

STAFF REPORT

To: Coastside County Water District Board of Directors

From: Mary Rogren, Assistant General Manager

Agenda: May 8, 2018

Report Date: May 2, 2018

Subject: Assistant General Manager's Report

Recommendation: None

Background:

- **SFPUC Memo from Steven Ritchie - Final Water Supply Availability Estimate:**

On April 10, 2018, Steven Ritchie distributed the attached memo to the SFPUC Wholesale Customers. Mr. Ritchie notes that "The SFPUC will be able to meet 100% of its customers' needs this year. As always, our customers' commitments to water conservation ensure our ability to carry over water in our reservoirs from one year to the next. This commitment results in improved water supply reliability and reduces the risk of water shortages in the event that next year is dry. All of the users of our water system benefit from the continuation of wise water use."

TO: SFPUC Wholesale Customers 

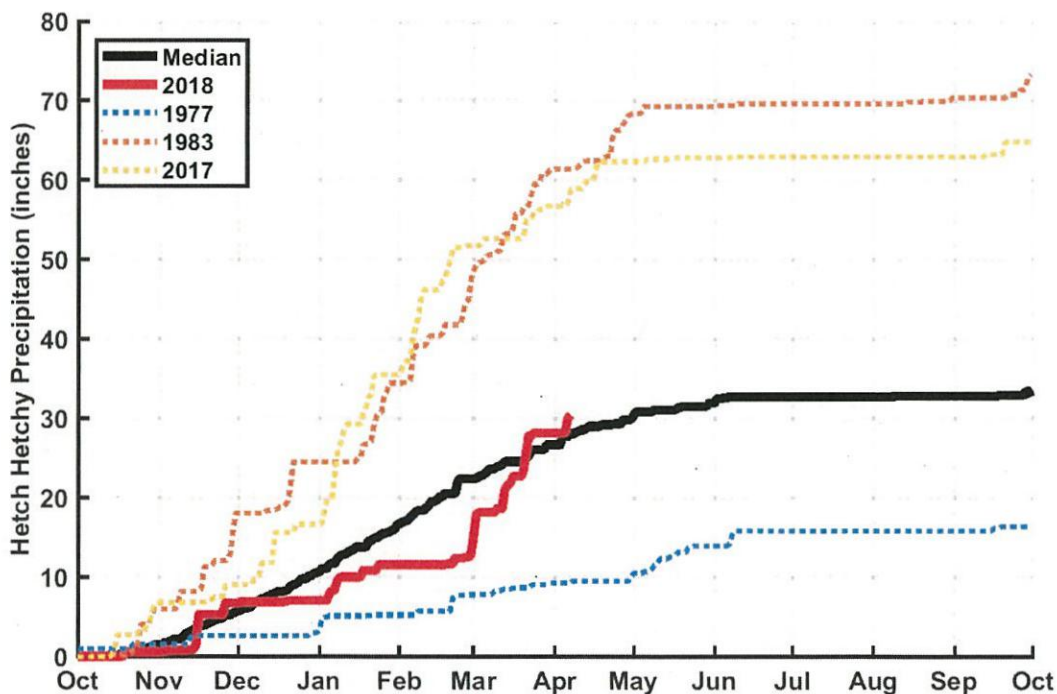

FROM: Steven R. Ritchie, Assistant General Manager, Water

DATE: April 10, 2018

RE: Final Water Supply Availability Estimate

This memo provides an update on the water supply availability estimate provided March 1st, 2018 and the current hydrologic conditions.

The plots below provide precipitation at Hetch Hetchy and snowpack in the watershed through April 8th, 2018. As the plots show, despite a sluggish winter, the Hetch Hetchy watershed has experienced above average year to date rainfall. While we did receive some significant snowfall in March, the April 1 snow course index is about 75% of median April 1st snowpack.

Services of the San Francisco Public Utilities Commission

OUR MISSION: To provide our customers with high-quality, efficient and reliable water, power and sewer services in a manner that values environmental and community interests and sustains the resources entrusted to our care.

The below chart on water available to San Francisco under the Raker Act tracks the water needed to fill the entire water system by July 1, 2018. The SFPUC forecasts that under median precipitation through the rest of the rainy season, the SFPUC will fill the water system this year.

The SFPUC will be able to meet 100% of its customers' needs this year. As always, our customers' commitments to water conservation ensure our ability to carry over water in our reservoirs from one year to the next. This commitment results in improved water supply reliability and reduces the risk of water shortages in the event that next year is dry. All of the users of our water system benefit from the continuation of wise water use.
