Number of Irrigation Valves	1.0		
Number of Irrigation Spray Heads	0.0		
<b>Subtotal Outdoor</b>			
<b>Total Indoor and Outdoor</b>			

The water demand worksheet is used to determine the size and type of water meter(s) required for your project. Each plumbing fixture (end use) is assigned a fixture unit value as determined by the California Plumbing Code. This information along with other submittals and documents for your project will assist the District in determining if the project has adequate capacity and the type of water meter(s) required.
