COASTSIDE COUNTY WATER DISTRICT

766 MAIN STREET

HALF MOON BAY, CA 94019

MEETING OF THE BOARD OF DIRECTORS

Tuesday, September 10, 2013 - 7:00 p.m.

AGENDA

The Coastside County Water District (CCWD) does not discriminate against persons with disabilities. Upon request, the agenda and agenda packet materials can be provided in a format to accommodate special needs. If you require a copy of the agenda or related materials in an alternative format to accommodate a disability, or if you wish to attend this public meeting and will require special assistance or other special equipment, please call the District at (650) 726-4405 in advance and we will make every reasonable attempt to provide such an accommodation.

All public records relating to an open session item on this agenda, which are not exempt from disclosure pursuant to the California Public Records Act, that are distributed to a majority of the legislative body will be available for public inspection at the CCWD District Office, located at 766 Main Street, Half Moon Bay, CA at the same time that the public records are distributed or made available to the legislative body.

This agenda and accompanying materials can be viewed on Coastside County Water District's website located at: www.coastsidewater.org.

The Board of the Coastside County Water District reserves the right to take action on any item included on this agenda.

- 1) ROLL CALL
- 2) PLEDGE OF ALLEGIANCE

3) PUBLIC COMMENT

At this time members of the public may address the Board of Directors on issues not listed on the agenda which are within the purview of the Coastside County Water District. Comments on matters that are listed on the agenda may be made at the time the Board is considering each item. Each speaker is allowed a maximum of three (3) minutes and must complete and submit a speaker slip. The President of the Board will recognize each speaker, at which time the speaker should proceed to the podium, give their name and address and provide their comments to the Board.

4) CONTINUATION OF PUBLIC HEARING (attachment)

Coastside County Water District Proposed Ordinance 2013-01 - Modifying Section W of the District's General Regulations Regarding Water Service Pertaining to the Control of Backflow and Cross-Connections

The Board of Directors has continued the public hearing that was opened at the August 13, 2013 Board of Directors meeting and the Board will continue the public hearing at this September 10, 2013 Board meeting in order to receive additional public comments and consider adoption of proposed Ordinance 2013-01 Modifying Section W of the District's General Regulations Regarding Water Service Pertaining to the Control of Backflow and Cross-Connections

5) CONSENT CALENDAR

The following matters before the Board of Directors are recommended for action as stated by the General Manager. All matters listed hereunder constitute a Consent Calendar, are considered as routine by the Board of Directors, and will be acted upon by a single vote of the Board. There will be no separate discussion of these items unless a member of the Board so requests, in which event the matter shall be removed from the Consent Calendar and considered as a separate item.

- A. Approval of disbursements for the month ending August 31, 2013: Claims: \$686,787.33; Payroll: \$105,957.76; for a total of \$792,745.09 (attachment)
 > August 2013 Monthly Financial Claims reviewed by President Coverdell
- **B.** Acceptance of Financial Reports (attachment)
- C. Approval of Minutes of August 13, 2013 Regular Board of Directors Meeting (attachment)
- **D.** Installed Water Connection Capacity and Water Meters Report (attachment)
- **E.** Total CCWD Production Report (attachment)
- F. CCWD Monthly Sales by Category Report August, 2013 (attachment)
- G. August 2013 Leak Report (attachment)
- **H.** Rainfall Reports (attachment)
- I. Notice of Completion Avenue Portola Pipeline Replacement Project (attachment)
- **J.** Request for Board to Provide Authorization to Write Off Bad Debts for Fiscal Year 2012-2013 (attachment)

6) MEETINGS ATTENDED / DIRECTOR COMMENTS

7) GENERAL BUSINESS

A. Award of Contract – Phase 2 Avenue Cabrillo Pipeline Replacement Project (attachment)

- 8) GENERAL MANAGER'S REPORT INCLUDING MONTHLY INFORMATIONAL REPORTS (attachment)
 - A. Operations Report (attachment)
 - **B.** Water Resources Report (attachment)
- 9) DIRECTOR AGENDA ITEMS REQUESTS FOR FUTURE BOARD MEETINGS
- 10) ADJOURNMENT

STAFF REPORT

To: Coastside County Water District Board of Directors

From: Dave Dickson, General Manager

Agenda: September 10, 2013

Date: September 5, 2013

Subject: Proposed Ordinance Modifying Section W of the District's General

Regulations Regarding Water Service Pertaining to the Control of

Backflow and Cross-Connections

Recommendation:

1. Continue the public hearing to receive comments on the proposed Ordinance Modifying Section W of the District's General Regulations Regarding Water Service Pertaining to the Control of Backflow and Cross-Connections.

2. Approve the proposed Ordinance Modifying Section W of the District's General Regulations Regarding Water Service Pertaining to the Control of Backflow and Cross-Connections.

Background:

On August 13, 2013, the Board of Directors conducted a public hearing on a proposed ordinance modifying Section W of the District's General Regulations Regarding Water Service Pertaining to the Control of Backflow and Cross Connections. Directors and members of the public expressed concerns with certain aspects of the proposed ordinance, and the Board continued the public hearing in order to allow for additional comments and questions. In response to issues raised on August 13, staff proposes revisions to the proposed ordinance as shown in Attachment A and provides the following answers to questions raised during the hearing:

- 1. Are there enough local certified backflow device testers available to serve the needs of District customers?
 - The present list of available and District-approved backflow testers (Attachment B) is more than adequate to cover all of the backflow testing needs of the District's service area. We have never had a complaint of testers not being available.
- 2. How does the District provide for a reasonable period of time for current customers to become compliant with the updated program?

 Staff proposes revising the ordinance to specify that all affected customers must come into compliance by March 31, 2014. This deadline allows a reasonable period of time for installation of the required backflow devices.
- 3. Should the District offer backflow device testing and installation services using District staff?
 Staffing a backflow tester for the entire service area would require a

permanent person to work half time at an actual cost of about \$60,000 annually. At 600 devices that would be \$100 per device. District Staff feels

that we would be taking business away from the local testers that presently provide this service at a lower cost.

- 4. Will backflow assembly devices be required on residential fire services and commercial fire services? Will they be also required to be tested annually? All new fire services will be required to have backflow protection. Nearly all existing residential and commercial fire services are already protected by a backflow device. No retrofit of existing fire services will be required except for commercial systems with additives, pumps, or other risk factors as defined in Section 3.d.ii of the ordinance. Staff has revised the language of Section 3 to clarify retrofit requirements. Testing of fire service backflow devices will be required only for RP devices.
- 5. Is it possible to have a backflow prevention device built directly into the water meter?

We are not aware of any such devices at this time.

6. How will the District address the risk of backflow from single-family residential connections?

Services for residences with wells are required to have backflow protection. The District installs a check valve at the meter on all new residential connections, and existing residential connections are retrofitted with a check valve when the meter is replaced. All residences will therefore be protected upon the completion of the District's current meter replacement cycle (approximately 15 years). Residential service check valves are the responsibility of the District and do not require annual certification testing.

- 7. Should the District explore possible funding, rebate, and/or payment programs that may be offered to customers?

 The cost of setting up and administering such a program would be substantial and would raise overall costs for customers subject to the backflow program requirements.
- 8. Does the District intend to seek criminal penalties as specified in Section 6.b of the proposed ordinance against customers who do not comply with backflow requirements?

No. This language has been removed from the proposed ordinance.

Fiscal Impact:

None.

ORDINANCE NO. 2013-01

AN ORDINANCE OF THE COASTSIDE COUNTY WATER DISTRICT

MODIFYING SECTION W OF THE DISTRICT'S GENERAL REGULATIONS REGARDING WATER SERVICE PERTAINING TO THE CONTROL OF BACKFLOW AND CROSS-CONNECTIONS

RECITALS

WHEREAS, on August 10, 2004, the District adopted Resolution No. 2004-15 adding Section W to the District's General Regulations Regarding Water Service Pertaining to the Control of Backflow and Cross-Connections;

WHEREAS, the District adopted this Resolution pursuant to Title 17, Chapter V, Sections 7583-7605 of the California Code of Regulations, which requires that water suppliers protect the public water supply from contamination by implementation of a cross-connection control program;

WHEREAS, the District assumed the administration of the backflow and cross-connection control program from the County of San Mateo as suggested by the California Department of Health Services (now the Department of Public Health) due to backflow or cross-connection incidents in the early 2000s;

WHEREAS, since the District has implemented its backflow and cross-connection control program, staff has determined that its regulations pertaining to the control of backflow and cross-connections should be amended; and

WHEREAS, in establishing its procedures, the Board of Directors has given notice of the public hearing to be held in connection with this Ordinance, and the District has complied with all notice and public hearing requirements of the law; and has received, reviewed and given due consideration to the evidence presented in connection with the procedures established by this Ordinance.

NOW, THEREFORE, BE IT ORDAINED by the Board of Directors of the Coastside County Water District that Section W "BACKFLOW AND CROSS-CONNECTION CONTROL" is hereby modified in the General Regulations of the Coastside County Water District to delete the entire Section W and replace it with the following:

W. Backflow And Cross-Connection Control

1. Cross-Connection Control – General Policy

- **a. Purpose.** The purpose of this regulation is:
 - i. To protect the public potable water supply of the Coastside County Water District (District) from the possibility of contamination or pollution from backflow; and,
 - ii. To promote the elimination or control of existing cross connections, actual or potential, between the customer's potable water system(s) and nonpotable water systems, plumbing fixtures, appliances, and industrial piping systems
- **b. Authority.** These regulations are adopted pursuant to the State of California Code of Regulations, Title 17 Sections 7583 7605, inclusive (State Regulations). The State Regulations, as they may be amended or revised, are incorporated into these regulations by this reference, except to the extent the State Regulations conflict with these regulations, in which case these regulations will govern.
- **c. Policy:** No Non Residential Single Family water service connection or Single Family Residential service connection that have an auxiliary water supply, cross connection, or a risk of backflow or contamination to any premises shall be installed or maintained by the District unless the water supply is protected as required by State Regulations and this regulation. Service of water to any premises shall be discontinued by the District under the following circumstances: (1) if a backflow prevention assembly required by this regulation is not installed, tested, and maintained; (2) if it is found that a backflow prevention assembly has been removed or bypassed, or (3) if an unprotected cross connection exists on the premises. Service will not be restored until such conditions or defects are corrected.

2. **Definitions**

Words used in this regulation, unless the context requires otherwise, shall be as defined below.

- a. Approved Tester means a person who holds a current and valid AWWA (American Water Works Association) Backflow Prevention Assembly Testers Certification and is in good standing with the District to perform backflow prevention device testing within the District's distribution system in accordance with established procedures as found in the latest edition of the Manual of Cross-Connection Control published by the Foundation for Cross-Connection Control and Hydraulic Research, University of Southern California.
- b. **Auxiliary Water Supply** Any water supply on or available to the premises other than the approved water supply as delivered by the District to the service connection. This

- includes storage tanks where water quality may degrade, private wells, natural or ornamental ponds, streams, storm water, rain barrels, gray water, and the ocean.
- c. **Backflow** means the reverse flow of water or any other fluid or substance or any combination or any mixture thereof from the customer's system into District's water distribution system.
- d. **Backflow Prevention Assembly** means an assembly of a type and manufacture approved by the District which will prevent backflow into District's distribution system. The District will approve all backflow prevention assemblies that meet the American Water Works Association standards at the time the backflow prevention assembly is installed.
 - i. <u>Air Gap Separation.</u> The term "air gap separation" means a physical break between a supply pipe and a receiving vessel. The air gap shall be at least double the diameter of the supply pipe measured vertically above the top rim of the vessel, in no case less than 1 inch.
 - ii. <u>Double Check Valve Assembly.</u> The term "double check valve assembly" means an assembly of at least two independently acting check valves including tightly closing shut-off valves on each side of the check valve assembly and test cocks available for testing the water tightness of each check valve.
 - iii. Reduced Pressure Principle Backflow Prevention Device (RP). The term "reduced pressure principle backflow prevention device" or "RP device", means a device incorporating two or more check valves and an automatically operating differential relief valve located between the two checks, a tightly closing shut-off valve on each side of the check valve assembly, and equipped with necessary test cocks for testing.
- e. **Contamination** means a degradation of the quality of the potable water by any foreign substance which creates a hazard to the public health, or which may impair the usefulness or quality of the water.
- f. Cross-Connection means any connection, link or channel between District's water distribution system and an auxiliary water supply, a pipe or piping system, plumbing fixtures, appliance, container, receptacle, vessel or other devices that may allow for contaminated or used water or fluid, or any other substance of whatsoever nature other than the water supplied by District, to enter any part of District's water distribution system.
- g. **Customer** means any person or organization who receives water from the Coastside County Water District.
- h. **Customer's System** means the water piping system located immediately downstream from a meter or service connection.

- i. **Detector Check** means a by-pass metering device that detects any leakage or unauthorized use of water from fire or automatic sprinkler systems.
- j. **District** means Coastside County Water District.
- k. **District's Water Distribution System** means the water distribution system owned and operated by the District including the service connections to water mains, up to and including the water meter.
- 1. **General Manager** means the General Manager of the District or his authorized representative is invested with the authority and responsibility for the implementation of an effective cross-connection control program and for the enforcement of the provisions of this regulation.
- m. **Master Meter** means a metered service connection that services more than one residential, commercial, industrial, institutional, agricultural, or governmental unit.
- n. **Multifamily Residential Service** means a service that supplies water through a master meter to a residential premises, 4-plex, apartment complex or trailer village.
- o. **Non Single Family Residential Service** means all services that are not a Single Family Residential Service. This includes all mixed use, fire, commercial, agricultural, institutional, governmental, multifamily or industrial water services.
- p. **Premises** means a parcel of land including all buildings and appurtenances located thereon.
- q. **Service Connection** means the meter and water piping system connecting the customer's system with the District's water distribution system.
- r. **Single Family Residential Service** means a service connection to a single family home or premises.
- s. **Temporary Water Use** means water used from a fire hydrant or other source on a temporary basis and metered through a portable water meter.

3. Requirements for Backflow Prevention Assemblies

a. Existing Service Connections. Unless otherwise specified by the District, a backflow prevention assembly must be installed on all existing Non Single Family Residence service connections and on Single Family Residential service connections that have an auxiliary water supply, a cross connection, a storage tank or other risk of backflow or contamination by March 31, 2014. Single family residential service fewer than three stories tall with no health threats, auxiliary water supply, or a second District water service and are not under a master meter typically are exempt or qualify for a

- single check, non testable device to be installed as part of the meter change out program.
- b. New Service Connections: A backflow prevention assembly must be installed on all new Non Single Family Residential Services and all new Single Family Residential water service connections that have an auxiliary water supply, a cross connection, or a risk of backflow or contamination. At the time an application for a new water service is made by a potential customer in accordance with procedures established by the District, the General Manager will review the application to determine the need for an approved, backflow prevention assembly on the customer's service. If a backflow prevention assembly is not required, a single check must be installed on the downstream end of the water meter.
- **c. Upgrading of Existing Backflow Prevention Assemblies**: An existing backflow prevention assembly that does not provide adequate protection for the degree of potential hazard from backflow or contamination shall be upgraded at customer's expense.
- **d.** Commercial Fire Sprinkler Systems. All services to commercial fire sprinkler systems require backflow protection at the point of connection to the District's supply. The type of backflow protection required is based on the sprinkler system construction. For the purposes of this determination:
 - i. Systems utilizing only the District's water supply will require at least a double check valve assembly.
 - ii. Systems utilizing the District's water supply and that also contain chemical additives, on site water storage, auxiliary water supplies, or fire booster pumps, shall require an RP device.
 - iii. Existing systems with a single detector check will not require retrofit-provided the check valves are tested in accordance with NFPA 13 requirements and do not require replacement.
 - iv. Retrofitting existing fire sprinkler systems will require the customer to provide the Coastside Fire Protection District with an updated hydraulic analysis to certify proper system operation with the additional pressure loss.
 - <u>v.iv.</u> The District, in addition to the Coastside Fire Protection District, shall review and approve all applications for construction or retrofit of commercial fire sprinkler systems.
- **e. Residential Fire Sprinkler Systems**. All services to residential fire sprinkler systems require backflow protection at the point of connection to the District's supply. The type of backflow protection required is based on the sprinkler system construction. For the purposes of this determination:

- i. Systems utilizing only the District's water supply will require at least a single detector check assembly.
- ii. Systems utilizing the District's water supply and that also contain chemical additives, on site water storage, auxiliary water supplies, or fire booster pumps, shall require at least an RP device.
- iii. Existing systems with a single detector check will not require retrofit.

f. Construction and Temporary Water Use.

- i. Construction and temporary water use shall be metered and equipped with either an air gap separation or an RP device.
- ii. Inspection of air gap separation and testing of reduced pressure principle backflow prevention assemblies shall be a condition of temporary service and at the expense of the customer.

4. Ownership of Backflow Prevention Assemblies

Backflow prevention assemblies installed or upgraded by the customer shall remain the property of the customer. Customer shall be responsible for maintenance, inspection, and testing of backflow prevention assemblies as required herein.

5. Maintenance, Inspection and Testing of Backflow Prevention Assemblies

- a. Customer shall at all times maintain backflow prevention assemblies serving customer's premises in proper working order and provide for unobstructed access by District to the backflow prevention assemblies as a condition of continued water service.
- b. The customer's system must be open for inspection at all reasonable times to authorized representatives of the District to determine whether cross connections or other structural or sanitary hazards, including violations of these regulations, exist.
- c. If the customer allows the backflow certification to lapse, the water will be turned off 48 hours after the expiration of the backflow certification.
- d. Backflow prevention assemblies must be inspected and tested before a service is connected.

- e. District will send a courtesy notice to the customer of the annual backflow prevention assembly testing requirement. The Customer is responsible for the inspection and testing of backflow prevention assemblies. If the Customer does not provide the District with the backflow testing Certificate documenting that the backflow prevention assembly is working properly within 30 days of notification by the District of the need for testing, the District may contract for the testing and charge the Customer for the expense, or discontinue water service.
- f. Backflow prevention assemblies must pass an annual inspection or more frequently if the risk of contamination warrants it, by being inspected, tested, and certified by an Approved Tester.
- g. All expenses for installation, inspection, testing, repair and maintenance of backflow prevention assemblies shall be borne by the customer.

6. Enforcement

Water service to any premises may be discontinued by the District if the backflow prevention assemblies have not met the conditions set forth in this regulation or if the General Manager has determined that a situation exists which could cause contamination of the District's water distribution system. All backflow prevention assemblies that do not pass a backflow prevention assembly test must be repaired and in proper working order within thirty (30) days, or such shorter time period as the District determines to be necessary to minimize the risk of contamination. Service will not be restored until the General Manager has determined that the risk of contamination to the District's water distribution system has been corrected.

a. Any person or persons, company, corporation or association, who willfully fails to properly install, or permit to be installed, backflow prevention assemblies as required by this regulation or who willfully by-passes, alters, removes or refuses to maintain a backflow prevention assembly, shall be guilty of a misdemeanor and upon conviction thereof shall be subject to a fine not exceeding \$500 or imprisonment in the county jail for a period not exceeding six months or both fine and imprisonment.

7. Severability

If any provision or part of this Ordinance is held to be invalid, or unenforceable in particular circumstances, such invalidity shall not affect the remainder of the Ordinance which shall continue to be of full force and effect and the Board declares this Ordinance to be severable for that purpose.

8. Publication

David R. Dickson Secretary of the District

a newspaper of general circulation in the Distric	ct within ten (10) days of its adoption.
PASSED AND ADOPTED this day of Board of Directors:	2013 by the following votes of the

MINUTES OF THE BOARD OF DIRECTORS MEETING

Tuesday, August 13, 2013

1) ROLL CALL: President Ken Coverdell called the meeting to order at 7:00 p.m. Present at roll call: Directors Chris Mickelsen, Bryan Hannegan, Bob Feldman and Vice-President Glenn Reynolds.

Also present were: David Dickson, General Manager, Joe Guistino, Superintendent of Operations, Patrick Miyaki, Legal Counsel; JoAnne Whelen, Administrative Assistant/Recording Secretary; Cathleen Brennan, Water Resources Analyst and Gina Brazil, Office Manager.

President Coverdell recognized distinguished members of the public in the audience: Leonard Woren, a representative of the Granada Sanitary District, and two former Half Moon Bay Mayors and former Coastside County Water District Board Members Albert Adreveno and John Muller.

- 2) PLEDGE OF ALLEGIANCE
- **PUBLIC COMMENT:** There were no public comments.
- 4) **PUBLIC HEARING**

Coastside County Water District Ordinance 2013-01 – Modifying Section W of the District's General Regulations Regarding Water Service Pertaining to the Control of Backflow and Cross Connections

Mr. Dickson advised that Mr. Guistino would follow with a presentation on backflow prevention, why it is a concern for the District and the reasons staff would like to modify the District's current Resolution addressing the General Regulations Regarding Water Service Pertaining to the Control of Backflow and Cross Connections.

Mr. Guistino gave a brief history of the District's cross-connection control program, reviewed the reasons for concern with backflow prevention and the District's legal responsibilities. He reviewed the reasons for the proposed modifications to the District's program, referencing the need to clarify the requirements. He explained that this proposed ordinance would simplify the process and would be consistent with the programs of other nation-wide utilities. In concluding the presentation, Mr. Guistino invited questions and comments from the Board members. Director Feldman expressed his appreciation for the presentation, noting that it did an excellent job of providing the clarity and insight that was requested from the Board at the July Board meeting on the issues related to the District's backflow program. Director Mickelsen expressed his concern with the customer's cost for the installation of the devices. Director Hannegan inquired about a proposed deadline for compliance and enforcement, and Vice-President Reynolds relayed that the policies for cross connection control programs have been State of California Regulations for many years.

<u>Public Hearing</u> - President Coverdell formally opened the Public Hearing at 7:29 p.m., inviting members of the public to present their questions, comments, and concerns about the proposed update to the District's Backflow and Cross Connection Program.

<u>Leonard Woren, El Granada, CA</u> – Stated that he is expressing his opinion as an individual. He commented that the backflow program should not apply to residential wells, that the District should provide the annual backflow device testing services, and that the District should specify a date for backflow program compliance. He also expressed concern with item 5c – "If the customer allows the backflow certification to lapse, the water will be turned off 48 hours after the expiration of the backflow certification".

<u>John Meador, Half Moon Bay, CA</u> - Stated that the criminal penalties specified in Section 6.b were extreme. He questioned why the District does not provide meters with a check-valve and said that the District should provide the annual testing service.

The public hearing continued, with Directors expressing numerous concerns regarding the proposed backflow ordinance and its implementation and making suggestions for proposed revisions. In response to questions about the required timing for approving the ordinance, Mr. Dickson explained that staff would prefer to address the Board's questions and suggestions with a revised ordinance to be presented at the next Board meeting. President Coverdell agreed with this approach and noted that he appreciated the additional time, which will allow continued opportunities for participation from the community.

<u>John Meador, Half Moon Bay, CA</u> - Suggested that customers could be allowed the choice of utilizing the District's services to handle their backflow requirements or retaining the services of private contractors to test and maintain their backflow assembly devices.

<u>Leonard Woren, El Granada, CA</u> – Commented on the Board's receptiveness to public comments and stated that he would like to see the District issue letters to all District customers, including residential customers.

Upon Mr. Miyaki's suggestion, President Coverdell announced that this public hearing will continue to remain open until a future meeting of the CCWD Board of Directors, in order to allow the public the continued opportunity to submit written and oral comments on the proposed ordinance.

5) CONSENT CALENDAR

- **A.** Approval of disbursements for the month ending July 31, 2013: Claims: \$757,909.58; Payroll: \$69,700.59; for a total of \$827,610.17 ➤ July 2013 Monthly Financial Claims reviewed by Director Mickelsen
- **B.** Acceptance of Financial Reports
- C. Approval of Minutes of July 9, 2013 Regular Board of Directors Meeting
- D. Monthly Water Transfer Report
- E. Installed Water Connection Capacity and Water Meters Report
- **F.** Total CCWD Production Report
- G. CCWD Monthly Sales by Category Report July, 2013
- H. July 2013 Leak Report
- I. Rainfall Reports
- J. San Francisco Public Utilities Commission Hydrological Conditions Report for July 2013

Director Mickelsen reported that he had reviewed the monthly financial claims and found all to be in order.

ON MOTION BY Director Hannegan and seconded by Vice-President Reynolds, the Board voted as follows, by roll call vote, to accept and approve the Consent Calendar, in its entirety:

Director Mickelsen	Aye
Vice-President Reynolds	Aye
Director Hannegan	Aye
Director Feldman	Aye
President Coverdell	Aye

6) MEETINGS ATTENDED / DIRECTOR COMMENTS

Vice-President Reynolds reported that he had recently attended the Utility Workers Union Conference in Chicago, Illinois, and stated that after listening to the issues facing utilities across the nation, he was impressed with the staff's success in leading such a well managed District.

7) GENERAL BUSINESS

A. 923 & 925 Miramontes Street - Water Service Agreement for a Non-Complex Pipeline Extension

Mr. Dickson provided a brief description of this project, which he indicated has been in the planning stages for many years.

John Muller, 923 *Miramontes St.*, *Half Moon Bay*, *CA* - Introduced himself and his father-in-law, Mr. Al Adreveno, who has resided at 935 Miramontes St. in Half Moon Bay for over 60 years. On behalf of both families, he thanked the District's Board and Staff for their consideration of this water service agreement, which will provide the opportunity for future generations to continue to farm at this location for many years.

ON MOTION BY Vice-President Reynolds and seconded by Director Feldman, the Board voted as follows, by roll call vote, to approve the Water Service Agreement between Coastside County Water District and John and Eda Muller and Albert and Eda Adreveno for construction of a pipeline extension to serve real properties at 923 and 925 Miramontes Street in Half Moon Bay:

Director Mickelsen	Aye
Vice-President Reynolds	Aye
Director Hannegan	Aye
Director Feldman	Aye
President Coverdell	Aye

B. Contract with Calcon Systems for Instrumentation and Controls Work

Mr. Dickson introduced two representatives from Calcon Systems, Ryan Smith, General Manager, and Rudy Everett, Project Manager. He explained the District's history with Calcon Systems, and explained why

staff does not believe it is practical or in the District's best interests to put instrumentation and controls work out for competitive bid. He recommended that the Board waive the competitive bidding requirements for work to be performed by Calcon Systems and authorize staff to contract with Calcon on a time and materials basis in an amount not to exceed \$250,000.

Discussion ensued with Mr. Dickson and Mr. Miyaki answering a few questions from the Board about the District's procurement policy, the scope of work proposed to be provided by Calcon and the expected deliverables. Director Hannegan suggested that staff provide the Board with some type of reporting, possibly on a monthly basis, to track the progress and funding expended on the various Calcon projects.

ON MOTION BY Vice-President Reynolds and seconded by Director Mickelsen, the Board voted as follows, by roll call vote, to waive the requirement in Resolution 2012-01 to solicit competitive bids and authorize the General Manager to enter into a time and materials agreement with Calcon Systems for instrumentation and controls work, in an amount not to exceed \$250,000:

Director Mickelsen	Aye
Vice-President Reynolds	Aye
Director Hannegan	Aye
Director Feldman	Aye
President Coverdell	Aye

Mr. Smith and Mr. Everett thanked the Board for the opportunity for the continued work with the District.

At 9:05 p.m. President Coverdell announced that there would be a brief recess. Director Hannegan reported that he had another commitment and would need to be excused from the meeting at this time, at which time he left the premises. The meeting reconvened at 9:08 p.m. with the remainder of the Board in attendance.

8) GENERAL MANAGER'S REPORT - INCLUDING MONTHLY INFORMATIONAL REPORTS

Mr. Dickson noted that he did not have any additional reports and referred the Board to the Superintendent's Operations Report.

A. Operations Report

Mr. Guistino reported on the monthly highlights, which included the El Granada Tank 2 renovations, and the Montecito Street PRV.

B. Water Resources Report

Ms. Brennan summarized the District's current public outreach program, which will now includes advertising space on grocery carts at Safeway in Half Moon Bay, which will feature water use efficiency advertisements, which staff feels will reach most of the District's customers.

9) DIRECTOR AGENDA ITEMS - REQUESTS FOR FUTURE BOARD MEETINGS

President Coverdell shared a flyer he created, reflecting the idea that CCWD and Montara Water and Sanitary District may join hands to help each other in the case of emergencies through an intertie.

President Coverdell took the opportunity to thank staff and adjourned the meeting at 9:15 p.m. The next meeting of the Coastside County Water District's Board of Directors will be on Tuesday, September 10, 2013.

	Respectfully submitted,
	David R. Dickson, General Manager Secretary of the District
Ken Coverdell, President Board of Directors

To: Coastside County Water District Board of Directors

From: Dave Dickson, General Manager

Agenda: September 10, 2013

Date: September 4, 2013

Subject: Notice of Completion - Avenue Portola Pipeline Replacement Project

Recommendation:

That the Board of Directors take the following actions:

- (1) Accept the Avenue Portola Pipeline Replacement Project as complete.
- (2) Authorize the Notice of Completion to be filed with the County of San Mateo.
- (3) Authorize the release of the retention funds when the Notice of Completion has been recorded and returned to the District.

Background

Coastside County Water District entered into a contract with Andreini Bros., Inc. on April 23, 2013 for the Avenue Portola Pipeline Replacement Project.

The work consisted of construction of 625 linear feet of 6 inch diameter PVC water pipeline, 65 linear feet of 4 inch diameter ductile iron drain pipeline, 7 customer service tubing reconnections, 2 concrete cutoff walls, and asphalt repaving of the trenches. The site of the work was in El Granada, an unincorporated community in San Mateo County. All work was within existing street right of way areas.

The project was completed on July 26, 2013. The project was constructed according to District specifications.

Fiscal Impact: None.

Agenda: September 10, 2013

Report

Date: September 5, 2013

Subject: Request for Board to Provide Authorization to Write Off Bad Debts

for Fiscal Year Ending 2012-2013

Recommendation:

Authorize staff to write off bad debts for fiscal year 2012-2013 (July 1, 2012 to June 30, 2013) in the total amount of \$8,404.28

Background:

The process of writing off bad debts takes place at the end of each fiscal year as part of the year-end closeout and audit process. At this time, staff requests that the Board authorize the General Manager to write off the debts that have not been collected throughout the fiscal year. The total for Fiscal Year 2012-2013 is \$8,404.28, as detailed in the attached table.

The majority of the bad debts are customers which have discontinued service with the District without rendering payment of their final closing bills. Staff efforts to locate the customers and collect payment on these accounts have been exhausted.

The following represents the bad debt amounts written off over the past five (5) fiscal years:

Year Ending 2012	\$57,084.74
Year Ending 2011	\$5,321.93
Year Ending 2010	\$5,809.52
Year Ending 2009	\$8,784.62
Year Ending 2008	\$6,356.36

Fiscal Impact

Charge to expenses of \$8,404.28. The Fiscal Year 2012-2013 budget (account No. 5620) includes an allowance of \$5,000 for bad debt.

COASTSIDE COUNTY WATER DISTRICT BAD DEBTS YEAR ENDING JUNE 30, 2013

From: Dave Dickson, General Manager

Agenda: September 10, 2013

Date: September 4, 2013

Subject: Award of Contract - Phase 2 Avenue Cabrillo Pipeline

Replacement Project

Recommendation:

Authorize General Manager to enter into a contractual agreement with Andreini Bros., Inc. to replace 1,890 linear feet of 6 inch diameter ductile iron water pipeline, 3 fire hydrants, 20 customer water service connections, and asphalt repaving of the trenches.

Background:

The results of the bid opening held on September 3, 2013, for the Phase 2 Avenue Cabrillo Pipeline Replacement Project (see attachment) were as follows:

\$332,855
\$357,510
\$459,585
\$475,994

Fiscal Impact:

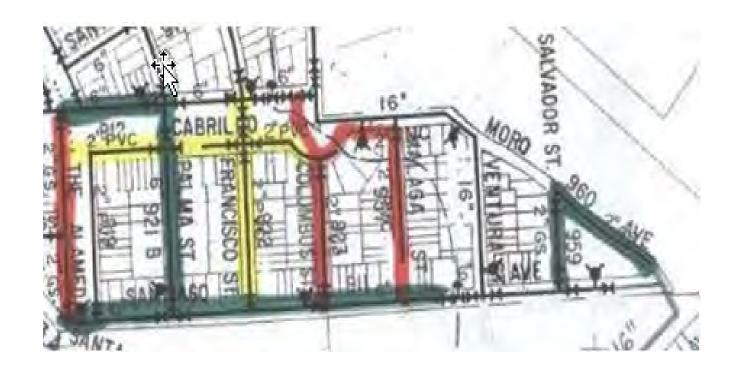

Funding for this project is included in the Fiscal Year 2013/2014 Capital Improvement Program Budget in the amount of \$246,000.

PHASE 2 - YELLOW

PHASE 3 - GREEN

To: Coastside County Water District Board of Directors

From: David Dickson, General Manager

Agenda: July 9, 2013

Report

Date: July 5, 2013

Subject: General Manager's Report

Recommendation:

None. Information only.

Background:

I'd like to highlight the following this month:

1. Effect of the Rim Fire on SFPUC water supply.

SFPUC staff did an excellent job of keeping BAWSCA and the wholesale customers informed of the impacts of the Rim Fire and the plans in place to deal with its potential effects on the Hetch Hetchy water supply. Although the fire reached the Hetch Hetchy watershed and some news reports implied a significant threat to water quality, there has been no detectable impact. Turbidity of the water flowing from the reservoir at a depth of 260 feet has remained at a constant, very low level. Depth profile samples taken last week when SFPUC staff could first access the reservoir indicated no significant change from pre-fire results. Because the fire has only affected 1% of the Hetch Hetchy watershed and the area involved is largely steep and rocky, SFPUC staff does not believe that high turbidity runoff into the reservoir will be an issue. The attached figure shows the extent of the fire and the watershed boundary.

2. Leak on Highway 92 potable water pipeline.

On September 5, District staff confirmed a leak east of La Nebbia Winery on the 12 inch welded steel potable water pipeline that runs next to Highway 92. This is the second leak on this pipeline within the last month and the third to occur recently near that location. These leaks further indicate the deteriorated condition of this pipeline, which is one of the oldest in the District. Repair of the September 5 leak has been particularly challenging due to the need to remove a very large eucalyptus tree between the pipe and the highway and to the water pipe's proximity to the PG&E high pressure gas line feeding the coastside. Staff will develop contingency plans to improve our response to additional leaks which may occur and evaluate options for accelerating replacement of this pipeline.

MONTHLY REPORT

To: David Dickson, General Manager

From: Joe Guistino, Superintendent of Operations

Agenda: September 10, 2013

Report

Date: September 4, 2013

Monthly Highlights

El Granada Tank 2 Renovation

Work has started on phase 1 of this project. The retaining wall is up and the site is being graded.

Main Break on Highway 92

A large hole in the 12" welded steel treated water line resulted in a loss of 600,000 gallons of water directly into Apanolia Creek. No environmental damage was observed.

Source of Supply

Crystal Springs Reservoir was the only source of supply in August.

System Improvements

Denniston Coagulation Tank

Crews replaced the drain valves on the Denniston coagulation tank since they were hard to operate and at the end of their useful life. The crew added an extension on the operating nuts to make them more ergonomic and easier to operate.

Lighting

Crews installed improved lighting over the chemical feed area at Nunes WTP.

Potassium Permanganate Screens

Treatment staff installed clean-out screens on the inlet line to the potassium permanganate pumps, eliminating problems with grit getting into the check valves of the pumps.

Other Activities Update:

Main Break on Highway 92

Around 8 pm on Saturday, 10 August, the 12" welded steel treated water main feeding the customers along highway 92 failed at the Apanolia Creek crossing. We estimate that we lost 600,000 gallons of water before we could get the line repaired. Crews inspected the Apanolia and Pilarcitos creeks where accessible and did not note any erosion damage or fish kills. The incident was reported to the Regional

Water Quality Control Board on Sunday, 11 August. The cause of the failure was pipe corrosion.

San Benito Pipeline Replacement

This is a 2" galvanized pipeline replacement project on the 600 block of San Benito Street south of Miramontes Street. We will be replacing 180' of the galvanized pipe with 4" ductile iron. The award of contract and notice to proceed were sent to Andreini Brothers Construction in August. We expect the project to be complete in September.

Harbor District Valve Replacement

We are in the planning phase of the Pillar Point Harbor valve replacement and backflow installation project. We are coordinating the install and modifications with the Harbor District in order to have as little impact as possible on the activities in the harbor.

Montecito Street Pressure Reducing Valve (PRV) Replacement

Andreini Bros. completed the replacement of the PRV at the junction of Montecito Street and Avenue Balboa in El Granada. This is the 4th valve to be replaced, with 7 more to go.

Safety/Training/Inspections/Meetings

Meetings Attended

- 13 August Gave a presentation at the Backflow Ordinance Public Hearing.
- 14 August Conference call with EKI, National Park Service (NPS) and Peninsula Open Space Trust (POST) on dredging spoils usage on a POST project.
- 14 August Bay Area Water Supply and Conservation Agency (BAWSCA) Water Quality Committee meeting.
- 16 and 22 August Met with Operation & Maintenance Supervisors to discuss changes in schedule.
- 20 August All employee meeting.
- 26 August Rim Fire update teleconference.

Safety Meetings and Training

There was no safety committee meeting scheduled for August.

The monthly CINTAS safety training on 14 August was on Electrical Safety, Lockout/Tagout Training and Excavation Safety. Patterson, Damrosch, Davis, Jack Whelen, Marshall Whelen, and Donovan were in attendance from Coastside County Water District (CCWD).

All field staff received Forklift Certification Training on Wednesday, 28 August.

Tailgate safety sessions in July

- 6 August Snake Bites: An Uncommon, But Severe, Outdoor Hazard
- 12 August Understanding Material Safety Data Sheets (MSDSs)
- 19 August Trench Safety: Serious Business
- 26 August Know What's Below: Call 811 Before You Dig

Other Training/Personnel Issues

-Started recruitment process for Treatment/Distribution Operator

-On 27 August, Treatment Supervisor Donovan sat on an interview panel for North Coast County Water District recruitment of a Maintenance Worker.

Projects

Hydraulic Model

Kennedy/Jenks Engineering is in the process of updating the hydraulic model of our distribution system. Staff will be conducting a series of hydrant tests in September with the assistance of the Coastside Fire Protection District to assist in calibrating the model. We are also in the process of acquiring static pressures from all of the hydrants in the system.

El Granada Tank 2 Renovation

District Engineer Jim Teter and I have been reviewing submittals for this important project. The contractor started work on Phase I of the project on 22 August. They have started excavation and completed the block retaining wall.

Avenue Cabrillo Project Phase 2

District Engineer Jim Teter completed the bid specs and drawings and they were reviewed by District Staff. A request for proposal was sent out in July with the bid opening date set for Tuesday, 3 September, at 14:00. Andreini Bros. Construction was the low bidder at \$332,855, exceeding the engineer's estimate of \$246,000.

To: Board of Directors

From: Cathleen Brennan, Water Resources Analyst

Agenda: September 10, 2013

Subject: Water Resources

This informational report includes:

• Fiscal Year 2013 Summary of the District's Clothes Washer Rebate Program

The District participated in a regional high efficiency clothes washer rebate program with the Bay Area Water Supply and Conservation Agency (BAWSCA) and Pacific Gas and Electric (PG&E). This joint water and energy rebate program was designed to offer customers of PG&E and participating water agencies a rebate from both utilities with one application. Information is available on-line at http://www.waterenergysavings.com/on high efficiency clothes washer rebate programs.

The District's program offered qualifying applicants a \$100 rebate, with each utility contributing \$50 towards the total rebate. In fiscal year 2013, qualifying clothes washers had to meet the Tier 3 standards of the Consortium for Energy Efficiency (CEE). Tier 3 was the highest efficiency level with a maximum water factor of 4.0, which means that a maximum of 4 gallons is required for each cubic foot of laundry. The modified energy factor for Tier 3 was 2.40, which means that it takes a maximum of 1- kWh of electricity to wash and dry 2.4 cubic feet of laundry.

The District approved 121 rebate applications, denied 4 and performed 17 inspections to verify installation. The District's goal is to inspect at least 10 percent of all clothes washer rebates. Staff time is estimated at about 2.5 hours a week to process rebate applications, enter data and perform inspections. The average water factor of rebated washing machines was 3.43 and the average purchase price of rebated washing machines was \$756.

Number of Rebates Approved	Number of Inspections Performed	Total Cost of Rebates Approved by the District	PG&E and BAWSCA Fees Charged to the District	Estimated Annual Water Savings (gallons)
121	17	\$6,050	\$1,667	787,020
	\$7,717
