

STAFF REPORT

To: Board of Directors
From: Cathleen Brennan, Water Resource Analyst
Agenda Date: July 14, 2026
Report Date: July 10, 2026
Subject: Water Resources Informational Report

State of California

Consumer Confidence Reports (CCR) must conform with the California Code of Regulations [Title 22, Chapter 15, Article 20] and law [California Health and Safety Code, HSC, section 116470].

Safe Drinking Water Act

In 1996, Congress amended the Safe Drinking Water Act, adding a requirement that water systems deliver to their customers a brief annual water quality report.

2025 Consumer Confidence Report (CCR) Annual Water Quality Report

The drinking water delivered to customers met all U.S. EPA and California drinking water health standards in calendar year 2025. The Treatment Plant Supervisor and the Treatment Operations Manager provided the water quality data for this CCR.

The CCR has been uploaded to the eAR database along with the required certification. The CCR was posted on the District's website on June 15th and can be found under the "Your Water" drop-down menu. <http://www.coastsidewater.org/water-quality.html>

The District mailed a postcard to customers with a printed direct link to the CCR on the District's website. The postcard for the 2025 CCR was mailed on June 15th and delivered to customers on June 17th.

Spanish: www.coastsidewater.org/wqr-spa

The District sent an electronic newsletter on June 18th advertising the availability of the CCR on the District's website and also posted its availability on the platform Nextdoor.

There are eight basic requirements included in the CCR:

- Water System Information
- Sources of Water
- Definitions
- Reported Levels of Detected Contaminants
- Monitoring for Cryptosporidium and Other Contaminants
- Compliance with Other Drinking Water Regulations
- Variances and Exemptions
- Required Educational Information

In addition to water quality data, the CCR contains information on how to contact the District, Board of Directors meetings, water

conservation, capital improvements, PFAS, and WaterSmart. The District strives to make a professional report that is easy to read.

The three most common water quality questions the District is asked by customers are:

- ❖ Is there fluoride in my water?
- ❖ Do you use chloramines for disinfection?
- ❖ What is the hardness of my drinking water?

The CCR provides an opportunity to educate customers on water sources, water delivery and the value of drinking water to the community.

Annual Water Supply and Demand Assessment (AWSDA) Report

Staff submitted the District's AWSDA Report through the state's WUE portal to the California Department of Water Resources on June 12, 2026. The report is also referred to as the Annual Water Shortage Assessment Report. The District reported that all water supplies are normal with no expected water shortage for Fiscal Year 2026-2027.

Water Loss Program Questionnaire for SWRCB

On June 16, 2026, staff completed and submitted a questionnaire for the State Water Resources Control Board's Water Loss Program on pressure regulation within our treated water distribution system. This is the second questionnaire on pressure regulation the District has submitted. The last questionnaire on pressure regulation was submitted in 2023. The Distribution Operations Manager assisted with completing the questionnaire.

2025 Urban Water Management Plan Update

The Urban Water Management Plan and required tables have been uploaded to the Department of Water Resources and mailed to the California State Library. The Urban Water Management Plan is posted on the District's website (<https://coastsidewater.org/resources/reports-and-studies/>). An email was also sent to the city and the county providing a link to the Urban Water Management Plan.
