Financing Plan is incorporated into this Resolution by this reference.
- 3. The anticipated increases in expenses are attributable to a number of factors including but not limited to, a 26% increase in the cost of water supplied by the San Francisco Public Utilities Commission, increased costs associated with compliance with regulatory requirements, increased community outreach for water awareness and conservation, payment of debt service for financing of necessary capital improvements and replacement of aging facilities, and higher costs for personnel, materials and services.
- 4. On May 10, 2011, the Board of Directors at a regular meeting evaluated the proposed modifications to the District's Rate and Fee Schedule and set a public hearing for June 28, 2011 to consider the modifications to the District's Rate and Fee Schedule.
- 5. The District prepared a notice that described the amounts, the basis for calculating, and the reasons for the increased rates and charges, and identified the date, time, and location for the public hearing on the increased rates and charges, and the procedures for submitting a protest. The District mailed the written notice to the property owners and customers in the District at least 45 days before the date of the public hearing.
- 6. The Board considered its options for responding to this situation at a public hearing at which the specific rate proposal enacted herein was addressed. Notice of the public hearing was

provided to each parcel subject to the proposed rate increase. Notice of the public hearing was also advertised in the May 18, 2011 and May 25, 2011 editions of the Half Moon Bay Review newspaper. Additionally, the notice was placed on the District's website. At the public hearing, the Board of Directors considered all protests against the proposed rate modification, and written protests against the proposed rate increase were not presented by a majority of owners of the parcels subject to the proposed rate increase.

- 7. After discussion and consideration of the comments received at the public hearing, the Board finds the rates hereinafter set forth to be reasonable and required for the proper operation of the District.
- 8. The Board further finds that the amount of the rates hereinafter set forth does not exceed the amount of the estimated costs required to provide the services for which the rates are levied.
- 9. The Board further finds that the increases in rates effected by this Resolution are reasonable and required for the proper operation of the District, and are exempt from the California Environmental Quality Act, pursuant to Section 21080(b)(8) of the Public Resources Code, because they are for the purposes of (1) meeting operating expenses, (2) purchasing or leasing supplies, equipment and materials, (3) meeting financial reserve requirements, and (4) obtaining funds for capital projects necessary to maintain service within existing service areas.

NOW, THEREFORE, BE IT RESOLVED by the Board of Directors of the Coastside County Water District as follows:

1. Section 1.A., Base Charge, of the Rate and Fee Schedule, is amended to read as follows:

"A. BASE CHARGE

The following base charge is the minimum charge to be paid by all customers on a bi-monthly basis:

Meter Size	Bi-Monthly Base Charge
5/8 inch	\$ 30.72
5/8 inch for 2 dwelling units	\$ 67.57
3/4 inch	\$ 46.18
3/4 inch for 2 dwelling units	\$ 92.41
1.0 inch	\$ 76.97
1.5 inch	\$ 148.64
2.0 inch	\$ 246.34
3.0 inch	\$ 538.90
4.0 inch	\$1,847.89

2. Section 1.B, Quantity Charge, of the Rate and Fee Schedule is hereby amended to read as follows:

"B. QUANTITY CHARGE

In addition to the bi-monthly base charge set forth in Section 1.A, the following quantity charges shall be paid per one hundred cubic (hcf) of water delivered:

1. Residential Customers

	Use Tiers	Bi-Monthly Water Consumption Charge
	1 - 8 Units	\$5.02
	9 - 25 Units	\$5.53
	26 – 40 Units	\$7.19
	41 or more Units	\$8.88
2.	Other - Water Rate Schedule	\$6.83 per unit
3.	Fire Detector Check Valve	\$6.72 per inch

Residential Customers, for purposes of this Section 1.B, are single family homes, duplexes, condominiums, townhouses and all apartment buildings with individual meters for separate residential dwelling units. Apartment houses with a single "master meter" measuring consumption within multiple dwelling units are not "Residential Customers" for purposes of this Section 1.B."

4. Section 3.D, Portable Meters, of the Rate and Fee Schedule, is hereby amended to read as follows:

"D. PORTABLE METERS

Customers requesting water service through portable meters shall pay:

- A deposit in an amount, as estimated by the General Manager, equal to the replacement cost of the meter.
- 2. A bi-monthly rental charge of \$71.67.
- 3. In addition, customers using portable meters shall pay quantity charges pursuant to Section 1.B.2. (All Other Customers)."
- 5. This Resolution shall be effective for meter readings after July 1, 2011, and any billing for the current billing cycle as of the effective date shall be pro-rated.

- 6. The General Manager shall arrange for the Rate and Fee Schedule to be re-codified to incorporate the changes effected by this Resolution.
- 7. The General Manager is directed to file a Notice of Exemption with the County Clerk and to take such other actions as may be necessary to give effect to this Resolution.

ASSED AND ADOPTED THIS 28th day of	June, 2011, by the following vote of the Board:
AYES:	
NOES:	
ABSENT:	
	COASTSIDE COUNTY WATER DISTRICT
	Robert C. Feldman, President Board of Directors

FACTORS TO BE CONSIDERED

- Superintendent projects a 7.5 MG purchase from Skylawn for next fiscal year
- Anticipation of approximately 35 new connections next year. 2
- April June Predicted Base on following: 3 Actual Sales / Predicted Sales (Jul - Feb)

Residential = 0.91 Other = 1.242

Budgeted Values for Residential & Other Above multiplied by factor to get predicted water sales.

Water is taken from designated fire hydrants through portable meters for a variety of reasons. The most common use of this water is for new construction (dust control, earth compaction, etc.). Other uses of water through portable meters result in use for temporary irrigation, failed wells, temporary livestock watering, dust control for non construction purposes, festivals, etc.

Attn: Dave Dickson, General Manager

Re: Water Financing Plan Update 2011

Bartle Wells Associates is pleased to submit the attached Water Financing Plan Update 2011 for the Coastside County Water District. The updated report describes our financial analysis and rate adjustment recommendations.

The Districts is currently in good financial condition. The recommendations developed in the study are designed to support the long-term health of the District. Key recommendations include implementing future rate increases and to issue additional debt in 2013/14 to fund capital improvements.

We have enjoyed working with the District on this assignment and appreciate the cooperation and the assistance provided by District staff throughout the project. Please do not hesitate to contact us in the future if you have any questions about this study or other issues regarding water rates and finances.

Very truly yours,

BARTLE WELLS ASSOCIATES

BACKGROUND AND OVERVIEW

1.1 Background

1

In May 2011, the Coastside County Water District (CCWD or the District) requested Bartle Wells Associates (BWA) to update the District's long-term financial plan which was first completed in August 2009. The District is in the process of applying for a loan from the California Infrastructure and Economic Development Bank's (I-Bank) through the Infrastructure State Revolving Fund Program (ISRF) to fund capital projects. In anticipation of the loan, BWA has reviewed the District's water rates and finances to ensure that future revenues are adequate to fund long-term operating and capital expenditures. Key objectives of this update include:

- Conduct an independent analysis of the District's water rates and finances
- Develop 10-year financial projections incorporating long-term operating and capital funding needs
- Project future water rate increases that reflect the District's cost of providing service
- Evaluate various financing alternatives to fund capital projects in the future
- Phase in rate increases and/or rate structure modifications over time, to the extent possible, to help minimize the annual impact on ratepayers
- Establish prudent fund reserve targets

1.2 Overview of District

Coastside County Water District is a special district providing water services in the City of Half Moon Bay and parts of the unincorporated areas of San Mateo County including Miramar, Princeton by the Sea, and El Granada. The District serves more than 6,000 customers, who are predominantly residential.

CCWD's water supply comes from three sources: local groundwater, local surface water, and surface water supplied from the San Francisco Public Utilities Commission's (SFPUC) Hetch Hetchy water system. Historically, SFPUC has supplied about 80% of the District's water. The District projects that the proportion of SFPUC water will decrease as local source yields improve.

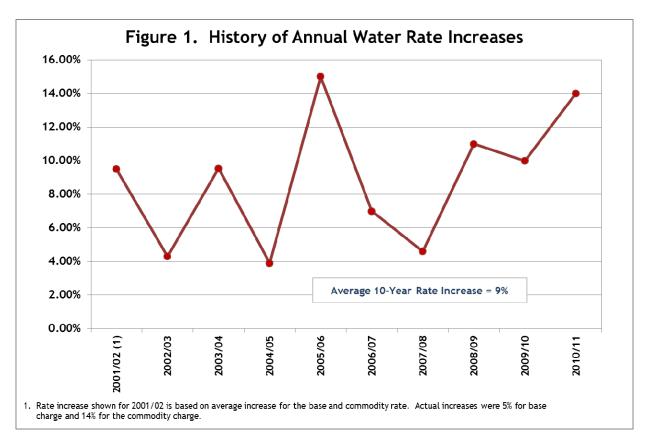

The District's total operating revenue for the FY 2011/12 is projected at approximately \$7.5 million with water sales revenue accounting for roughly 87% of all revenues. Operating expenses for FY 2011/12 are estimated at \$6.0 million, not including capital projects or debt service.

The District's current bi-monthly water rate structure is comprised of a base charge and a quantity charge. The base charge is the minimum charge paid by all customers and varies by

size of meter serving the customer. The quantity charge applies to the quantity of water delivered to the customer. For residential customers, the quantity rate is based on four tiers so that the cost of each incremental unit of water increases in steps. The quantity rate for non-residential customers is based on one uniform tier. Table 1 shows the District's water rates for FY 2010/11 and proposed rates for FY 2011/12.

Table 1. Water Rate S	chedule - Bi-Month	nly
	Current 2010/11	Proposed 2011/12
Bass Charge (by mater size)		
Base Charge (by meter size) 5/8"	\$27.43	\$30.72
5/8" for 2 dwelling units	\$60.33	\$67.57
3/4"	\$41.23	\$46.18
	•	•
3/4" for 2 dwelling units	\$82.51	\$92.41
1"	\$68.72	\$76.97
1-1/2"	\$132.71	\$148.64
2"	\$219.95	\$246.34
3"	\$481.16	\$538.90
4"	\$1,649.90	\$1,847.89
Variable Charge (1)		
Residential		
0 - 8 hcf	\$4.48	\$5.02
9 - 25 hcf	\$4.94	\$5.53
26 - 40 hcf	\$6.42	\$7.19
41 & over hcf	\$7.93	\$8.88
Non-Residential		
Per hcf	\$6.10	\$6.83
(1) 1 unit = 1 hcf = 7.48 gallons		

Overall, the CCWD is in good financial condition. The enterprise maintains an adequate level of reserves. As of July 1, 2010, the District had about \$4.3 million in fund reserves. The District has also increased water rates annually for the past ten years as shown on Figure 1. Rate increases are necessary to fund rising operating costs including increased wholesale water costs from the San Francisco Public Utilities Commission (SFPUC) and to finance capital improvement projects.

1.3 Current Outstanding Debt

Since 1998, the District has issued approximately \$10 million in long-term debt secured by water revenue. The District's two outstanding debt issuances include: 1) Series 1998A Association of Bay Area Governments (ABAG) Water and Wastewater Revenue Refunding Bonds for \$2,855,000 and 2) Series 2006B California Statewide Communities Development Authority (CSCDA) Water Revenue Bonds for \$7,295,000. A portion of the 1998A Bonds were used to advance refund the outstanding balance of the Series 1993A Water Revenue Refunding Bonds which was paid off on June 30, 2004. The 1998A Bonds bear interest at 3.50% to 4.75% with the final installment due on October 1, 2013. The 2006B Bonds bear interest at 3.75% to 5.3% with the final installment due on October 1, 2032. As of June 30, 2011, outstanding principal for the existing debt obligations totals \$7,355,000 with annual debt service of approximately \$750,000 through FY 2014/15.

1.4 FY 2011/12 I-Bank Loan

The District is in the process of securing a \$6.7 million I-Bank loan in FY 2011/12 to fund upgrades to the Denniston Creek Water Treatment Plant (DCWTP). The project will enable year round treatment of the local surface water supply thereby increasing water system reliability and reducing long-term operating expenses. The I-Bank loan program is administered by the California Infrastructure and Economic Development Bank and offers direct long-term, low-cost loans of up to 30 years to fund public infrastructure. CCWD is eligible for the Tier 1 loan program which can be used to fund up to \$10 million of projects. Before loans are awarded, agencies must meet minimum threshold eligibility criteria that

evaluate how the project will contribute to economic development and an improved quality of life for the community.

Debt repayment is typically secured by an agency's legal pledge to raise rates and fees as needed to repay debt service. The interest rate is set at approximately 67% of Thompson's Municipal Market Data Index for an "A" rated tax-exempt security plus twenty basis points. Based on current market conditions, the interest rate ranges between 3.5% to 4.0%. The updated financial plan assumes \$6.7 million loan in 2011/12 with interest of 4.0% for 20 years. Annual debt service is estimated at \$493,000 beginning in FY 2012/13. The District submitted the financing application in June 2011 and anticipates an approval within the next 6 months.

1.5 Debt Covenants and Debt Service Coverage

Pursuant to the legal agreements securing the outstanding debt issues, the District has agreed to abide by a number of debt covenants designed to ensure adequate repayment security. Key among these is a debt service coverage covenant that requires the District to maintain and raise water rates as needed to achieve 120% coverage on annual debt service which is a standard legal covenant for securing water revenues bonds or COPs. Debt service coverage is calculated based on net revenues (total annual revenues less annual operating and maintenance costs) divided by the District's total annual debt service obligation. Therefore, water rates must be designed to ensure adequate coverage. Based on the updated financial plan, the District will be in compliance with the coverage requirements.

1.6 Reserve Funds

The District maintains a number of reserve funds. Some funds are designated and/or restricted for specific purposes; others are undesignated and can be used for any District purposes. Unrestricted reserve funds include the Cash Flow and Operating Reserve, Emergency and Contingency Reserve, and Capital Expenditures Reserve. As shown on Table 2, the District's reserves totaled over \$4.3 million as of June 30, 2010. The estimated reserve balance at the end of FY 2010/11 is projected to be about \$3.4 million.

Table 2. Reserve Fund Balances	
Reserve Fund	30-Jun-10
Cash Flow and Operating Reserve	\$299,830
Emergency Reserves	\$1,740,663
Capital Expenditures	\$2,109,352
Crystal Springs Project Connection Fees	<u>\$165,495</u>
Total Fund Balances	\$4,315,340

Operating and Capital Reserve Target

The 2009 Water Financing Plan recommended a minimum fund reserve target of 15% of the District's annual water sales revenue which will allow the District to fund a portion of their capital improvements with pay-as-you-go cash funding. Maintaining a prudent level of fund reserves is an important component of financial management. Adequate fund reserves a) provide a financial cushion for dealing with unanticipated financial needs and emergencies; b) provide working capital to help deal with revenue and expense fluctuations; and c) provide guidance for long-term financial planning. The fund reserve target will vary over time based on the District's annual operating revenue. It is acceptable if reserves fall below the target on a temporary basis, provided action is taken to achieve the target over the longer run. The minimum operating reserve fund target for FY 2011/12 is \$983,000. Based on the projections, the District will meet the operating reserve fund target through FY 2020/21.

Rate Stabilization Fund Target

In discussion at a Board workshop in May 2011, it was decided that the District will establish a rate stabilization reserve to comply with stipulations in the Series 2006B CSCDA Water Revenue Bonds with a fund target of \$250,000. The purpose of the fund is to reduce water revenue requirements in order to smooth water rate adjustments over time. The District may withdraw money from the rate stabilization fund as needed.

The fund reserve targets are summarized in Table 3.

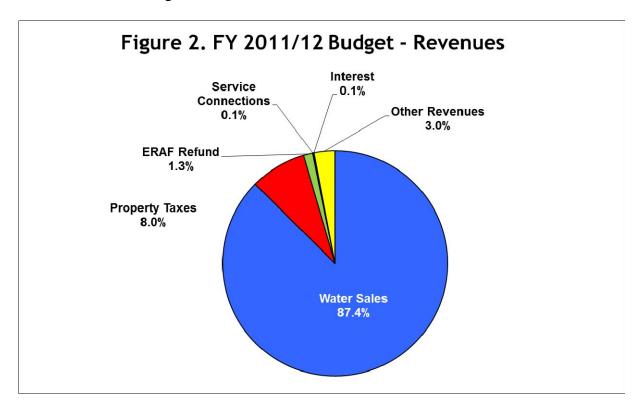

Table 3. F	Recommended Reserve Fund Balance	s
Reserve Fund	Fund Reserve Target	2011/12 Target
Capital and Operating Reserve	15% of Annual Water Sales Revenue	\$983,000
Rate Stabilization Fund	1-Year Contribution of \$250,000	\$250,000

2 FY 2011/12 BUDGET

2.1 Revenues

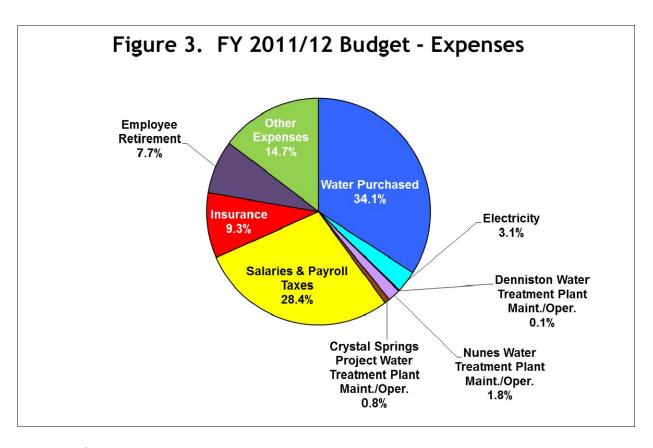

The FY 2011/12 budget (shown in Appendix A) estimates that the District will earn roughly \$7.5 million in total annual revenues, representing a 5% increase from the FY 2010/11 budget. Revenues from water sales are estimated at \$6.6 million, comprising 87% of total revenues.

Property taxes are estimated at \$600,000 and an ERAF refund is projected at \$100,000 which combined account for roughly 9.3% of all revenues. Other revenues include hydrant sales, penalty charges, earned interest, cell phone lease income, and miscellaneous revenue totaling around \$259,000, representing 3% of the District's total revenues. A breakdown of the revenues is shown in Figure 2.

2.2 Operating Expenses

Total operating expenses for the FY 2011/12 budget are approximately \$6.0 million. The largest expense is wholesale water purchases from the SFPUC, estimated at \$2.1 million and representing about 34% of the total budget. For FY 2011/12, wholesale water rates increased by 26%. Salaries and payroll taxes of \$1.7 million account for 28% of total expenditures. Figure 3 shows a summary of the District's operating expenses for the FY 2011/12 budget.

2.3 Capital Projects

The District's ten-year, FY2011/12 to FY20/21 Capital Improvement Program (CIP) includes FY 2011/12 expenditures of \$6.7 million for capital projects, including the DCWTP Improvements Project. Construction is anticipated to be completed within a year. These projects will be funded with an I-Bank loan. Annual debt service of \$493,000 will be repaid beginning in FY 2012/13.

2.4 Rate Stabilization Fund

The FY 2011/12 budget includes a \$250,000 transfer to establish the rate stabilization fund as required by the Series 2006B CSCDA Water Revenue Bonds borrowing.

2.5 FY 2011/12 Rate Increase

Based on the FY 2011/12 budget and CIP, the proposed rate increase is 12%. Proposition 218 notices detailing the rate increases were mailed to all property owners, and a public hearing will be held on June 28, 2011 to approve the rates for the next fiscal year. The approved rates will become effective on July 1, 2011.

3 FUTURE OPERATING EXPENSES

3.1 Forecast of Operating Expenses

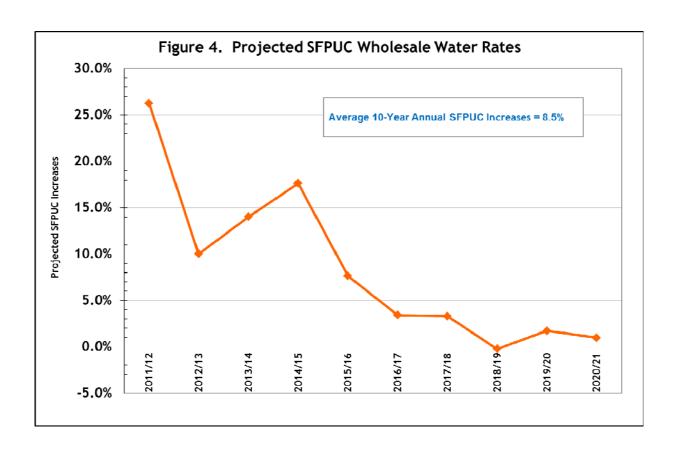

Table 4 projects operating expenses over the ten-year analysis period (FY 2011/12 through FY 2020/21). The FY 2011/12 budget serves as the base year. Forecasted increases in purchased water reflect the percentage increases provided by the SFPUC. All expenditures except for water purchased are forecasted to increase at 5% per year. At the bottom of the table are the estimated overall percentage increases in operating expenses; they are forecasted to increase between 3% and 8% over the next ten fiscal years.

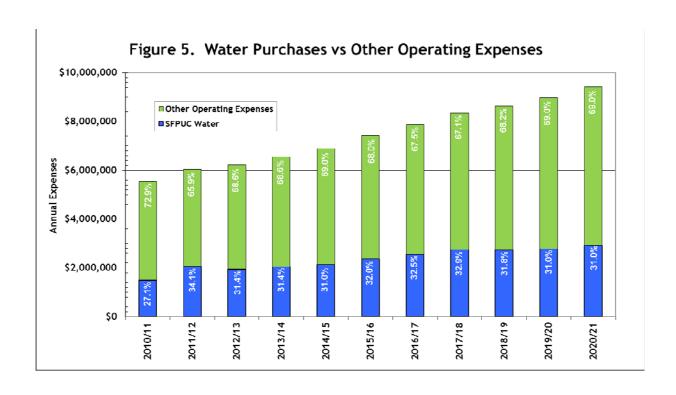

3.2 Projected Wholesale Rate Increases

Because the District only receives untreated water from the San Francisco Public Utilities Commission, CCWD was able to negotiate a discount on its wholesale water rates. For FY 2011/12, the discount is \$0.23 per hcf. Although the SFPUC's rates are expected to increase over the next ten years, the untreated water discount and projected decreases in the amount of water purchased from the SFPUC will mitigate the effect of increased rates on total wholesale water costs.

Figure 4 shows a ten-year projection of the SFPUC's wholesale water rate increase which includes the District's discount for untreated water. The SFPUC's rates shown are based on the most current information available to date and will be updated each year. The highest increases occur in the next five years. Figure 5 illustrates the average annual increases for SFPUC water purchases compared to all other expenses. On average, both water purchases and other expenses are estimated to increase roughly 5% annually over the next ten years.

4 CAPITAL IMPROVEMENT PLAN (FY 2011/12 – 2020/21)

4.1 Capital Projects

CCWD's Ten-Year CIP includes over \$23.4 million in improvements to the District's water system through FY 2020/21. Figure 6 illustrates anticipated project costs per year based on the year each project is initiated. The Ten-Year CIP is shown in Appendix B.

The projects are broken out into eight categories consistent within the CIP: a) Pipeline Projects, b) Water Treatment Plants, c) Facilities and Maintenance, d) Equipment Purchase and Replacement, e) Pump Stations/Tanks/Wells, f) Denniston Water Treatment Pants (Short-and Long-Term) Improvements, g) Nunes Water Treatment Plant (Short- and Long-Term) Improvements, and h) Water Supply Development. Costs are shown in 2010 dollars. The CIP will be updated annually as changes are incorporated and as better cost information becomes available.

4.2 Construction Cost Inflation

In Table 5, BWA escalates the District's 10-year capital improvement plan by 4% annually to account for construction cost inflation. Using a 4% escalation rate, the future costs of these improvements over the next decade is projected at over \$26.4 million.

Та	ble 5. Escalated 10)-Year Capital Improve	ment Plan
	Fiscal Year	Nominal CIP	Escalated CIP
0	2011/12	6,670,500	6,671,000
1	2012/13	2,992,500	3,112,000
2	2013/14	4,122,500	4,459,000
3	2014/15	2,027,000	2,280,000
4	2015/16	1,201,000	1,405,000
5	2016/17	1,113,000	1,354,000
6	2017/18	1,633,000	2,066,000
7	2018/19	1,165,000	1,533,000
8	2019/20	1,500,000	2,053,000
9	2020/21	1,000,000	1,423,000
	Total	\$23,424,500	\$26,356,000

4.3 Capital Improvement Funding

With respect to funding future capital needs, there are several options for the District to consider. BWA recommends the District fund its Ten-Year CIP with a combination of pay-as-you-go cash funding combined with debt financing. The District will be able to fund a portion of the capital projects with operating revenues and cash reserves. However, due to the magnitude of the Ten-Year CIP, pay-as-you-go funding would need to be supplemented by some debt financing. The District has applied for a \$6.7 million I-Bank loan to fund the Denniston Creek Water Treatment Plant improvements. The Ten-Year Cash Flow Projection (discussed in Section 6) shows the District receiving the I-Bank funds in FY 2011/12 and making the first loan payment in FY 2012/13.

The projections show that the District will need to issue approximately \$3 million in debt to fund capital improvements in FY 2013/14. Major projects include the San Vicente Pipeline construction for water supply development and the Pilarcitos Canyon pipeline replacement.

BWA recommends that the District first apply for low-cost loans to fund capital projects when possible. The District should apply for another loan with the I-Bank. However, if an I-Bank loan is not available, BWA recommends the District seek a competitively bid "Private Placement" loan to finance capital projects in FY 2013/14.

A private placement loan is typically sourced through a commercial bank or leasing company and is generally limited to a 20-year maximum term. The loan is placed through a term sheet and competitive bidding process. Preparation of a bond prospectus or official statement is not needed. The legal documentation is relatively simple and streamlined and issuance costs are kept to a minimum. The legal covenants securing loans are generally similar to those of bonds.

Bank loans and private placements typically offer slightly higher interest rates than bonds, but also have lower costs of issuance. This has historically made bank loans a cost-effective option for smaller borrowings, historically under \$5 million. However, in the current interest rate environment, bank loans may be cost-effective for financings upwards of \$10 million depending on the underlying credit of the issuing agency. Short-term bank loans and lines of credit are sometimes used to provide interim financing that will eventually be taken out with long-term debt. For example, agencies with limited fund reserves may use a line of credit to fund project design and preliminary engineering costs prior to issuing long-term bonds when construction bids are received. The current interest rates on a private placement loan vary from about 3.1% for a 5-year loan to about 5.0% for a 20-year loan.

As a conservative estimate, the financial plan includes a \$3 million private placement loan in FY 2013/14 with terms of 5.0% interest for 20 years. Annual debt service is projected at \$241,000 beginning in FY 2014/15. Future rate increases shown in the Financing Plan are adequate to fund debt repayment and provide adequate debt coverage, as discussed below.

6 RATE INCREASES

6.1 Drivers of Future Rate Increases

The financial projections indicate the need for rate increases to keep long-term revenues in line with long-term expenses. The recommended adjustments are needed to enable the District to:

- Fund approximately \$9.7 million in new debt to finance the capital improvement plan. The District is in the process of applying for a \$6.7 million loan from the I-Bank to fund upgrades to the DCWTP and anticipates receiving the loan in FY 2011/12. The District will use reserves when possible to pay for capital projects in but will need to issue approximately \$3 million in additional debt in FY 2013/14. The new borrowings will result in a roughly \$734,000 increase in annual debt service beginning in FY 2014/15.
- Keep revenues aligned with annual operating cost increases. The District faces ongoing increases in operating costs for its operations and maintenance. Total operating expenses, excluding water purchases, are anticipated to increase 5% each year through FY 2020/21.
- <u>Fund wholesale water rate increases from the SFPUC.</u> Although CCWD has negotiated a
 discount for water purchases from the SFPUC and will begin to decrease their reliance on
 SFPUC water once the upgrades to the DWCTP are completed, the District will still be
 faced with annual wholesale water increases. The SFPUC's rate projections show average
 annual increases of roughly 8.5% through FY 2020/21 with the highest rate increases
 occurring in the next five years.
- Satisfy rate covenants in existing debt obligations. The District has pledged net revenues generated by the water system to the payment of the existing bond installment payments. In order to issue additional debt on parity with existing debt, the net revenues must be at least 120% of the maximum annual debt service for all existing and new debt.
- Maintain a prudent level of reserves. The District's operating and capital minimum reserve fund target is 15% of annual water sales revenue. The fund reserve target will vary each year, and it is acceptable if reserves fall below the target on a temporary basis, provided action is taken to achieve the target over the longer run. CCWD will also establish a rate stabilization fund in FY 2011/12 with a minimum fund reserve target of \$250,000

Table 6 projects the sources and uses of funds for the water system from FY 2011/12 through FY 2020/21. The District's primary source of revenue is water sales, and the cash flow projection indicates the percentage increase in water sales revenue necessary to cover annual

revenue requirements. The financial projections are based on the best information currently available as well as a number of conservative assumptions including:

Revenues

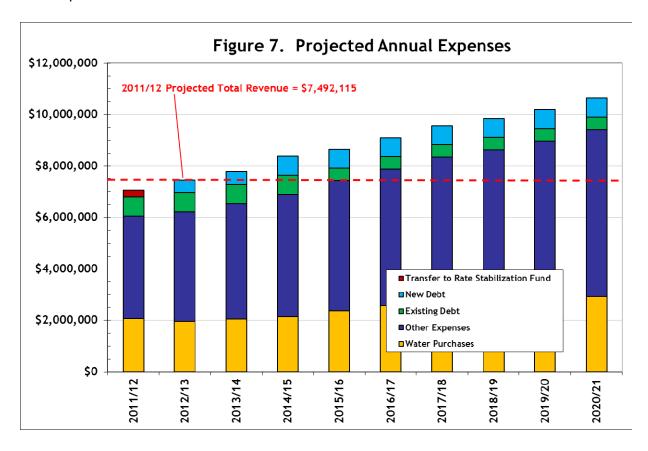

- Annual rate adjustments will take effect on July 1 of each year.
- New growth and water demand is not expected to increase significantly over the next ten
 years.
- To be conservative, property tax revenues are estimated to remain constant, and ERAF revenue is projected to be eliminated in FY 2012/13.
- Interest revenue and other revenues are projected to increase at 4 percent annually.
- Rates are designed to meet debt service coverage requirements each year.
- Capital revenue sources and amounts are based on the water capital improvement program.

Expenses

- All operating expenses, except for water purchases, are escalated by 5% each year to account for cost inflation.
- The projections include a \$6.7 million I-Bank loan in FY 2011/12 and a \$3 million private placement bank loan in FY 2013/14.
- Capital project expenditures will be reviewed and updated annually by CCWD.
- Minimum total (capital and operating) reserves should equal 15% of operating revenues from water sales.
- A rate stabilization fund will be established in FY 2011/12 with a transfer of \$250,000.

 Property lax and ERAF returds based on conservative projections. Interest earnings escaladed by 4% annually. Other revenues (hydrant sales, late penalty, miscelareous, and cell site lease income) escalated by 4% annually. A) Repayment of Bank and private placement loans. B) A Repayment of Bank and private placement loans. B) A Repayment of Sach and a Revenues (revenues (revenues minus operating expenses) by total debt service. Minimum coverage requirement is 1.2 times annual debt service. 	e projections. reous, and cell site	lease income) es	scalated by 4% an	nually.						

Figure 7 shows a long-term projection of expenses broken out by debt service, CIP reserve contributions, SFPUC water purchases, and all other expenses. (The figure excludes costs for capital improvements financed by debt, but does include estimated debt service for those projects.) The red dashed line on the table shows total projected water revenues for FY 2011/11. Note that FY 2011/12 revenues do not fully cover expenditures for future years. Therefore, rate increases will be needed to bring long-term revenues in balance with long-term expenses.

6.2 Future Rate Increases

Based upon the District's CIP and operating revenue projections, the following rate increases shown on Table 7 are needed. The proposed rate increases will fund operations and debt service, satisfy debt service coverage requirements, and fund reserve targets. Rate increases will be effective July 1 of each year. The percentage increase will be applied to both the base charge and variable charge for residential and non-residential customers.

		Table 7.	Projected	Water Rate	e Adjustm	ents - Bi-N	onthly

6.4 Operating and Capital Reserve Fund Balance

Figure 8 shows the ending operating and capital fund balance and minimum target for each year based on the proposed rate increases. The chart shows that the District will meet the 15% annual water sales revenue target throughout the ten-year period and will be able to use a portion of the reserves to fund capital expenditures.

7 SUMMARY AND RECOMMENDATIONS

The District has adopted rate increases every year since 2001. These annual increases have helped keep revenues in line with the costs of providing service and enabled the District to accrue and maintain a healthy level of fund reserves, which totaled approximately \$4.3 million in cash and equivalents as of June 30, 2010. Although the District has historically been in good financial health, the District is facing new financial challenges, particularly due to increased wholesale water rates from the SFPUC and a \$23.4 capital improvement program to repair and upgrade the water system.

BWA developed 10-year financial projections to evaluate the near-term and long-term revenue requirements of the District's water enterprise. The financial projections indicate the need for significant ongoing rate increases to recover operating and capital funding needs and keep rates in line with the cost of providing service. The recommended rate adjustments will cover operating and maintenance expenses, fund new debt service, and maintain a healthy level of reserves.

Recommendations -

- Adopt water rate increases. BWA recommends that the District adopt multi-year water
 rate increases to cover expenses and meet debt service coverage requirements. In
 addition to annual operating cost inflation, the District is facing large wholesale water rate
 increases from the SFPUC particularly over the next five years. Moreover, rate increases
 are necessary for the District to make debt service payments and to maintain net revenues
 of at least 120% of maximum annual debt service. The District should continue to review
 its rates and revenue requirements each year to ensure that revenue and expense
 projections are accurate.
- <u>Issue debt in the form of I-Bank or private placement loans to fund the CIP.</u> BWA recommends that the District apply for an I-Bank loan for \$3.0 million in FY 2013/14. If an I-Bank loan is not available, BWA recommends a private placement loan. The District should continue to annually review the Ten-Year CIP as updated cost information becomes available.

JUN 07 7011 COASTSIDE COUNTY WATER DISTRICT

June 7, 2011

General Manager, Coastside County Water District 766 Main Street Half Moon Bay, CA 94019

RE: Protest of Proposed Rate Increase

Mr. Dave Dickson and Directors:

The Cabrillo Unified School District has received notification of the proposed CCWD rate increase of "up to 15%." As District Superintendent, I know how hard it is to maintain programming and services in this particular period of time. But CCWD is an integral part of our community... and our community is struggling right now. When you announce a planned increase of "up to %15" I have to ask you, "Have you done everything possible to reduce your costs before arriving at this proposed increase?" I believe it is imperative that CCWD do everything it can do right now to be a "good neighbor."

Our school district is coping with a budget deficit of between \$1.5 million and \$2.5 million, depending on the outcome of the Governor's proposed budget. We have issued final lay-off notices to nine teachers and one elementary school principal this spring... and we will not be hiring behind two retiring classified positions—a maintenance worker and a grounds worker. We are operating under a freeze on non-essential travel and purchases and all of our employees have accepted three unpaid furlough days. We have not agreed to an increase in salaries for the past three years... and because of the furlough days many of our employees are making less than they did three years ago. More cuts are likely next spring... this, despite the fact that we were able to secure voter approval of a parcel tax measure last June that required a two-thirds majority. I wonder... if you were required to clearly justify your proposed increase and secure approval of two-thirds of your customers, would you be able to do it?

In the 2010 calendar year the Cabrillo Unified School District's water bill from CCWD was \$74,167. A fifteen percent increase would amount to a little over \$11,000 in additional costs. We could use every penny of that \$11,000 in the classroom.

I am responsible for a large "business" as well. I "get" the need to try to recruit and retain good employees... deal with current and future infrastructure needs... and just "make ends meet." But I also recognize what is going on in our economy right now and I am making the hard decisions that are necessary in order to maintain core services without increasing related costs. You don't operate in isolation. You serve a community as well. You are an important part of this community. And your community needs to know that you have looked at every facet of your operation using the filter of "is it absolutely essential" before implementing a cost increase that is far above any published cost of living formula. Have you???

Sincerely,

Rob Gaskill, Superintendent Cabrillo Unified School District

June 3, 2011

TO: General Manager, Coastside County Water District RE: 458-460 Cypress St., Half Moon Bay, CA 94019

This letter has been written to PROTEST the proposed rate increases as set forth in the 'Proposed 2011-2012 Rate Increases for Water Services. This information comes from the letter you sent us on May 13, 2011.

We object for the following reasons:

- 1. It seems from your letter that the projected wholesale water rates have not yet been increased; the rates may be different and less than you are stating in your letter. Therefore, an increase in your water rates is premature.
- 2. The upgrades you are doing will primarily benefit new housing, not the customers who have been paying into the system for years. Have the people who are building, pay for the upgrades.
- 3. You state that the proposed rate increase is necessitated by "lower water consumption resulting from continued conservation efforts by District customers". Essentially this means that in complying with the Water District's demand for consumers to conserve water, these same consumers are now being threatened with increased rates, because, in fact, they *did* reduce their water consumption. These people should be rewarded with lower rates, not higher water bills.

Thank you for your consideration of our concerns,

Leslie C. and Linda L. Steinhoff

I am writting a letter of protest to the up comming rate hite. As much as 15%; Now what I wouldn't give to have a raise like that! I am very much opposed to this, over the Top rate like. Please let the Water directors Know my feelings Sincerly Sharon Scott 331 metzgar Hm B, Ca 94019 account# 4778-0

May 25, 2011 Coastside County Water District Attn: City Clerk

Attn: Rate Increase Protest

Elizabeth and I feel that the Water Service Rate should not be increased at this time, considering the uncertainty of the economy (increasing prices due to inflation) and the social unrest (denial of the Cities, States and Federal Government of the real economic and social crisis) at this time; instead, the city might consider renegotiating with Coastside County Water District a better alternative instead of <u>raising the water fee's again</u>. We, the residents of Half Moon Bay, deserve better; hence, we protest the proposal rate increase.

best Junel

Thank you very much for your attention

This is in regard to your Public Hearing for the proposed 2011/2012 rate increase for water service.

We are not in favor of this increase. This is not the time, with the economy hurting everyone, this will be a burden to everyone. This too much of a increase of 15% of the water rate Also you have requested a lower water consumption by District customers which they have done, now the customers are being penalized for making a reduction in water use.

You should have planned long ago for future upgrades, improvements, and other district needs. You could have started a small increase in rates over time. You are asking customers for a 15% increase. What is the Water District willing to do to lower the increase? Is there a proposal to have the Directors take a pay -cut, make some cut- backs on employees benefits and salaries and other area,s that could be cut back. State, counties, cities, and other districts are doing a lot of cut backs maybe this is the time Coastside County Water District should check your expenses.

Thank You

Attention: General Manager

One year ago, I wrote to protest a proposed 14% increase in water rates. Now I find myself asking that you do not approve an additional "... increase of up to 15% in the District's water rates." My fixed income has not increased so, once again, a rise in water rates will be felt. Raising the base charge, in particular, means no amount of water reduction will spare me from a higher bill.

Janet Rebling

PROTESTING RATE INCREASES FOR WATER SERVICES

I hereby file my protest against the planned rate increases for water services.

I react strongly against the given explanation for the rate increase: lower water consumption resulting from continued conservation efforts.

So consumers are supposed to be penalized by rate increases for their conservation efforts? What is the logic behind this? So if we had not conserved water, we would not have had to pay more for the water? This does not make sense. And I hope you understand what you are saying.

I find the entire process quite manipulative. If you have a genuine interest in listening to the voice of the consumers, you would have accepted inputs by e-mail.

You should be able to cut costs and create efficiencies by becoming a leaner organization rather than taking advantage of your monopoly on water supply in this area.

Yours sincerely,

Geir Tonnessen

ATTENTION:GENERAL MANAGER, COASTSIDE COUNTY WATER DISTRICT 766 Main Street, Half Moon Bay, Ca 94019

This is a letter of protest in regards to the request of a rate increase for water usage. I am a property owner of parcel number 048-211-400.

This rate increase will be a hardship for me and most of the retired Senior Citizens of Half Moon Bay. And I feel that this utility needs to look at other ways of meeting its expenses. The fact that ,in your letter of request, you stated that you are expecting a rate increase from the city of San francisco (of which you are not certain of the actual increase amount) and the fact that you admit that we citizens have obeyed your request for us to conserve our water usage and now are going to be PUNISHED for doing so. And further more we were told that if we did not comply we would be charged penalties for failing to cut our water usage. I feel that you can cut some of your overhead by looking at perhaps salaries, perks, and other costs before you apply for this rate increase. We are all in hard times and we as individuals have to look at cutting out some of the "FAT" in our budgets in order to pay for our every day expenses and we can not ask you or our Government to help pay our bills. When are you people going to learn that you can not keep going to the well everytime you wish. My friends that well is about to run dry. What will you do then? For that matter what will WE do then?

We are residents of El Granada, California and received your notice for the proposed increase of up to 15% in the District's 2011-2012 water rates. Since Proposition 218 allows customers to respond to the proposed rate increase prior to the June 28, 2011 public hearing, we wish to **strongly protest this rate increase**. At a time when many of us are coping with economic hardships any rate increase will be extremely difficult.

Ironically, your brochure states that the proposed rate increase is necessitated by a number of factors including "lower water consumption resulting from continued conservation efforts by District customers." Many of us have deliberately tried to conserve water in order to **lower** our water bills. Now you are penalizing us for these efforts. It is disgraceful and possibly even unethical. You note that protests are limited to one per parcel. This is a list of El Granada residents who protest any rate increase for water services provided by CCWD.

To Whom It May Concern:

In accordance with Proposition 218, I am responding to the intent of the Water District to increase the price of water to Half Moon Bay residents. When asked to conserve water as a community, we responded and less water was used.

To reward your customers, you now want to charge us more money as stated in the NOTICE OF PUBLIC HEARING for using less water according to number "3) lower water consumption resulting from continued conservation efforts by District customers."

I would appreciate asking the decision makers to revisit this increase proposal and not increase the price of water we are currently paying.

Thank you for you consideration.

COASTSIDE COUNTY WATER DISTRICT

JUN 23 2011

June 20, 2011

COASTSIDE COUNTY WATER DISTRICT

Dear CCWD Board of Directors:

I am writing you in regards to the proposed increase in water rates. As a long-time Half Moon Bay resident, community member, and educator at Half Moon Bay High School, I was inspired to voice my point of view on the matter.

As an educator, I see firsthand the deleterious effects that the current budget shortfall has on the California educational system. I acknowledge that many individuals in other fields as well are struggling in their respective positions either to maintain some semblance of normalcy, while others are disilusioned with various reductions in salary, benefits, etc. We all have been forced to resign ourselves to make sacrifices in order to uphold the status quo. Now, it would seem that another fiscal change is in order with regards to our local water services.

I understand that as water prices rise so do the public's bills. As a means to assuage the pungeancy of higher expenses it is natural for one to make sacrifices and curtail certain luxuries. And if they are not luxuries (like water consumption), then many folks attempt to save wherever and whenever they can, such as me. Striving for frugality, even in a small way, by recycling clothing, re-using paper plates, only utilizing light one room at a time, and consuming less water should be lauded and praised, not castigated.

Penalizing the community for consuming *less* water by charging it *more* seems incongruous to me. Superficially, it would appear that the water district were attemtping to ensure fiscal security regardless of what the community chooses to do with its water consumption, i.e. 'If they use water, let's charge them. If they do not use water, let's charge them.' For, unless the water district can convincingly and logically support its reasoning for this increase, I fail to see how it can even consider its passage.

I recognize that the wholesale rates from the San Fracisco Public Utilities Commission will increase, and that this is one factor in necessitating an increase in rates. I would implore that CCWD and its representatives make any and all attempts to convince the SFPUC to mitigate its increase by a lesser percentage; an abrupt increase of 38% seems extreme. Normally, this type of increase in rates would be more gradual, over a longer period of time. Of course, the SFPUC may not be willing to adhere to your request on the matter, and this rate increase would be moot. Nevertheless, there is one more factor that is within the CCWD's power: the district's treatment plant upgrades.

These upgrades, needless to say, are necessary and vastly improve both the distribution and cleaniness of our water. I wonder if it might possible to defer the continuation of said upgrades to a later date. This, of course, in order to employ the economic resources available to better serve the public's plight of pervasive rising costs that seem to be omnipresent. If not, I understand, but I needed to, at the merest, posit this idea to the board for consideration.

Permit me to leave you with my primary argument: that to penalize consumers for saving water is questionable, and borders on fleecing the community. Please be considerate to the public's (and I am

sure that you, yourselves, are affected as well) constant economic struggle in the current state of things by not including this with the overall rate increase, if it passes. Thank you for time in considering my point of view.

Yours truly,

Patrick Games

David Dickson, General Manager Coastside County Water District 766 Main Street Half Moon Bay, CA 94019

Re: Opposition to proposed Application for 15% Water Rate Increase

Dear Mr. Dickson:

I am in opposition of the 15% water rate increase proposed to be effective on July 1, 2011 by the Coastside County Water District (CCWD).

No organization, firm nor company should be guaranteed an increase in revenue from the public during this challenging fiscal environment. Before any increase should be entertained, CCWD shou;d make a full comprehensive and detailed disclosre to the public of its income and costs.

As a CCWD customer and supporter of open government, I oppose the CCWD application for a fifteen percent (15%) water rate increase that is proposed for July 1, 2011.

Respectfully,

DONALD L. FREESE
