COASTSIDE COUNTY WATER DISTRICT

766 MAIN STREET

HALF MOON BAY, CA 94019

MEETING OF THE BOARD OF DIRECTORS

Tuesday, September 13, 2011 - 7:00 p.m.

AGENDA

The Coastside County Water District (CCWD) does not discriminate against persons with disabilities. Upon request, the agenda and agenda packet materials can be provided in a format to accommodate special needs. If you require a copy of the agenda or related materials in an alternative format to accommodate a disability, or if you wish to attend this public meeting and will require special assistance or other special equipment, please call the District at (650) 726-4405 in advance and we will make every reasonable attempt to provide such an accommodation.

All public records relating to an open session item on this agenda, which are not exempt from disclosure pursuant to the California Public Records Act, that are distributed to a majority of the legislative body will be available for public inspection at the CCWD District Office, located at 766 Main Street, Half Moon Bay, CA at the same time that the public records are distributed or made available to the legislative body.

This agenda and accompanying materials can be viewed on Coastside County Water District's website located at: www.coastsidewater.org.

The Board of the Coastside County Water District reserves the right to take action on any item included on this agenda.

- 1) ROLL CALL
- 2) PLEDGE OF ALLEGIANCE
- 3) PUBLIC COMMENTS

At this time members of the public may address the Board of Directors on issues not listed on the agenda which are within the purview of the Coastside County Water District. Comments on matters that are listed on the agenda may be made at the time the Board is considering each item. Each speaker is allowed a maximum of three (3) minutes and must complete and submit a speaker slip. The President of the Board will recognize each speaker, at which time the speaker should proceed to the podium, give their name and address and provide their comments to the Board.

4) CONSENT CALENDAR

The following matters before the Board of Directors are recommended for action as stated by the General Manager.

All matters listed hereunder constitute a Consent Calendar, are considered as routine by the Board of Directors, and will be acted upon by a single vote of the Board. There will be no separate discussion of these items unless a member of the Board so requests, in which event the matter shall be removed from the Consent Calendar and considered as a separate item.

- **A.** Approval of disbursements for the month ending August 31, 2011: Claims: 634,575.21; Payroll: \$ 72,248.33; for a total of \$706,823.54 (attachment)
- **B.** Acceptance of Financial Reports (attachment)
- C. Approval of Minutes of August 9, 2011 Board of Directors Meeting (attachment)
- **D.** Monthly Water Transfer Report (attachment)
- E. Installed Water Connection Capacity and Water Meters Report and Non-Priority Lottery Recipients Status Update Report (attachment)
- F. Total CCWD Production Report (attachment)
- G. CCWD Monthly Sales by Category Report (attachment)
- H. August 2011 Leak Report (attachment)
- **I.** Rainfall Reports (attachment)
- J. San Francisco Public Utilities Commission Hydrological Conditions Report for July 2011 (<u>attachment</u>)
- **K.** San Francisco Public Utilities Commission Hydrological Conditions Report for August 2011 (attachment)
- L. El Granada Pump Station (PS) # 1 Pump and Motor Replacement (attachment)
- **M.** Purchase of Crystal Springs Check Valve (<u>attachment</u>)

5) MEETINGS ATTENDED / DIRECTOR COMMENTS

6) GENERAL BUSINESS

A. District Customer Survey Results (<u>attachment</u>)

7) GENERAL MANAGER'S REPORT INCLUDING MONTHLY INFORMATIONAL REPORTS (attachment)

- November Election
- Pacifica Community Television
- 925 Main Street Connection Purchase Refund
- Crystal Springs Pump Station Intake Valve Actuators
- A. Operations Report (attachment)
- **B.** Water Resources Report (<u>attachment</u>)
- 8) DIRECTOR AGENDA ITEMS REQUESTS FOR FUTURE BOARD MEETINGS
- 9) ADJOURNMENT

MINUTES OF THE MEETING OF THE BOARD OF DIRECTORS

Tuesday, August 9, 2011

1) ROLL CALL - President Bob Feldman called the meeting to order at 7:00 p.m. Present at roll call: Director Ken Coverdell, Vice-President Jerry Donovan, and Director Jim Larimer. Director Chris Mickelsen arrived at 7:03 p.m.

Also present were: David Dickson, General Manager; Patrick Miyaki, Legal Counsel; Joe Guistino, Superintendent of Operations; Cathleen Brennan, Water Resources Analyst; JoAnne Whelen, Administrative Assistant/Recording Secretary; and Gina Brazil, Office Manager.

- 2) PLEDGE OF ALLEGIANCE
- 3) PUBLIC COMMENTS There were no public comments.
- 4) CONSENT CALENDAR
 - **A.** Approval of disbursements for the month ending July 31, 2011: Claims: \$521,573.37; Payroll: \$70,475.42; for a total of \$592,048.79
 - **B.** Acceptance of Financial Reports
 - C. Approval of Minutes of July 12, 2011 Board of Directors Meeting
 - **D.** Installed Water Connection Capacity and Water Meters Report and Non-Priority Lottery Recipients Status Update Report
 - E. Total CCWD Production Report
 - F. CCWD Monthly Sales by Category Report
 - **G.** July 2011 Leak Report
 - H. Rainfall Reports
 - I. Request for Board to Provide Authorization to Write Off Bad Debts for Fiscal Year 2010-2011

Director Larimer reported that he had reviewed the monthly financial claims and found all to be in order.

ON MOTION BY Director Coverdell and seconded by Director Mickelsen, the Board voted as follows, by roll call vote, to accept and approve the Consent Calendar in its entirety:

Director Coverdell	Aye
Vice-President Donovan	Aye
Director Larimer	Aye
Director Mickelsen	Aye
President Feldman	Aye

5) MEETINGS ATTENDED / DIRECTOR COMMENTS

Director Coverdell reported on the July 21, 2011 Bay Area Water Supply and Conservation Agency (BAWSCA) Board of Directors meeting he had attended, which included an update on the analysis of the current contracts associated with San Francisco Public Utilities Commission's projects.

6) GENERAL BUSINESS

A. Nunes Water Treatment Plant Flocculator Drive Purchase

Mr. Guistino provided the background of this project, and explained that this is the third and final phase of a three year replacement project initially approved by the Board in November of 2009. Mr. Guistino and Mr. Dickson answered several questions from the Board about the purchase.

ON MOTION BY Vice-President Donovan and seconded by Director Mickelsen, the Board voted as follows, by roll call vote, to authorize the purchase and installation of three new flocculator drives for the Nunes Water Treatment Plant at a total project cost of approximately \$50,000.00, with a waiver of the District's procurement policy for this particular purchase:

Director Coverdell	Aye
Vice-President Donovan	Aye
Director Larimer	Aye
Director Mickelsen	Aye
President Feldman	Aye

B. <u>Association of California Water Agencies (ACWA) Region 5 Election for</u> 2012-2013 Term

Mr. Dickson introduced this item and suggested that President Feldman may have some comments about the individual candidates, as well as ACWA's submission of the recommended slate.

President Feldman suggested that the Board vote for ACWA's Region 5 Nominating Committee's Recommended Slate.

ON MOTION BY President Feldman and seconded by Vice-President Donovan, the Board voted as follows, by roll call vote, to direct staff to complete and submit the ACWA Region 5 Board Ballot for the 2012-2013, term, voting to concur with the Region 5 Nominating Committee's recommended slate:

Director Coverdell Aye
Vice-President Donovan Aye
Director Larimer Aye
Director Mickelsen Aye
President Feldman Aye

7) GENERAL MANAGER'S REPORT INCLUDING MONTHLY INFORMATIONAL REPORTS

- 1. Nurserymen's Exchange Bankruptcy Mr. Dickson provided an update to the Board on the bankruptcy process and reported that the bankruptcy court has acknowledged the District's unsecured creditor claim for \$50,243.65 in pre-petition water service charges. He also advised that escrow closed on August 5, 2011 on the sale of Nurserymen Exchange's assets to Floramoda, a subsidiary of Monterey Peninsula Horticulture, and that the new company will continue Nurserymen's operations and be responsible for water service accounts as of that date.
- 2. <u>I-Bank Loan Approval</u> Mr. Dickson stated that he had attended the I-Bank Board of Directors meeting on July 26, 2011 and that the loan for the District's Denniston Creek Water Treatment Plant Improvements Project had been approved in the amount of \$6,756,500. He advised that the loan has a 30 year term at an interest rate of 2.79% (plus a 0.3% annual fee), and that he anticipated bringing the final

agreement to the Board for approval at the September CCWD Board of Directors meeting.

- 3. <u>Customer Survey</u> Mr. Dickson explained that as part of an effort to develop a communications plan for the District, staff has worked with a consultant to conduct a survey of the District's customers. He reviewed the results of the approximately 550 responses received to date and indicated that the final survey results and a communications plan would be presented in more detail to the Board at the September Board of Directors meeting.
- 4. <u>Denniston Project Construction</u> Mr. Dickson reported that the initial pre-construction meeting had been conducted with Anderson Pacific, EKI, and Kennedy/Jenks and that work is expected to begin on the site, starting with the shoring, on September 5, 2011.

A. Operations Report

Mr. Guistino reviewed the highlights of his report, including the recent inspection of the tunnel located at the Crystal Springs Pump Station, which identified some necessary repairs to the water intake valves. He also reported on the status of the digitized system maps and development of Global Positioning System (GPS) mapping of all District field assets and the current lead and copper testing program.

B. Water Resources Report

Ms. Brennan reported that the District had received a certificate of appreciation for partnering and contributing to the Environmental Protection Agency WaterSense program and reviewed the regional Water Use Efficiency Rebate Programs currently instituted through BAWSCA.

9) DIRECTOR AGENDA ITEMS - REQUESTS FOR FUTURE BOARD MEETINGS

There were no comments or requests from the Board members.

10) ADJOURMENT

Board of Directors

ON MOTION BY Director Mickelsen and seconded by Director Larimer, the Board voted as follows, to adjourn the August 9, 2011 meeting of the Coastside County Water District's Board of Directors:

Director Coverdell	Aye
Vice-President Donovan	Aye
Director Larimer	Aye
Director Mickelsen	Aye
President Feldman	Aye

The meeting was adjourned at 7:37 p.m. The next Special Board of Directors meeting is scheduled for Tuesday, September 13, 2011.

Respectfully submitted,

David R. Dickson, General Manager Secretary of the Board

Robert C. Feldman, President

STAFF REPORT

To: Coastside County Water District Board of Directors

From: David Dickson, General Manager

Agenda: September 13, 2011

Report

Date: September 1, 2011

Subject: Monthly Water Transfer Report

Recommendation:

None. For Board information purposes only.

Background:

At the December 10, 2002 Board meeting and November 18, 2003 Special Board meeting, the Board made several changes to the District's water transfer policy. One of the changes directed the General Manager to approve routine water transfer applications that met the District's criteria as embodied in Resolution 2002-17 and Resolution 2003-19. The General Manager was also directed to report the number of water transfers approved each month as part of the monthly Board packet information.

Since the previous Board meeting in May 2011, one transfer application was approved for two -5/8" (20 gpm) non-priority water service connections. A spreadsheet reporting this transfer follows this report as well as the approval memorandum from Patrick Miyaki and the confirmation letter from Glenna Lombardi.

APPROVED WATER TRANSFERS FOR THE 2011 CALENDAR YEAR

Memorandum

VIA ELECTRONIC MAIL

TO: Glenna Lombardi

FROM: Patrick T. Miyaki

DATE: August 30, 2011

RE: Application to Transfer Uninstalled Non-Priority Water Service Connections

from Keenan Trust to Johnson

Glenna, I reviewed the Application to transfer two 5/8-inch uninstalled non-priority water service connections from property owned by Charles J. Keenan, III, Trustee (APN 115-520-170) to property owned by Diane C. Johnson (APN 048-124-210).

This Application is generally in order and satisfies the requirements of the District's General Regulations Regarding Water Service, Section U, Transfer of Uninstalled Water Service Connection Rights.

Please do not hesitate to contact me if you have any questions or want to discuss this matter in more detail.

cc: David Dickson

Charles J. Keenan III, Trustee C/O Joyce Yamagiwa, Trustee 700 Emerson Street Palo Alto, CA 94301

Diane C. Johnson 504 Washington Boulevard Half Moon Bay, CA 94019

RE: Request to Transfer Uninstalled Non-Priority Crystal Springs Project Water Service Connections

Dear Property Owners:

We are pleased to confirm that the Coastside County Water District has **approved** your request to transfer two---5/8" (20 gpm) uninstalled, non-priority Crystal Springs Project water service connections. The result of this transfer is as follows:

- **APN 115-520-170** continues to have the remaining rights to 90 (ninety) 5/8" (20 gpm) uninstalled, non-priority water service connections from the Crystal Springs Project; and
- **APN 048-124-210** now has two---5/8" (20 gpm) uninstalled non-priority water service connections from the Crystal Springs Project assigned to it.

Please be advised that the City Council of the City of Half Moon Bay has taken the position that the transfer of a water service connection meets the definition of "development" so as to require a coastal development permit from the City. Applicants are advised to investigate this issue further with the Half Moon Bay Planning Department if applicable. The Coastside County Water District, in approving this application, does not make any representations or warranties with respect to further permits or approvals required by other governmental agencies, including the City of Half Moon Bay.

Sincerely,

Glenna Lombardi

Cc: David Dickson, General Manager

San Francisco Public Utilities Commission Hydrological Conditions Report For July 2011

J. Chester, B. McGurk, A. Mazurkiewicz, & M. Tsang, August 5, 2011

Cherry Creek Diversion Dam and Intake Structure: This system on Cherry Creek was the earliest diversion structure built in 1916 as an initial step of the Hetch Hetchy project. This structure diverts water from Cherry Creek into the Lower Cherry Aqueduct which leads to Early Intake. In its earliest function, water released from Lake Eleanor down Cherry Creek was diverted to the original 3 MW powerhouse at Early Intake which produced all of the energy needed to construct O'Shaughnessy Dam as well as power Groveland. The last time the structure was put into full use was during the 1988-1991 drought. Water was diverted from Cherry Creek (below Lake Eleanor and Cherry Reservoir) to augment the water diverted from the Hetch Hetchy watershed.

Current Tuolumne System and Local Bay Area storage conditions are summarized in Table 1.

Table 1 Current Storage As of August 1, 2011							
Reservoir	Current	Storage	Maximu	Maximum Storage		Capacity	Percent of Maximum Storage
	Acre-Feet	Millions of Gallons	Acre-Feet	Millions of Gallons	Acre-Feet	Millions of Gallons	_

¹/Maximum Hetch Hetchy Reservoir storage with drum gates activated.

Hetch Hetchy System Precipitation Index 5/

Current Month: The July six-station precipitation index was 0.03 inches, or 10.2% of the average index for the month. The only measured precipitation event was a thunderstorm in late July, however the measurement is not representative of the event because it was an intense localized event in the high country. A second thunderstorm also occurred and caused a rise in Hetch Hetchy inflow, but it was not measured by any of the precipitation gages.

Cumulative Precipitation to Date: The accumulated six-station precipitation index for water year 2011 is 58.81 inches, which is 165.3% of the average annual water year total, or 169.4% of the average annual-to-date. The Hetch Hetchy gauge is shown in Figure 1 in red, and is well above the median line.

² Maximum Cherry Reservoir storage with all flash-boards in.

³/ Maximum Lake Eleanor storage with all flash-boards in.

^{4/} Available capacity does not take into account current DSOD storage restrictions.

⁵/The precipitation index is computed using six Sierra precipitation stations and is an indicator of the wetness of the basin for the water year to date. The index is computed as the average of the six stations and is expressed in inches and in percent.

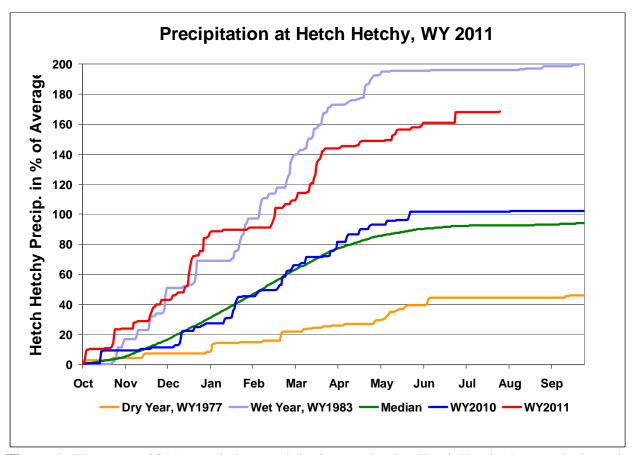

Figure 1: Water year 2011 cumulative precipitation received at Hetch Hetchy Reservoir through the end-of-month July. Precipitation curves for wet, dry, median, and WY 2010 years for the station at Hetch Hetchy are included for comparison purposes.

Tuolumne Basin Unimpaired Inflow

Unimpaired inflow to SFPUC reservoirs and the Tuolumne River at La Grange as of July 31st is summarized below in Table 2. Snowmelt inflows are well above normal and the remainder of the snowmelt runoff recession will continue into early August.

Table 2 Unimpaired Inflow Acre-Feet								
		July	2011		Octobe	r 1, 2010 tl	rough July	31, 2011
i	Observed Flow	Median ⁶	Average ⁶	Percent of Average	Observed Flow	Median ⁶	Average ⁶	Percent of Average
Inflow to Hetch Hetchy Reservoir	295,053	42,984	74,751	394.7%	1,312,862	699,887	727,677	180.4%
Inflow to Cherry Reservoir and Lake Eleanor	114,845	12,155	25,314	453.7%	788,278	439,790	446,466	176.6%

Water Available to the City	303,018	1,301	45,899	660.2%	1,980,559	620,855	780,847	253.6%

⁶ Hydrologic Record: 1919 – 2010

Hetch Hetchy System Operations

Draft and releases from Hetch Hetchy Reservoir in July totaled 275,669 acre-feet which met SJPL deliveries, fisheries releases, and reservoir management goals. Due to the late seasonal snowmelt and reservoir management, Hetch Hetchy Reservoir filled on July 9th and remained full and spilling through the month. Additional releases through valves and the spillway continued through the month and will continue into early August.

A total of 85,595 acre-feet of power draft and valve releases were made at Cherry Reservoir to manage reservoir elevation and to support the City's Municipal load, District Class 1, other loads or accounts, and sales. Both Cherry Reservoir and Lake Eleanor were full through most of July. As snowmelt runoff has receded in the Cherry Creek drainage, inflow to Cherry Reservoir has been augmented by pumping 1,708 acre-feet of water from Lake Eleanor in late July to maintain a high elevation at Cherry Reservoir and minimize the spill at Lake Eleanor.

Local System Treatment Plant Production

The Sunol Valley Water Treatment Plant average production rate for the month of July was 32 MGD, and the Harry Tracy Water Treatment Plant rate averaged 28 MGD.

Local System Water Delivery

The water delivery rate for the month averaged 260 MGD. This is a 5 % increase over the June average rate of 247 MGD.

Local Precipitation

The seasonal inland push of coastal stratus over the western watersheds resulted in fog-derived moisture measured at the Pilarcitos and Lower Crystal Springs rain gauges. The July rainfall summary is presented in Table 3.

Table 3 Precipitation Totals At Three Local Area Reservoirs For July 2011						
Reservoir	Month Total (inches)	Percentage of Normal for the	Water Year To Date 7	Percentage of Normal for the		
Pilarcitos	0.08	Month 100 %	(inches) 48.55	Year-to-Date 7		
Lower Crystal Springs	0.03	75 %	30.43	114 %		
Calaveras	0.00	0 %	26.07	122 %		

⁷ WY 2011: Oct. 2010 through Sep. 2011

Snowmelt and Water Supply

The exceptional snowpack of water year 2011 supported high inflows through the entire month of July. While inflows to Cherry Reservoir and Lake Eleanor have greatly receded, spill and releases from Hetch Hetchy will continue into the second week of August. The extended snowmelt runoff has left all three up country reservoirs with high storage levels for this point in the summer. In addition to snowmelt, the Hetch Hetchy watershed experienced two significant thunderstorms in July, which were not completely captured by any of the precipitation gages, but their impacts can be clearly seen in the inflow hydrograph. April through July inflows for the Tuolumne at La Grange is the 7th highest on record and the 5th highest for Hetch Hetchy. The recorded precipitation at the gauge at Hetch Hetchy for water year 2011 is the third highest on record (just 1.42 inches from being second).

The summer of 2011 has remained relatively cool. Seasonal forecasts predict that this pattern will continue into the early fall. Long-term seasonal forecasts are inconclusive for the precipitation forecast. The general cool conditions throughout the spring and summer has resulted in low water delivery demands. Water deliveries from the Hetch Hetchy system have remained below diversion capacity and are not expected to increase to capacity through the remainder of summer and fall.

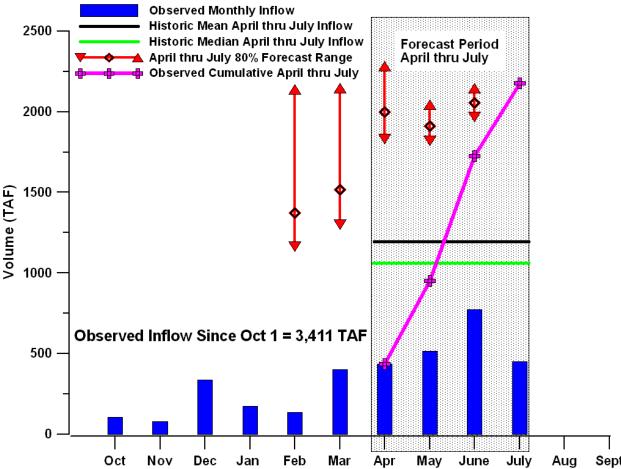

Figure 2: Water Year conditions for the Tuolumne River at La Grange and for the 80% water supply forecast range (triangles represent the 90% and 10% forecasts, the open diamond represents the median forecast).

The Tuolumne Basin Water Supply Forecast Model was executed on June 1st using the measured snow course, precipitation, and runoff data. The forecast indicated that the median amount of runoff that may occur this April-through-July was about 190% of the long-term median (Figure 2). The median forecast for April-through-July runoff was about 2,055 TAF, compared to the long-term median runoff of 1,080 TAF. For natural flow at La Grange, the forecast predicted an 80 percent chance that the April-through-July natural runoff would be between 1,970 TAF and 2,145 TAF. The observed April-July inflow was 2,177 TAF at La Grange. The disparity between the June 1st forecast and the observed inflow is due to the contribution of the significant late-June storm event and late-July thunderstorms. These events contributed approximately 120 TAF additional inflows. The late-June storm event brought June precipitation to 445% of normal for the Hetch Hetchy gage. This type of event is uncommon in June and not captured in the forecast prediction.

303,018 acre-feet of water became available to the City in July, which is 660% of normal, raising the water-year total to 1,980,599 acre-feet (Figure 3).

Unimpaired Flow at La Grange & Water Available to the City

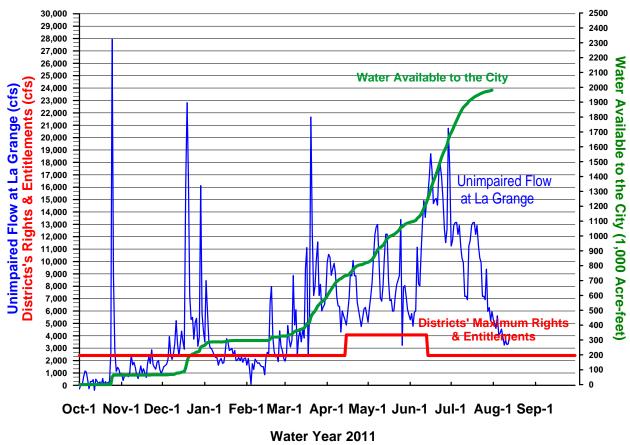

Figure 3: Calculated unimpaired flow at La Grange and the allocation of flows between the Districts and the City. Water available to the City for the period from October 1st, 2010 through July 31st, 2011 was 1,980,559 acre-feet.

San Francisco Public Utilities Commission Hydrological Conditions Report For August 2011

J. Chester, A. Mazurkiewicz, & M. Tsang, September 8, 2011

The **New Lake Merced Pump Station** (LMPS) supplies water to the in-City Sunset and Sutro Reservoirs. LMPS is located in the southwest corner of San Francisco adjacent to Lake Merced. The Stations' pumps boost regional water traveling north from the peninsula via the Sunset Supply Pipeline up into the Sunset and Sutro Reservoirs where in combination these two reservoirs supply 60% of San Francisco. The New LMPS will meet seismic standards and will ensure water reliability for San Francisco citizens well into the future (photos courtesy of Colin Patton, WISP)

Current Tuolumne System and Local Bay Area storage conditions are summarized in Table 1.

Table 1 Current Storage As of September 1, 2011

^{1/}Maximum Hetch Hetchy Reservoir storage with drum gates activated.

Hetch Hetchy System Precipitation Index 5/

Current Month: August is typically a dry month and this August the six-station precipitation index was 0.01 inches, or 3.7% of the average index for the month.

Cumulative Precipitation to Date: The accumulated six-station precipitation index for water year 2011 is 58.82 inches, which is 165.3% of the average annual water year total, or 168.8% of the average annual-to-date. The Hetch Hetchy gauge is shown in Figure 1 in red, and is well above the median line.

Maximum Cherry Reservoir storage with all flash-boards in.
 Maximum Lake Eleanor storage with all flash-boards in.

^{4/} Available capacity does not take into account current DSOD storage restrictions.

^{5/}The precipitation index is computed using six Sierra precipitation stations and is an indicator of the wetness of the basin for the water year to date. The index is computed as the average of the six stations and is expressed in inches and in percent.

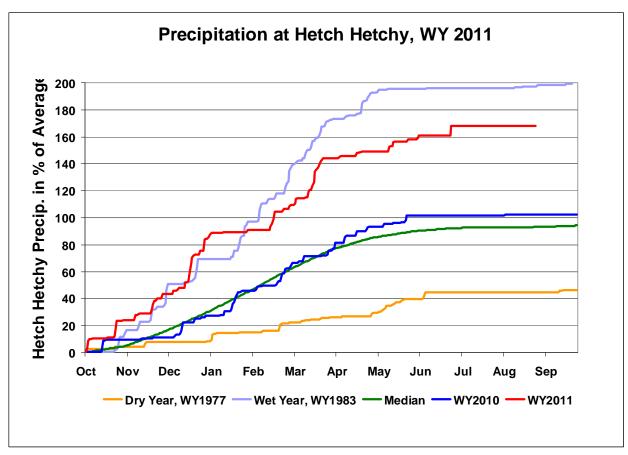

Figure 1: Water year 2011 cumulative precipitation received at Hetch Hetchy Reservoir through the end-of-month August. Precipitation curves for wet, dry, median, and WY 2010 years for the station at Hetch Hetchy are included for comparison purposes.

Tuolumne Basin Unimpaired Inflow

Unimpaired inflow to SFPUC reservoirs and the Tuolumne River at La Grange as of August 31st is summarized below in Table 2. Inflows to the reservoirs were above normal due to the continued snowmelt runoff and late recession to summer baseflow conditions.

Table 2 Unimpaired Inflow Acre-Feet								
		Augus	t 2011		October	1, 2010 thr	ough Augus	st 31, 2011
	Observed Flow	Median ⁶	Average ⁶	Percent of Average	Observed Flow	Median ⁶	Average ⁶	Percent of Average
Inflow to Hetch Hetchy

Tuolumne River at La Grange	71,985	16,414	24,445	294.5%	3,483,377	1,760,943	1,832,129	190.1%
Water Available to the City	967	0	1,363	97%	1,981,526	620,855	782,289	253.3%

⁶ Hydrologic Record: 1919 – 2010

Hetch Hetchy System Operations

Draft and releases from Hetch Hetchy Reservoir in August totaled 59,395 acre-feet which met SJPL deliveries, fisheries releases, and reservoir management goals.

A total of 31,801 acre-feet of power draft was made at Cherry Reservoir to manage reservoir elevation and to support the City's Municipal load, District Class 1, other loads or accounts, and sales. A total of 10,314 acre-feet of water was transferred from Lake Eleanor to Cherry Reservoir in August to maintain a high elevation at Cherry Reservoir and to lower Lake Eleanor for scheduled maintenance work on the spillway

Local System Treatment Plant Production

The Sunol Valley Water Treatment Plant average production rate for the month of August was 13 MGD; for the month, the plant was off-line 9 of 31 days for maintenance. The Harry Tracy Water Treatment Plant rate averaged 25 MGD.

Local System Water Delivery

The water delivery rate for the month averaged 262 MGD. The change in delivery rate between July and August remained relatively flat with the August rate up by less than 1 % over the July average rate of 260 MGD.

Local Precipitation

The continued inland push of summer coastal stratus over the western watersheds resulted in small amounts fog-derived moisture measured at the Pilarcitos and Lower Crystal Springs rain gauges. The eastern watersheds remained dry with the last measurable precipitation occurring in June. The August rainfall summary is presented in Table 3.

Table 3 Precipitation Totals At Three Local Area Reservoirs For August 2011					
Reservoir	Month Total (inches)	Percentage of Normal for the Month	Water Year To Date ⁷ (inches)	Percentage of Normal for the Year-to-Date ⁷	
Pilarcitos	0.03	21 %	48.66	125 %	
Lower Crystal Springs	0.03	33 %	30.49	114 %	
Calaveras	0.00	0 %	26.07	121%	

⁷ WY 2011: Oct. 2010 through Sep. 2011

Snowmelt and Water Supply

The cool and wet water year of 2011 has continued to contribute elevated inflows to the Tuolumne River watershed. Flows on the mainstem of the Tuolumne above Hetch Hetchy on September 1st were near 140 cfs as compared to 30 cfs on September 1st, 2010. While inflows continue to recede the reservoirs remain above typical September 1st storage volumes. The month of September does not typically bring significant precipitation and it is expected to remain relatively warm and dry, with occasional mountain thunderstorms. At this point, the 3-month outlook does not show any indication of what to expect for the up coming fall or winter.

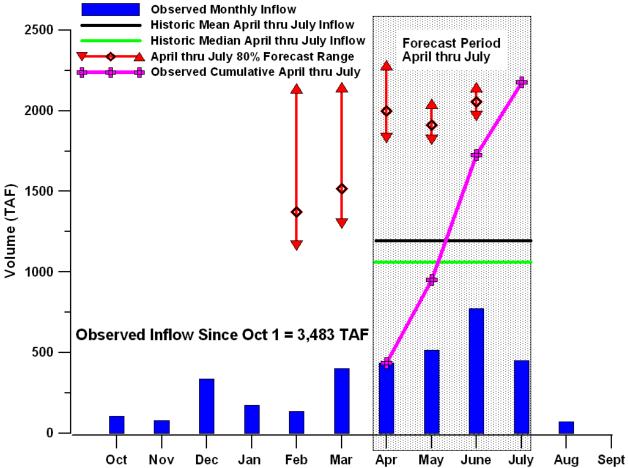

Figure 2: Water Year conditions for the Tuolumne River at La Grange and for the 80% water supply forecast range (triangles represent the 90% and 10% forecasts, the open diamond represents the median forecast).

The Tuolumne Basin Water Supply Forecast Model was executed on June 1st using the measured snow course, precipitation, and runoff data. The forecast indicated that the median amount of runoff that may occur this April-through-July was about 190% of the long-term median (Figure 2). The median forecast for April-through-July runoff was about 2,055 TAF, compared to the long-term median runoff of 1,080 TAF. For natural flow at La Grange, the forecast predicted an 80 percent chance that the April-through-July natural runoff would be between 1,970 TAF and 2,145 TAF. The observed April-July inflow was 2,177 TAF at La Grange.

967 acre-feet of water became available to the City in August, which is 97% of normal, raising the water-year total to 1,981,526 acre-feet (Figure 3).

Unimpaired Flow at La Grange & Water Available to the City

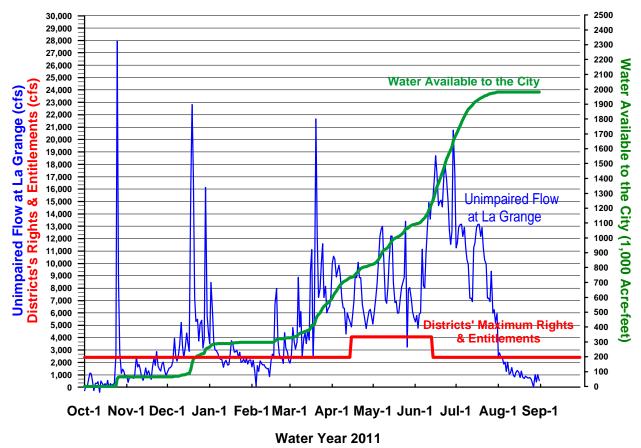

Figure 3: Calculated unimpaired flow at La Grange and the allocation of flows between the Districts and the City. Water available to the City for the period from October 1st, 2010 through August 31st, 2011 was 1,981,526 acre-feet.

From: Joe Guistino

Agenda: September 13, 2011

Report

Date: September 8, 2011

Subject: El Granada Pump Station (PS) #1 pump and motor replacement

Recommendation: Authorize staff to award a contract for El Granada Pump Station #1 pump and motor replacement to Pump Repair Service Co. for \$18,101.59

Background: The El Granada Pump Stations 1 and 2 were originally designed for a capacity of 150 gpm and 175 gpm respectively and each consist of two identical pumps. We have installed one 250 gallon per minute (gpm) unit previously at both stations and recent improvements to the electrical panel at El Granada PS #1 will now enable us to complete this retrofit at that site by the installation of the second 250 gpm unit. The existing pump is the original unit, having been rebuilt on a number of occasions. The last time that a pump failed in El Granada PS 1, Pump Repair recommended that we install larger units so that the station would not run as much, reducing noise from the station and wear and tear on the pump. Under the direction of District Engineer Jim Teter, we are changing these stations to allow them to deliver water at 225 gpm under normal circumstances and at up to 400 gpm in the event of a sudden demand in the El Granada Highlands. This project includes a new 20 HP motor to drive the pump.

Staff has solicited two informal bids for the job per policies and procedures for purchases under \$25,000. Pump Repair Service was the low bidder.

Fiscal Impact: The Fiscal Year 2011/12 to 2020/21 Capital Improvement Budget allotted \$23,000 for station upgrades.

To: Coastide County Water District Board of Directors

via David Dickson, General Manager

From: Joe Guistino

Agenda: September 13, 2011

Report

Date: September 8, 2011

Subject: Purchase of Crystal Springs Check Valve

Recommendation:

Authorize staff to purchase a new 12" check valve for the Crystal Springs Pump Station from Pump Repair Service Company for a total cost of \$25,961.

Background:

Large pump stations like Crystal Springs that pump water to high elevations require check valves to prevent the water from flowing back to the source, causing the pumps and motors to spin in reverse. Each of the three pumps has a 12" check valve. These valves were installed in 1992 and are reaching the end of their useful life.

In the last two years, we have replaced the main 18" check valve for the station and the 12" check valve for the 500 horsepower pump. The Capital Improvement Program calls for replacing one of the remaining two check valves this fiscal year, and the final one in Fiscal Year 2012-2013.

Bids received from Pump Repair Inc. and E & M are as follows:

Pump Repair Inc. - \$25,961 E & M - \$32,771

The lead time for these specialty items is 4 months. The replacement work would be scheduled for January/February 2012.

Fiscal Impact:

Cost of \$25,961. The Capital Improvement Program budget includes \$25,000 for this work.

Agenda: September 13, 2011

Report

Date: September 9, 2011

Subject: Customer Survey Results

Recommendation:

None. Information only.

Background:

The District's Customer Survey, mentioned in the General Manager's Report at the August Board meeting, closed on August 13. As the attached summary shows, 520 people responded to the survey. We felt that this was an excellent response rate and that the answers should be representative of our customer base.

Overall, the survey results provide some positive feedback, as well as identifying some opportunities to improve communication with our customers:

- 65% of the District's customers rated service as good or excellent.
- 18% a significant percentage of customers have attended a Board meeting or watched on television or Coastsidewater.org.
- 82% of our customers do not have a clear understanding of how the District spends their money.
- 50% of customers perceive overall District management as good or excellent.
- A high percentage 43% of customers have visited our website.
- Over half of our customers would prefer to receive District information by email.
- Our customers place a high priority on reliability and quality of water service.

With the assistance of our communications consultant, staff has been using the survey results in developing a plan to improve communications with our customers. We will present the plan to the Board at the October 11 meeting.

To: Coastside County Water District Board of Directors

From: David Dickson, General Manager

Agenda: September 13, 2011

Report

Date: September 8, 2011

Subject: General Manager's Report

Recommendation:

None. Information only.

Background:

For this month's report, I would like to highlight the following:

1. November Election

Because only three candidates filed by the August 17 deadline for three open Board seats, there will be no need for a District election on November 8. Following certification of the election results in November, the County will send certificates of appointment in lieu of election for Ken Coverdell, Glenn Reynolds, and Bryan Hannegan. The terms of these directors will begin at the December 13 meeting. The District will not spend the \$25,000 budgeted for election expenses.

2. Pacifica Community Television

Beginning with tonight's meeting, Pacifica Community Television (PCT) will provide video services for the District's monthly meetings, replacing Mid-Coast Community Television. A joint committee from the City of Half Moon Bay and San Mateo County selected PCT through a competitive process to cover midcoast governmental meetings. PCT will broadcast District meetings on the local community access channel (Channel 27) on the Thursday following the monthly meeting, at 10:00 AM and 10:00 PM. PCT's lower charges under the new agreement will save the District \$125 per month as compared with the cost for MCTV services.

3. 925 Main Street Connection Purchase Refund

Under an April 14, 2010 agreement with Senior Coastsiders, Inc. and Coastside Adult Day Health Center ("Applicants"), the District agreed to sell 9.5 priority connections to the Applicants for a senior housing development at 925 Main Street, subject to the Applicants' submittal of verification by the City of Half Moon Bay that the development was eligible for priority water service under the applicable local coastal plan.

Agenda: September 13, 2011 Subject: General Manager's Report

Page Two

In accordance with the terms of the agreement (copy attached), the Applicants submitted a request to withdraw their application to purchase connections and to receive a refund of \$66,215 in transmission and storage fees paid with the application. Staff issued the refund. Since the project does not qualify for priority water service, the developers plan to purchase uninstalled non-priority connections from private owners.

4. Crystal Springs Pump Station Intake Valve Actuators

Following discussion of the Crystal Springs Pump Station intake valve actuators at the last Board meeting, we received a bid of \$112,365 for their replacement, with a delivery time of 26 weeks. Considering the expense of replacing these units and their relatively short life, we have been evaluating alternative solutions which would provide better system reliability at a lower long-term cost. We will discuss this further as part of our Operations Report.

APR 142010 COASTSIDE COUNTY WATER DISTRICT

April 14, 2010

Senior Coastsiders, Inc. Attn: Cara Schmaljohn 535 Kelly Avenue Half Moon Bay, CA 94019

Coastside Adult Day Health Center Attn: Janie Bono-James 645 Correas Half Moon Bay, CA 94019

Re: **Purchase of Priority Water Service Connections**

Dear Ms. Schmaljohn and Ms. Bono-James:

The Coastside County Water District ("District"), on April 1, 2010, received the Priority Water Service Connection Purchase Agreement ("Application") submitted by Senior Coastsiders, Inc., and Coastside Adult Day Health Center (collectively, "Applicants") for the purchase of priority water service connections for use on certain property in the City of Half Moon Bay for a low income senior housing project.

The Application is substantially complete. However, there is a discrepancy in the requirements of Section 4 of the Application and the February 11, 2010 letter submitted by the City of Half Moon Bay ("City"). Section 4 requires that the Applicants submit a letter from the City "advising the District that the use to which Purchaser proposes to put the water connection is designated as a priority use, and that the Property is zoned for and designated as entitled to priority water service under the applicable local coastal plan." The February 11, 2010 letter from the City states that the City Planning Commission has approved the proposed development, "finding that housing which is restricted to low and very low income occupants is a priority use for water supply purposes, in accordance with Policy 5.519 (PDP 90-099; Lesley Gardens)." However, the February 11, 2010 letter from the City does not state that the property where the priority connections will be installed "is zoned for and designated as entitled to priority water service under the applicable local coastal plan" as required by Section 4 of the Application.

The District intends to coordinate with the City regarding this discrepancy between the requirements in the Application and the City's February 11, 2010 letter. Until this discrepancy is resolved to the satisfaction of the District, the District will not execute the Application and sell the priority water service connections to the Applicants. However, because the Applicants otherwise submitted a complete Application, including the full purchase price for the priority water service connections requested, the District will agree to sell to Applicants priority water service connections pursuant to the following terms and conditions:

Number of Priority Water Service Connections: One 3/4-inch connection and one 2-inch connection (the equivalent of 9.5 5/8-inch priority connections).

- Property to be Served: Assessor's Parcel Number 056-210-340.
- <u>Use of Water Service Connections</u>: Low income senior housing project.
- <u>Transmission and Storage Fees</u>: \$10,455 for the one 3/4-inch connection, and \$55,760 for the one 2-inch connection. The District acknowledges receipt of \$66,215 for payment of these transmission and storage fees, the full amount due based on the transmission and storage fee in effect as of the date of this letter.
- Other Fees and Charges: Applicants must pay all other fees and charges applicable at the time the priority water service connections are installed at the rates in place when the connections are installed.
- Term: These terms and conditions for the sale and purchase of priority connections will remain in effect until (1) January 1, 2012; or (2) 30 days after the District provides written notice to Applicants that the discrepancy in the District's requirements and the City's February 11, 2010 letter have been resolved to the satisfaction of the District, whichever occurs first ("Expiration Date"). If the discrepancy between the requirements in the Application and the City's February 11, 2010 letter has not been resolved by January 1, 2012, the Applicants may extend the January 1, 2012 date in the Expiration Date to July 1, 2012 by providing the District with written notice prior to the Expiration Date.
- Refund of Transmission and Storage Fees: If the sale and purchase of the priority water service connections is not completed by the Expiration Date, the District will refund to Applicants the full \$66,215, without any interest, within 30 days from the Expiration Date. In addition, Applicants may withdraw the Application at any time by providing written notice to the District. If the Applicants withdraw the Application, the terms and conditions in this letter are automatically terminated and the District will refund the Applicants the full \$66,215, without any interest, within 30 days from the date the District receives the notice of withdrawal.
- <u>Application</u>: All the terms and conditions of the Priority Water Service Connection Purchase Agreement signed by Applicants and submitted to the District apply to the sale and purchase of these priority water service connections.

If the sale and purchase of the priority water service connections is not completed by the Expiration Date, then any future sale and purchase of water service connections to Applicants will be in accordance with the District regulations, including rates and charges, in effect at the time of purchase. Senior Coastsiders, Inc. and Coastside Adult Day Health Center April 14, 2010 Page 3

Please acknowledge Applicants' acceptance of the contents of this letter, including all terms and conditions for the sale and purchase of priority water service connections, by signing the enclosed copy of this letter in the space below and returning it to the District by 5:00 p.m. on April 15, 2010. If the District does not receive the copy of this letter with Applicants' original signatures by 5:00 p.m. on April 15, 2010, the agreements set forth in this letter will not be effective.

Please do not hesitate to contact me if you have any questions or want to discuss this letter.

Sincerely,

David R. Dickson

General Manager

Applicants hereby agree to the content of this letter, including the terms and conditions for the sale and purchase of priority water service connections.

MONTHLY REPORT

To: David Dickson, General Manager

From: Joe Guistino, Superintendent of Operations

Agenda: September 13, 2011

Report

Date: September 7, 2011

Monthly Highlights

Denniston Water Treatment Improvement Project

The contractor is staging operations, which will be starting in September with excavation of the west sludge basin.

Lead and Copper Testing

Careful control of the system pH is resulting in less lead and copper corrosion evident in our system.

Backflow Program

We have completed the survey of Highway 92 services and are planning to clarify components of our present backflow resolution to be presented to the Board in the coming months.

Source of Supply

Pilarcitos Reservoir and Crystal Springs Reservoir were the major source of supply for the month of August.

Systems Improvement

Beautification

- -Weed and brush abatement in Pilarcitos Canyon, El Granada Tanks 1, 2 and 3 and Nunes WTP.
- -Organizing bins and bench stock at the Nunes WTP workshop.
- -81 person-hours spend on weed abatement and cleaning.
- -Prepared Denniston site for construction. Collected and cleaned up debris and secured all District tools and equipment.

Digitalized System Maps

We have obtained the storm drain data from the County and had them incorporated into our digital map software. We shall be incorporating storm drains for the City of HMB, static pressures and fire flows with upcoming upgrades. The software has been installed on our server for easy and quick access by staff.

Procedures Update

Treatment Staff are updating Standard Operating Procedure (SOP) manuals for the Nunes WTP to reflect the operational changes brought on from the new equipment and analyzers.

El Granada Pressure Stabilization

One of the 11 pressure reducing stations (PRVs) in El Granada had failed, causing a 15 psi pressure variation in the lower pressure zone. We isolated this station and the pressure remains stable throughout the lower zone. The station will be replaced this fiscal year.

Update on Other Activities:

Lead and Copper Testing

On August 15, the crew dropped off a sample bottle at the thirty six households that agreed to take part in the Lead and Copper Sampling Program for 2011. Of these, 35 provided a sample for analysis by leaving a bottle of water that was collected after sitting in the pipes for at least 6 hours. The results showed a significant improvement over the results taken in 2008. 90% of the copper samples were not detected above the 50 parts per billion (ppb) detectable limit for reporting (DLR). 97% (all but one) of the lead samples were less than the DLR of 5 ppb. A table comparing 90 percentile concentrations for the last three sample events is presented here

Year	Copper (90 percentile)	Lead (90 percentile)
2005	235ppb (45%)	11.2ppb (83%)
2008	149ppb (65%)	5.4ppb (85%)
2011	56ppb (90%)	<5ppb (97%)

The number in parenthesis represents the percentage of samples that were below the DLR.

Backflow Program

Staff completed the survey of services on Highway 92. Letters to install backflow devices were sent to all nurseries as well as all property housing horses or livestock and other operations as needed. Staff also convened a meeting to discuss possible changes to our backflow ordinance in order to clarify our regulation and to bring it into closer compliance with Title 17 of the California Safe Drinking Water Act.

Pescadero Water Emergency

On the morning of Tuesday, 23 August, I received a phone call from the office of San Mateo Supervisor Horsley seeking assistance with supplying water to Pescadero. Their well system had failed and their storage had been depleted. I made arrangements with SFPUC, garnering the required permission and setting up a water truck for delivery. Further discussion with the county engineer operating the system indicated that they had no way to get water from the truck into the storage tank. They had their system back in operation on the morning of Wednesday, 24 August.

Power Outage

On Friday, 2 September, the transformers failed supplying power to El Granada Tank 2 Pump Station. PG&E set up a temporary generator on site in the event that we needed to run the station before they could replace the transformers. The transformers were replaced on Saturday, 3 September.

Princeton Overlay

The county is in the process of paving Princeton Avenue and associated streets. Part of the process is for their contractor to raise our valve and meter boxes. We have an inspector monitoring their progress and inspecting their work when they bring the valve and meter boxes to grade.

Safety/Training/Inspections/Meetings

Meetings Attended

- 1 August Half Moon Bay Tank 1 preconstruction meeting.
- 2 August Met with Balance Hydrologics to discuss their work up to date.
- 3 August Denniston Water Treatment Improvement Project kickoff meeting.
- 4 August Coastside Interagency Meeting to discuss Main Street Bridge, backflow requirements, discharge permits, and storm drain locations.
- 4 August Met with North Coast County Water District senior management and Cheryl Davis (workforce consultant) to discuss how we could lend mutual aid to each other as well as to share knowledge and experience in day to day operations of our respective Districts. These meetings will be on-going.
- 10 August BAWSCA-WQ quarterly water quality meeting
- 23 August O&M Staff meeting with field supervisors.

Safety Meetings and Training

There was no Safety Committee meeting in August.

CINTAS Safety Training in August was on electrical awareness and Lock Out/Tag Out. Duffy, Winch, Donovan, Twitchell, Davis, Damrosch and Bruce were in attendance.

Tailgate safety sessions in August

- Plan the Work and Work the Plan
- Lightning: The Underrated Killer
- Lifting Tips
- Job Hazard Analysis
- Handy Tips for Hand Safety

Treatment Operator Training

Logan Duffy continues to receive treatment operator training at the Nunes WTP under the guidance of Steve Twitchell and Sean Donovan. He will be taking his Water Treatment Operator Grade 2 exam in November.

Work Truck

Since the replacement of the work truck is still a few years out, we upgraded the rear suspension to keep it handling safely. The crews feel much better about the improvements.

Crane Inspections

The overhead cranes at Nunes WTP and Crystal Springs PS were inspected and certified in August. The inspection firm affixed end limiters on the rails. This is the first time on record that these cranes have been certified since they were installed. They are now scheduled to be inspected and certified safe annually.

Regulatory Agency Interaction

California Department of Public Health (DPH)

Sent in our Watershed Sanitary Survey for 2011. The next survey is due in 2016.

Department of Fish and Games

Received an email from F&G indicating that they have completed processing our dredging amendment but did not indicate what mitigation measures we must take. We expect the hard copy of the permit to arrive in the mail in September.

Projects

Tank Recoating Projects

Coating Specialists and Inspection Services (CSI) was the low bidder for the coating inspection of Half Moon Bay Tank 1 Repair and Recoating Project.

Paso Robles Tank will be sending in the submittals for this project this month. In our meeting of 1 August, we discussed staging, times, communication and their schedule. They expect to have the project complete by 1 January barring rain issues.

Denniston Dredging-year 3

We are making arrangements for standard intake dredging and tule removal to take place on the first week of October.

Pilarcitos Canyon Blending Station

The conduit from the blending station site to the nearest power pole was installed with pull boxes at the beginning of the month. The electrical contractor Del Porto pulled the wire and established the terminal boxes and a light pole. We will be installing the new pressure reducing valve this fall.

Denniston Water Treatment Improvement Project

Crews prepared the site for construction activities. They removed stored piping and secured our tools and equipment resident at the plant. Anderson Pacific Construction started staging at the plant site on 15 August with the delivery of 2 trailers, one for the contractors and one for our construction inspector and District staff. Staff attended a preconstruction meeting on the 17th and the condition of the

site was documented with photos. Power and communication was established at the trailers during the first week of September.

Avenue Cabrillo Project

Staff has been working with Jim Teter on the design of Phase I, II and III of this project. Future fire hydrant locations were reviewed with the Coastside Fire Protection District.

El Granada Pressure Reducing Valve (PRV) Project

Staff found one of the 11 PRVs not functional in August. It was not reducing the pressure adequately. We turned off the station and scheduled it to be replaced in spring 2012. We gave Andreini Brothers Construction notice to proceed on the PRV on El Granada Blvd, which must be replaced before we can proceed with the El Granada Tank 2 Repair and Recoating Project.

Monthly Report

To: David Dickson, General Manager

From: Cathleen Brennan, Water Resource Analyst

Agenda: September 13, 2011

Subject: Water Resources Report

This report is provided as an update on water resources activities. The report includes the following items:

Social Media

• California Statewide Groundwater Elevation Monitoring

Meetings

□ Social Media

In its efforts to use cost effective and responsive communication tools that customers find valuable, the District has added social media to its communications strategies. Specifically, the District is using Facebook and Twitter platforms to communicate messages to its customers.

The instant messaging capability of these platforms offers an opportunity to give customers a realtime connection with the District. The District plans on using social media for announcements, alerts, updates and reminders.

To follow us on Facebook and Twitter, go to the District's website (*www.coastsidewater.org*) and *Like Coastside County Water District on Facebook* and *Follow us on Twitter* @CoastsideWater.

□ California Statewide Groundwater Elevation Monitoring (CASGEM)

The District recently completed submitting the required documentation to comply with Senate Bill 6, also known as the California Statewide Groundwater Elevation Monitoring program, to the California Department of Water Resources (DWR). The submittals have been uploaded to DWR's database. The submittals include:

- ✓ Notification Documents
- ✓ Shapefile
- ✓ Monitoring Plan

Beginning this fall, the District will perform seasonal groundwater elevation monitoring of the Airport Subbasin and upload that data to DWR.
