San Francisco Public Utilities Commission Hydrological Conditions Report January 2024

J. Chester, C. Graham, H. Forrester, N. Waelty Prepared February 5, 2024

Staff from Hetch Hetchy Water and Power, a Division of the San Francisco Utilities Commission, and other cooperating agencies conducted the first manual snow surveys of the year in late January. Snow survey data indicated year-to-date snow water equivalent (SWE) around 50% of normal or 30% of April 1 normal.

Hetch Hetchy System Precipitation Index

Current Month: The January 2024 six-station precipitation index was 7.16 inches, which is 124% of the 1991-2020 January median.

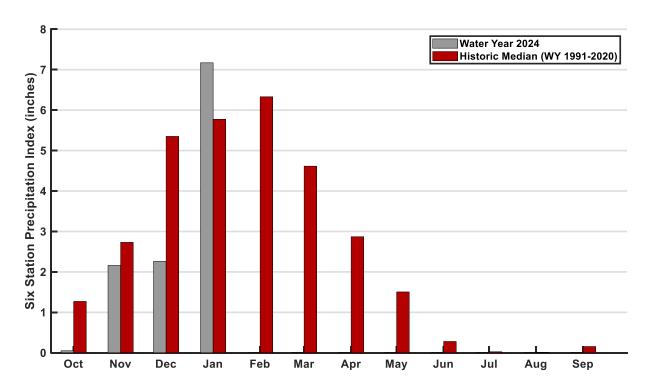

Figure 2: Monthly distribution of the six-station precipitation index relative to the monthly precipitation medians as of February 1. The precipitation index is computed as the average of six Sierra precipitation stations and is an indicator of the overall basin wetness.

Cumulative Precipitation to Date: The cumulative six-station precipitation index for Water Year (WY) 2024 is 11.60 inches, which is 77% of the median to date. The Hetch Hetchy Weather Station received 6.44 inches of precipitation in January resulting in a total of 10.56 inches for WY 2024, or 64% of median for the Water Year to date. The cumulative WY 2024 Hetch Hetchy Weather Station precipitation is shown in Figure 3 in red.

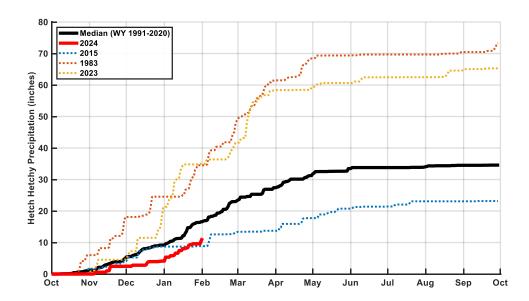

Figure 3: Water Year 2024 cumulative precipitation measured at Hetch Hetchy Weather Station as of February 1. Median cumulative precipitation measured at Hetch Hetchy Weather Station and example wet and dry years are included with Water Year 2024 for comparison purposes.

The Harry Tracy Water Treatment Plant production for January was 65 MGD, the Sunol Valley Water Treatment Plant production for the month was 87 MGD.

Regional System Water Delivery

The average January delivery rate was 151 MGD which is an 1.3% decrease below the December delivery rate of 153 MGD.

Local Precipitation

The rainfall summary for January 2024 and Water Year 2024 is presented in Table 3.

Snowpack, Water Supply and Planned Water Supply Management

Due to below average precipitation during October and December, the current snowpack (Figure 5) is below average. Above average conditions during January increased the snow pillow index substantially.

Water Year 2024 runoff has been well below mean, resulting in 3,211 acre-feet of Water Available to the City (Figure 4).

Currently, Hetch Hetchy Reservoir is drafting via minimum required streamflow due to the 2024 Winter Shutdown (December 5 – March 16). Cherry Reservoir is drafting via minimum required streamflow and scheduled power generation. Lake Eleanor is drafting via minimum required streamflow and pumping.

Water Bank slightly debited during January as reservoir releases to the Tuolumne River were slightly exceeded by reservoir inflows. Water Bank is expected to remain near full capacity in February.

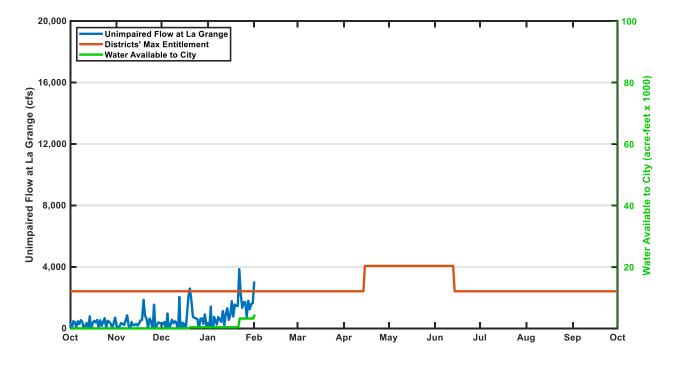

Figure 4: Calculated unimpaired flow at La Grange and the allocation of flows between the Districts and the City.

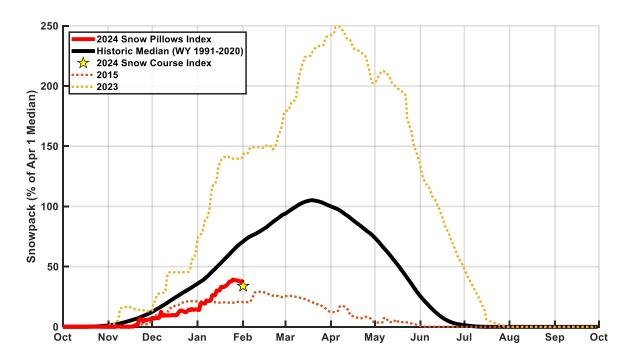

Figure 5: Tuolumne River Basin 10 Station Snow Index as of February 1 (red line), based on real time snow pillow Snow Water Equivalent (SWE) measurements in the Tuolumne Basin. Star indicates the average manual snow course measurements in the Tuolumne Watershed. Median Index and example wet and dry years are included with Water Year 2024 for comparison purposes.

Budget Calendar

Recommendation / Motion:

Information Only.

Background:

At the June 11, 2024 Board of Directors meeting, the Board will be asked to approve the draft Fiscal Year 2024/2025 Operations and Maintenance (O&M) Budget and the draft Fiscal Year 2024/2025 to Fiscal Year 2033/34 Capital Improvement Program (CIP). These plans are used for measuring financial performance on an ongoing basis during the fiscal year and are also used in the development of the District's Financial Plan.

The attached Budget Process Timeline lists key milestones and the schedule for Committee and Board reviews, and Board approval, of the District's Fiscal Year 2024/2025 O&M Budget and Capital Improvement Program (CIP) plan for Fiscal Year 2024/25 through FY2033/34. Key dates are also outlined for the District's Water Financial Plan and Rate Study that is currently underway with the consulting firm, Water Resource Economics (WRE). Staff will present Budget process updates at each Regular Board meeting through June, and will conduct a Workshop on May 14, 2024 to review the details of the District's Financial Plan draft.

Draft Fiscal Year 2024-2025 O&M Budget:

A summary of the Draft Fiscal Year 2024-2025 O&M Budget as compared to the prior year's budget is presented below.

	FY2024/25 Draft Budget	FY2023/24 Approved Budget	\$ Change from Prior Budget	% Change from Prior Budget						
REVENUE										
Water Sales in Millions of Gallons	520 MG	506 MG	14 MG	2.8%						
Water Revenue (*)	\$ 13,684,409	\$12,963,614	\$ 720,796	5.6%						
Non-Operating Revenue	\$ 2,253,000	\$ 1,962,000	\$ 291,000	14.8%						
Total Revenue	\$ 15,937,409	\$14,925,614	\$ 1,011,796	6.8%						
OPERATING EXPENSES	\$ 11,180,426	\$10,609,648	\$ 570,778	5.4%						
DEBT SERVICE	\$ 1,506,840	\$ 1,512,000	\$ (5,160)	(0.3%)						
CONTRIBUTION TO CIP AND RESERVES	\$ 3,250,144	\$ 2,803,966	\$ 446,178							
(*) No rate increase is assumed in the FY 2024/25 Draft Budget (still TBD)										

The **revenue** budget reflects water sales of 520 million gallons (MG), an increase of 14 MG from the prior year's budget and 31 MG, or 6%, from the current forecast for FY 2023/2024. At \$13,684,409, water revenues are \$720,796, or 5.6%, above this year's budget, which reflects the annual 6% price increases implemented mid-January 2024. No rate increase is assumed at this point for FY 2024/2025.

Non-operating revenues will increase by \$291,000 versus this year's budget, primarily as a result of higher interest rates associated with LAIF (\$155,000) and an additional \$90,000 of County and ERAF tax receipts. \$46,000 of increases in other non-operating revenues accounts for the remainder of the year-over-year increase.

Budgeted **operating expenses** are \$570,778 higher than the prior year's budget primarily due to inflationary increases, which include:

- salary increases associated with a preliminary estimate for a COLA in July, 2024 and 2.5% step/promotion increases for eligible staff;
- a confirmed rate increase from SFPUC of 6.5% in July, 2024;
- an assumption that PG&E rates will grow by 15%;
- increases in premiums for medical and dental that are estimated to be 15%;
- an estimated increase in Liability insurance of 15%.

Debt service reflects modestly lower loan payments than the prior year.

The resulting contribution to CIP and Reserves of \$3,250,144 is \$446,178 above the prior year's budget. See **Exhibit A** for the Draft FY 2023-2024 O&M Budget and detailed explanations of the variances.

Draft Fiscal Year 2024/2025 to 2033/2034 Capital Improvement Program:

• Draft 5 Year CIP - \$32,125,000

• Draft 10 Year CIP - \$69,175,000

• Prior Year's Approved 10 Year CIP - \$71,260,000

The Draft 2024/2025 to Fiscal Year 2033/34 is \$2,085,000 lower than the prior year's approved CIP primarily due to the anticipated completion in FY 23/24 of the Nunes Treatment Plant project.

The changes from the prior year 10 Year CIP approved in June 2023 are shown below:

Water Supply Availability Update - March 1, 2024

On March 1 of each year, the SFPUC provides a water supply availability update for the current Water Year. (See the attached memo.) Given recent rainfall, snowpack and reservoir storage levels, SFPUC projects that they will be able to meet full customer demand this year. The final water supply availability memo will be issued in April after the last snow survey of the year.

RE: Water Supply Availability Update

This memo provides the water supply availability update for Water Year 2024 and the current hydrologic conditions.

While early on the Water Year appeared somewhat dry, precipitation conditions have improved throughout the month of February. As the charts below show, the Hetch Hetchy watershed and the local watersheds show just below median precipitation for November through December with January and February exceeding the median.

The local watersheds have received 91% of normal annual total rainfall of 22.80 inches. The Hetch Hetchy watershed has received 53% of normal annual rainfall of 36.68 inches. While we await the results of the second snow survey, our compiled data is showing an increase in the snowpack to be just below median for this time of year (82% of median condition to date).

Rainfall, snowpack, and reservoir storages to date, including carryover storage from an extremely wet Water Year 2023, continue to indicate a reasonable probability that the SFPUC will be able to meet full customer demand this year. The SFPUC will continue to monitor water supply conditions and State actions. The final water supply availability memo will be issued in early April following the last snow survey of the year.
